These often overlooked cars are now entering classic and collectible status. This is your resource guide of exterior and interior views with hundreds of images (front, back, profiles, interiors, dashes, seats and a few cut-a-ways), and quotes and specs from the brochures. Includes cars from 1980-1989 from these manufacturers: Ford, Lincoln, Mercury and Merkur. A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and

tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z. DeLorean's Pontiac GTO, Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, *Engines of Change* is an entirely edifying new way to look at the American story. Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 29. Chapters: Mercury Sable, Ford Taurus SHO, Ford SHO V6 engine, List of Ford Taurus models, Ford Five Hundred, Ford Taurus X, Ford SHO V8 engine. Excerpt: The Mercury Sable is a mid-size (model years 1986-2005) or full-size (2008-2009) upscale sedan car model created by the Ford Motor Company and sold under the Mercury brand. It served as a rebadged variant of the Ford Taurus, with a few cosmetic changes. The Sable was a milestone design for both Mercury and the entire American automotive industry, as well as a very influential vehicle in the marketplace, with Mercury assembling 2,112,374 cars during its first 20 years of production through 2005. The Sable's design was so futuristic, that it was called by the press "The car that came from the moon." An important feature of the Sable's design was its front "lightbar," a low-wattage lamp between the front headlamps. This later became mainstream for Mercury's line-up, and was copied by many automakers in the early nineties. The Sable was refreshed in 1992 and received its first complete redesign in 1996. The 1996 model remained the basis for the vehicle up through the 2005 model year. A major sheet metal and interior redesign occurred in 2000, softening some of the controversial design vestiges of the 1996 model which the Taurus also endured. Minor styling changes in 2004 further refined the car. The Sable station wagon ended production in 2004 and sedan production ended on April 29, 2005. The Ford Taurus remained in production through the 2007 model year, primarily for service as a fleet vehicle. Taurus production ended on October 27, 2006. At the Chicago Auto Show on February 7, 2007, Ford CEO Alan Mulally unveiled a refreshed version of the Mercury Montego sedan and announced that the new name of the car would be "Sable," due to customer recognition and dealer demand.... This astonishing journey into the belly of one of our most important industries, a portrait of the energy and ingenuity of America at work, follows the 1996 Ford Taurus from its conception to its public debut. Inside this manual the reader will learn to do routine maintenance, tune-up procedures, engine repair, along with aspects of your car such as cooling and heating, air conditioning, fuel and exhaust, emissions control, ignition, brakes, suspension and steering, electrical systems, wiring diagrams. Covers all models 1996 through 2001. Taurus is an inside story of Detroit and the car that saved Ford from extinction. It is also a chronicle of the conflicts, politics and personalities of America's most fabled industry and a look at how and why that industry stumbled--and very nearly fell. 20 photographs. A behind-the-scenes account of Ford's near disaster and spectacular comeback--the greatest turnaround ever achieved in American industry. Provides handling techniques for street driving, road racing, and autocrossing, and discusses wheels, traction, shocks, aerodynamics, and tire temperature and pressure. The Taurus is one of the best-selling cars in the U.S., but the street version bears little resemblance to the Taurus that races on Sundays. The racing Taurus is the result of Ford and NASCAR working together to create a two-door version that would comply with NASCAR rules. It is campaigned by legendary drivers such as Dale Jarrett, Mark Martin, Ricky Rudd, Jeff Burton, and 2003 series champion Matt Kenseth. This book explains in technical detail all the nuances and differences between the street version and race version, including the chassis and roll cage, the suspension, steering and brakes, the engine and drive train, engine support systems, and the interior and body. The new RaceCarTech Series of books features a level of very useful technical detail sought not only by the enthusiast, but also by the model car builder. Detailed photos and accurately scaled shots provide a resource not found anywhere else. 70 percent of plastic model kit sales in the US are cars, and the majority of those are race car models. The RaceCarTech series is a long-awaited resource for model car builders.
