institutions, from the International Monetary Fund to the
International Olympic Committee, are perceived as
bastions of sclerotic mediocrity at best and outright
corruption at worst, and this perception is generally not
far off the mark. In the wake of the 2008 financial crash,
Daniel W. Drezner, like so many others, looked at the
smoking ruins of the global economy and wondered why
global economic governance structure had failed so
spectacularly, and what could be done to reform them in
the future. But then a funny thing happened. As he
surveyed their actions in the wake of the crash, he realized
that the evidence pointed to the exact opposite
conclusion: global economic governance had succeeded.
In *The System Worked*, Drezner, a renowned political
scientist and international relations expert, contends that

despite the massive scale and reverberations of this latest crisis (larger, arguably, than those that precipitated the Great Depression), the global economy has bounced back remarkably well. Examining the major resuscitation efforts by the G-20 IMF, WTO, and other institutions, he shows that, thanks to the efforts of central bankers and other policymakers, the international response was sufficiently coordinated to prevent the crisis from becoming a full-fledged depression. Yet the narrative about the failure of multilateral economic institutions persists, both because the Great Recession affected powerful nations whose governments managed their own economies poorly, and because the most influential policy analysts who write the books and articles on the crisis hail from those nations. Nevertheless, Drezner argues, while it's true that the global economy is still fragile, these institutions survived the "stress test" of the financial crisis, and may have even become more resilient and valuable in the process. Bucking the conventional wisdom about the new "G-Zero World," Drezner rehabilitates the image of the much-maligned international institutions and demolishes some of the most dangerous myths about the financial crisis. *The System Worked* is a vital contribution to our understanding of an area where the stakes could not be higher.

Why and how did Islam become such a political force in so many Muslim-majority countries? In this book, Jocelyne Cesari investigates the relationship between modernization, politics, and Islam in Muslim-majority countries such as Egypt, Iraq, Pakistan, Tunisia, and Turkey - countries that were founded by secular rulers and have since undergone secularized politics. Cesari argues that nation-building processes in these states have not created liberal democracies in the Western mold, but have instead spurred the politicization of Islam by turning it into a modern national ideology. Looking closely at examples of Islamic dominance in political modernization, this study provides a unique overview of the historical and political developments from the end of World War II to the Arab Spring that have made Islam the dominant force in the construction of the modern states, and discusses Islam's impact on emerging democracies in the contemporary Middle East. This study explores Iranian influence in Afghanistan and the implications for the United States after most U.S. forces depart Afghanistan in 2016. Iran has substantial economic, political, cultural, and religious leverage in Afghanistan. Although Iran will attempt to shape a post-2014 Afghanistan, Iran and the United States share core interests: to prevent the country from again becoming dominated by the Taliban and a safe haven for al Qaeda. A globalization process epitomised by historically large cross-border population movements with rapidly improving networking and communication technologies, has resulted in the growth of ethnic diversity across newly industrialised economies. Instead of adapting to a dominant, host country culture, many ethnic minorities seek to preserve their identities, both as diasporic communities and within their adopted countries. For

marketers it has been recognised as crucial to understand the unique needs of these individuals and to develop superior marketing strategies that meet their preferences. Ethnic Marketing shows the rich opportunities that ethnic minority communities have to offer, as well as offering instruction on the design and implementation of effective social and business marketing strategies. The text offers practical guidance on assessing the needs of individual ethnic communities and a guide to marketing to these communities within various countries. Since the publication of Pires' and Stanton's 2005 book there has been continuing changes in the political, social and economic environment in many countries which have growing ethnic minorities. Incorporating new research across disciplines on the marketing relevance of ethnic minorities, this book also integrates contributions and excerpts from in-depth interviews conducted with leading marketing experts, whose views and insights stimulate discussion and result in an invaluable guide to best practice in ethnic marketing across the world, plus expert insights into the future of this dynamic area. This is an excellent resource for researchers and advanced marketing students taking both postgraduate and undergraduate courses in marketing management or strategy, as well as government, marketing practitioners and businesses seeking ways to reach ethnic communities. During this event, 37 papers were presented. Taking into account the reviewers' evaluation and the papers'

presentation the best papers have been selected and collected into the present volume. The authors of 13 selected papers were invited to participate to this book and provided a more detailed and improved version of the conference paper. To enrich the book, three more chapters have been included from specialists on time-delay systems who presented their work during the 52nd IEEE Conference on Decision and Control, which held in December 10 - 13, 2013, at Florence, Italy. The content of the book is divided into four main parts as follows: Modeling, Stability analysis, Stabilization and control, and Input-delay systems. Focusing on various topics of time-delay systems, this book will be interesting for researchers and graduate students working on control and system theory. Includes various departmental reports and reports of commissions. Cf. Gregory. Serial publications of foreign governments, 1815-1931. Sean Scully, one of the most important abstract artists of our time, allows conflict to be carried out in his works?conflict between structure and emotion, body and spirit, impulsivity and reflection. The Irish-American painter has been reinterpreting abstract art since the 1960s, not as a purely formal exploration of color, form, planes, structure, body, and light, but as a medium whose means of expression is tied to external and internal moods, literary influences, and physical experiences. Scully has articulated this attitude in many lectures, interviews, and texts, which comprise the starting point for the exhibition 'Vita Duplex'. With more than one hundred illustrations, the eponymous catalogue provides a comprehensive look at the artist?s visual oeuvre, as well as his world of ideas, and defines its place in the history of abstract painting.
