The primary data for the claim of locality at LF is drawn from Hindi but English data is used in discussing the semantics of questions and relative clauses. The book takes a cross-linguistic perspective showing how the Hindi and English facts can be brought to bear on the theory of universal grammar. There are several phenomena generally thought to involve long-distance dependencies at LF, such as scope marking, long-distance list answers and correlatives. In this book they are handled by explicating novel types of local relationships that interrogative and relative clauses can enter. A more articulated semantics is shown leading to a simpler syntax. Among other issues addressed is the switch from uniqueness/maximality effects in single WH constructions to list readings in multiple WH constructions. These effects are captured by adapting the treatment of WH expressions as quantifying over functions to the cases of multiple WH questions and correlatives. List readings due to functional dependencies are systematically distinguished from those that are based on plurality. Hindi language learning text book. Description of the product: ?

This book investigates the distribution and interpretation of Covert Modality. Covert Modality is modality which we

interpret but which is not associated with any lexical item in the structure that we are interpreting. This dissertation investigates a class of environments that involves covert modality. Examples of covert modality include wh-infinitival complements, infinitival relative clauses, purpose clauses, the 'have to' construction, and the 'is to' construction (cf. 1): 1a. Tim knows [how to solve the problem]. ("Tim knows how one/he could/should solve the problem.") 1b. Jane found [a book to draw cartoons in] for Sara. ("Jane found a book for Sara one could/should draw cartoons in.") 1c. [The man to fix the sink] is here. ("The man whose purpose is to fix the sink is here.") 1d. Sue went to Torino [to buy a violin]. ("Sue went to Torino so that she could buy a violin.") 1e. Bill has to reach Philadelphia before noon. ("Bill must reach Philadelphia before noon.") 1f. Will is to leave tomorrow. ("Will is scheduled/supposed to leave tomorrow.") The interpretation of (1a-f) involves modality; however, there is no lexical item that seems to be the source of the modality. What (1a-f) have in common is that they involve infinitivals. This book addresses the following questions about covert modality: what is the source of this modality, what are its semantic properties, why are some but not all infinitival relatives modal, and why are all infinitival questions modal? The infinitival [+wh] Complementizer is identified as the source of the covert modality. The apparent variability of the force of this modality is related to the particular semantics of this Complementizer. Infinitival relatives that receive a non-modal interpretation are analyzed as being reduced relatives and thus not

involving the infinitival [+wh] Complementizer.
