www.oxfordtextbooks.co.uk/ebooks Critical thinking is essential for lawyers, judges, and law students. Yet law schools have never systematically taught critical thinking to their students. The main purpose of this book is to help law professors teach lawyers, judges, and law students how to

become critical thinkers. It first explains critical thinking to professors, and, then, it shows how they can teach this knowledge to students. Lawyers, judges, and law students can also use this book to teach themselves critical thinking. Chapter One introduces the reader to the need for critical thinking in the law, and it will give two methods of evaluating how critical thinking works within legal education. Chapter Two helps the reader understand the basics of critical thinking. Most scholars think that critical thinking is domain specific, so Chapter Three presents the domain of the law. Chapter Four applies critical thinking basics to law's domain, and it shows how to teach critical thinking to lawyers, judges, and law students. Chapter Five shows how critical thinking processes can improve the use of the Socratic method in legal education. Chapter Six discusses how critical thinking can make law professors better teachers. Chapter Seven demonstrates how critical thinking can produce better legal writing professors. Chapter Eight focuses on judges and critical thinking. The final chapter brings everything together and highlights the most important aspects of teaching critical thinking to lawyers, judges, and law students. Two appendices contain sample Socratic dialogues that employ critical thinking. I have included exercises and problems on critical thinking throughout the book. Frequently the ethical attorney finds himself in a position where he can no longer reconcile conflicting responsibilities he owes to his clients with those he owes society and himself. Faced with the dilemma of choice among countervailing and competing obligations, he has little training and precedence to guide him. If he is over forty, the

overwhelming probability is that he never took a course on legal ethics; if he looks for a general, up-to-date text to provide insight, he will look in vain. Nor is there a developed body of case law from which to glean an appropriate course of action. This vacuum of authoritative formulations of responsible behavior is a matter of concern not only to the legal profession, but to all sectors of American society. Lawyers shape the mores and thoughts of all of us. Their will is exerted not only in modifying our national institutions, but ultimately our individual, personal sense of values. This volume serves two important purposes: it provides the interested professional and lay reader with an appreciation of the spectrum of the ethical dilemmas confronting the legal profession, and it provides a sense of balance about the competing considerations present in each of these dilemmas. At a time when the legal profession is under attack both from within and without, this book represents some of the best critical thinking by lawyers about their role and responsibilities in American society. Comprehensive, intelligent overview of all the key concepts covered in a typical introduction to law course. Divided into three parts, reflecting the topics addressed in an introductory course: Part I, Paralegals and the American Legal System; Part II, Finding and Analyzing the Law and Part III, Legal Ethics and Substantive Law. the law. These people can be driven from their land, intimidated by violence, and excluded from society. This book is about community paralegals - sometimes called barefoot lawyers - who demystify law and empower people to advocate for themselves. These paralegals date back to 1950s South Africa and are active today in many countries, but their role has largely been ignored by researchers. *Community Paralegals and the Pursuit of Justice* is the first book on the subject. Focusing on paralegal movements in six countries, Vivek Maru, Varun Gauri, and their coauthors have collected rich, vivid stories of paralegals helping people to take on injustice, from domestic violence to unlawful mining to denial of wages. From these stories emerges evidence of what works and how. The insights in the book will be of immense value in the global fight for universal justice. This title is also available as Open Access.

"Featured Contributors" bring a personal touch to the material – as students learn how professionals truly work in each area of the law and how each skill directly translates on-the-job. Ethical dilemmas challenge the students to further understand their professional duties and critical thinking questions provide an opportunity to sharpen their proficiency. In this way, paralegal students learn not only about the substantive areas of the law, but how to excel as a professional in each one. Understanding how to go about solving legal problems is a critical skill law students require in order to achieve success at law school and later in professional practice. This innovative text is a guide to developing students' critical thinking in solving legal problems through the application of the principles of logic. The authors explain how syllogistic analysis provides the underlying basis for legal problem solving using the IRAC method commonly taught in foundation law studies. Drawing on everyday examples, the processes of everyday reasoning are used both to deconstruct and reconstruct the reasoning itself. The step-by-step approach demonstrates the application of legal reasoning and research to generate appropriate responses to legal issues. It assists students to engage in critical analysis so as to make a reasoned choice amongst alternative responses to those legal problems. For lecturers, the book is supported by an online teaching guide and a suite of supplementary learning resources. The learning and use of syllogisms as the basis for IRAC and its variants is supported with accessible models, clear analysis and scaffolding. The methodology is supported by research into the most effective teaching and learning

approaches and incorporates scaffolding, provision of feedback, teacher-student interaction, student-centred teaching, contextualisation, drawing on students' experiences and empowering students by equipping them with the cognitive skills required in real-life lawyers from the outset of their law studies

Features
