Winner of the 2016 Lambda Literary Award for Bisexual Fiction “I read *The Life and Death of Sophie Stark* with my heart in my mouth. Not only a dissection of genius and the havoc it can wreak, but also a thunderously good story.”—Emma Donoghue, New York Times bestselling author of *Room* “This novel is perceptive, subtle, funny and lingers in unexpected ways. The analysis of a woman who puts her art above all else is equal parts inspiration and warning story. Anna North makes prose look easy.”—Lena Dunham

Gripping and provocative, *The Life and Death of Sophie Stark* is a haunting story of fame, love, and legacy told through the propulsive rise of an iconoclastic artist. Sophie Stark begins her filmmaking career by creating a documentary about her obsession, Daniel, a college basketball star. But when she becomes too invasive, she finds herself the victim of a cruel retribution. The humiliation doesn’t stop her. Visionary and unapologetic, Sophie begins to use stories from the lives of those around her to create movies, and as she gains

critical recognition and acclaim, she risks betraying the one she loves most. Told in a chorus of voices belonging to those who knew Sophie best, *The Life and Death of Sophie Stark* is an intimate portrait of an elusive woman whose monumental talent and relentless pursuit of truth reveal the cost of producing great art. It is “not only a dissection of genius and the havoc it can wreak, but also a thunderously good story” (Emma Donoghue). Building information modelling (BIM) is a set of interacting policies, processes and technologies that generates a methodology to manage the essential building design and project data in digital format throughout the building's life cycle. BIM, makes explicit, the interdependency that exists between structure, architectural layout and mechanical, electrical and hydraulic services by technologically coupling project organizations together. *Integrated Building Information Modelling* is a handbook on BIM courses, standards and methods used in different regions (Including UK, Africa and Australia). 13 chapters outline essential information about integrated BIM practices such as the BIM in site layout plan, BIM in construction product management, building life cycle assessment, quantity surveying and BIM in hazardous gas monitoring projects while also presenting information about useful BIM tool and case studies. The book is a useful handbook for engineering management professionals and trainees involved in BIM practice. A compilation of over 70 project examples, this committee report details various problems that may occur at the design, construction, or operation stages of hydroelectric facilities. Easy-to-read, straightforward

case sheets identify the specific intake/diversion, water conduit, power plant, or open channel problem pertaining to that facility, its cause and effect, any investigations into the problem, and the analysis or action taken to correct it. Keywords, owner, location, and other pertinent circumstances surrounding the lesson learned are supplied. Questa edizione italiana del testo di riferimento internazionale sul BIM è nata dall'esigenza, condivisa con gran parte del mondo della progettazione e produzione edilizia, di fornire al panorama della committenza pubblica o privata, delle professioni e delle imprese, un volume che fosse capace di mettere in evidenza la grande novità rappresentata dall'adozione del BIM all'interno dei propri processi ideativi, produttivi e gestionali. Nella prima parte il volume affronta le tematiche relative alla gestione contrattuale del settore delle costruzioni e di come l'introduzione del BIM stia spostando l'attenzione degli attori su processi collaborativi; esamina quindi tutto l'apparato tecnologico (hardware e software) in termini di interoperabilità e di piattaforme BIM. I capitoli successivi riguardano rispettivamente i proprietari o i gestori dell'edificio, i progettisti, le imprese esecutrici e infine i subappaltatori e i fornitori; questi capitoli evidenziano gli sforzi richiesti dallo sviluppo del BIM all'interno dei processi aziendali, i possibili elementi di resistenza, ma soprattutto permettono di intravedere le ottimizzazioni di quegli elementi di scarsa produttività che la gestione tradizionale mantiene fortemente in essere. Un intero nuovo capitolo introduce l'importante punto di vista offerto dagli autori su come il BIM sia destinato a modificare

questo settore nel breve e nel medio termine, cui fa seguito un capitolo che presenta il livello di diffusione del BIM nei diversi continenti, riportando una scheda riepilogativa per paese da cui è possibile estrarre sia norme tecniche sia report applicativi o linee guida. L'ultimo capitolo offre, tra gli altri, alcuni casi studio afferenti alla realtà italiana, a riprova dell'attenzione che anche nel nostro Paese va rivolgendosi nei confronti del BIM. The Danish architect Dorte Mandrup is one of the most aesthetic originals as well as one of the most socially committed of her generation. Down to the very smallest detail, her houses communicate both with those for whom they are built as well as with the public space around them. Dorte Mandrup never builds without taking a stand. Nor is she ever dull. Her special relationship to reality is apparent in everything from the boldest play with rooms and forms to the delicate restoration of a Danish classic such as Arne Jacobsens Munkegård School. Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on

literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very different needs of AP students by understanding their goals and providing them with appropriate challenges. This Newnes manual provides a practical introduction to the standard methods and techniques of assembly and wiring of electrical and electromechanical control panels and equipment. Electricians and technicians will find this a useful reference during training and a helpful memory aid at work. This is a highly illustrated guide, designed for ready use. The contents are presented in pictures and checklists. Each page has a series of 'how-to' instructions and illustrations. In this way the subject is covered in a manner which is easy to follow. Each step adds up to a comprehensive course in control panel wiring. This new edition includes extra underlying theory to help the technician plus application notes and limitations of use. Simple programmable logic controllers (PLCs) are covered, as well as new information about EMC/EMI regulations and their impact.

ESPORRE ALLESTIRE VENDERE è una guida per la progettazione di spazi espositivi e commerciali; il volume presenta soluzioni progettuali e strategie espositive strettamente legate alla comunicazione e al marketing. Il volume illustra, a scala generale e in dettaglio, la struttura concettuale e organizzativa degli spazi destinati a mostre temporanee fiere ed eventi. L'architettura dei punti vendita – dall'organizzazione del punto vendita, alle aspettative del consumatore, fino al concept store – richiede una progettazione attenta ad interpretare le esigenze di committenti e

consumatori e a creare nuovi spazi e nuovi concept di locali commerciali. In particolare, nella prima parte del volume, si spazia dai temi dell'esposizione a quelli dell'informazione e della comunicazione, dai problemi di immagine a quelli legati all'informazione multimediale che non può più prescindere da temi di marketing e di gestione mirata delle risorse. Completano il testo i principali riferimenti alla normativa tecnica di settore, visti all'interno di linee-guida specifiche per il settore espositivo. La seconda parte, tratta invece dell'architettura per i luoghi del commercio: l'organizzazione del vendere, le aspettative del consumatore, i significati legati allo shopping, hanno infatti indirizzato l'architettura dei punti vendita a profondi cambiamenti, che il testo analizza dal punto di vista dei criteri e dei metodi utili per il progetto. Il volume è arricchito da un CD in cui si trovano 22 Casi di studio applicativi e una ricca galleria di immagini che rendono il testo unico nel suo genere ed un pratico strumento di riferimento per i professionisti che operano in questo settore.

well as the boatbuilding industry as a whole. The fifth edition is completely revised and expanded. It examines every aspect of the process of yacht and powerboat design. The new edition includes new findings from recent research in aero and hydrodynamics, as well as covering the most recent changes to building standards. The authors have used a newly built 41-foot performance cruiser to demonstrate the practical application of yacht design theory. This new edition includes photos of the building process and detailed explanations.

90 Two By: Dastan Khalili DiaVerse, dia meaning “two” and verse for the poetic rhyme, is a brand-new style of poetry where the only rule is all stanzas must have a maximum of two words. Created by poet Dastan Khalili, the style of DiaVerse breathes new life into poetry. The restraint of DiaVerse forces poets to use the purest forms of expression.

90 Two is ninety of Khalili’s DiaVerse poems, written over the last five years. He combines his poetic verses with digital artwork and imagery, each conveying a sensation of inspiration that came to life with each poem. The experience of people working with different perspectives in different fields of masonry modeling, from mathematics to applied engineering and practice, is brought together in this book. It presents both the theoretical background and an overview of the state-of-the-art in static and dynamic masonry modeling.

Spoiling a child is not just about letting them have a few extra sweets. In some cases, years of doting really do spoil them. Victurien d'Esgrignon was raised by his doting aunt and adoring father - a family high up in the aristocracy of Restoration France. As a young man, he is both intelligent and

shallow: a liar and a cheat who ruins his family, their lawyer, and others drawn into his circle. Then he meets his match - a young man with the same cold heart and eye for an opportunity. Who will triumph in this race to the bottom? Honore de Balzac's 'The Collection of Antiquities' shines a bright light on the social and moral decline of the aristocracy in 1830s France. Fans of 'Les Miserables' by Victor Hugo and 'A Tale of Two Cities' by Charles Dickens will love this! Honoré de Balzac (1799-1850) was a French novelist and playwright, most famous for a sequence of novels, collectively called 'The Human Comedy'. His signature style was a warts-and-all representation of post-Napoleonic French life, rich in detail and featuring complex, unfiltered characters. The style means Balzac is regarded as one of the pioneers of European literary realism. He is named as an influence on writers including Emile Zola, Henry James, Charles Dickens, and Gustave Flaubert. The first novel he published under his own name was 'Les Chouans' in 1829. In 1834 he hit upon the idea of grouping his novels together to record all of society. The result, over a period of years, was 'The Human Comedy', which comprised three categories: 'Analytic Studies'; 'Philosophical Studies'; and 'Studies of Manners'. Building Information Modelling (BIM) is being debated, tested and implemented wherever you look across the built environment sector. This book is about Heritage Building Information Modelling (HBIM), which necessarily differs from the commonplace applications of BIM to new construction. Where BIM is being used, the focus is still very much on design and

construction. However, its use as an operational and management tool for existing buildings, particularly heritage buildings, is lagging behind. The first of its kind, this book aims to clearly define the scope for HBIM and present cutting-edge research findings alongside international case studies, before outlining challenges for the future of HBIM research and practice. After an extensive introduction to HBIM, the core themes of the book are arranged into four parts: Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners, researchers, academics and students engaged in BIM, HBIM, building energy modelling, building surveying, facilities management and heritage conservation more widely. L'efficiamento energetico è un argomento attuale ed affascinante, spesso banalizzato, ma richiede investimenti spesso importanti di cui necessario valutare sia il ritorno, sia la convenienza di sostenere in proprio, o con finanziamento tramite terzi, gli oneri atti a conseguire un risparmio sulle fatture dell'energia. Questo libro tenta di fare chiarezza sulle soluzioni che si possono adottare in campo elettrico, e fornisce strumenti per valutare non solo in termini tecnici, ma anche in termini finanziari, l'efficacia di un investimento. La trattazione si basa su casi concreti, accompagnati da diversi esempi applicativi, introdotti da richiami alla teoria necessaria alla

loro comprensione. Il testo, pensato in origine come sostegno agli studi dei corsi in materia di uso efficiente dell'energia elettrica erogati presso la Scuola di Ingegneria dell'Università degli Studi di Firenze, è adatto anche a coloro che in qualità di energy manager, liberi professionisti, EGE, funzionari di Pubbliche Amministrazioni, si trovano a dover valutare aspetti legati all'efficientamento delle utenze elettriche.

The Wright idea "The interior space itself is the reality of the building." - Frank Lloyd Wright

Widely thought to be the greatest American architect, Frank Lloyd Wright (1867-1959) was a true pioneer, both artistically and technically. At a time when reinforced concrete and steel were considered industrial building materials, Wright boldly made use of them to build private homes. His prairie house concept--that of a low, sprawling home based upon a simple L or T figure--was the driving force behind some of his most famous houses and became a model for rural architecture across America. Wright's designs for office and public buildings were equally groundbreaking and unique. From Fallingwater to New York's Guggenheim Museum, his works are among the most famous in the history of architecture.

Like many apparently simple devices, the vertical water wheel has been around for so long that it is taken for granted. Yet this "picturesque artifact" was for centuries man's primary mechanical source of power and was the foundation upon which mills and other industries developed. Stronger than a Hundred Men explores the development of the vertical water wheel from its invention in ancient times through its eventual demise as a source of power during the Industrial Revolution. Spanning more than 2000 years, Terry Reynolds's account follows the progression of this labor-saving device from Asia to the Middle East, Europe, and America-covering the evolution of the water wheel itself, the development of dams and reservoirs, and the applications of water power. Tiré du site Internet de JRP/Ringier : "Matias Faldbakken (\*1973) is an artist and writer living in Oslo. Son of the celebrated Norwegian author Knut Faldbakken, he has published

two novels, "The Cocka Hola Company" and "Macht und Rebel" under the alias Abo Rasul. Drenched with acid humor and continuously hitting below the waist, his books immediately caused a considerable stir in Norway. If, in these publications, he underlines the differences and similarities between the so-called underground and the mainstream, and between the "independent" and the "commercial" in everyday life, these subjects are also central to his art practice. Fascinated with systems of knowledge, power, order, and exchange, he shows an interest in understanding how art and artists can be active participants in these systems. Faldbakken studied at the National Academy of Fine Arts in Bergen as well as at the Städelschule in Frankfurt am Main. He represented Norway in the Nordic Pavillion at the Venice Biennial in 2005, as well as showing his work in the Wrong Gallery at the Whitney Biennial, the Stedelijk Museum Amsterdam, the National Museum Oslo, the Sydney Biennial and the KW Institute for Contemporary Art Berlin, among others." Constructing new buildings with retrieved surplus materials is a practical and inspiring book about recycling superfluous stuff in architecture.
