Generations Of Settlers Jul 05 2020

The Sweatshop Quandary Feb 21 2022 Addresses the issue of the responsibility of U.S. corporations for the working conditions in factories in developing countries that make their merchandise. Examines the campaign in the U.S. to improve working conditions in these factories, and considers the nature and range of labour problems which need to be dealt with. Includes case studies of Guatemala, El Salvador and Indonesia which discuss the experiences of various companies (e.g. Nike, Reebok, Gap, Liz Claibourne, Starbucks) as well brief studies of seven other countries. Presents and analyses 46 codes of conducts, and looks in particular at programmes designed to eliminate child labour.

Promises Kept: John F. Kennedy's New Frontier Jan 11 2021 A counter-revisionist examination of JFK and his administration, Promises Kept presents a policy history of major domestic legislative efforts between 1961 and 1963. Bernstein focuses on administrative and congressional progress under Kennedy in civil rights, education, taxes, unemployment, Medicare, and the Peace Corps. He persuasively argues that Kennedy was indeed a successful president, showing that many of JFK's campaign promises were well on their way to enactment by the time of his assassination, even after two years of dealings with a balky and often hostile Congress, and the difficulty of working in a political system changing from conservative to liberal.

A History of Labor in the Inland Empire During the Early Frontier Period Oct 20 2021

The Scanlon Plan Mar 05 2023

The Moving Frontier May 03 2020 Originally published in 1992 and based on two theoretical approaches: the Global Commodity Chain

and the Global Production Network, this book investigates the multitude of processes, as well as diverse consequences of global integration upon industries, regions, enterprises and employees. In doing so, it draws from the experience of Western and Eastern and South-eastern Europe. These European cases are complemented with evidence from Kenya, Thailand as well as US, China, India and Mexico. The book explores multiple causes of decentralization, arguing beyond the pursuit of cheap and adaptable labour. It goes on to argue that the effects of delocalization within Europe, unlike those in the rest of the developed world, are less negative than usually portrayed. It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world.

For We are Sold, I and My People Oct 08 2020 On the basis of systematic research and personal experience, *For We Are Sold, I and My People* uncovers some of the social costs of modern production. Maria Patricia Fernandez-Kelly peels off the labels--"Made in Taiwan," "Assembled in Mexico"--and the trade names--RCA, Sony, General Motors, United Technologies, General Electric, Mattel, Chrysler, American Hospital Supply--to reveal the hidden human dimensions of present-day multinational manufacturing procedures. Focusing on Ciudad Juarez, located at the United States-Mexican border, Fernandez-Kelly examines the reality of maquiladoras, the hundreds of assembly plants that since the 1960s have been used by the Mexican government as part of its development strategy. Most maquiladoras function as subsidiaries of large U.S.-based corporations and a majority of the employees are women. Drawing from current knowledge in political economy and anthropology, this study focuses on one common denominator of the international division of labor--a growing proletariat of Third World women exploited by what some experts are calling "the global assembly line."

The Changing Nature of Work Sep 06 2020 Human impacts on the environment are largely driven by economic forces. If a more ecologically sustainable world is to be achieved, significant changes

must be made to the current growth- and consumption-dependent economic system. The Frontier Issues in Economic Thought series was designed to assist the growing number of economists and others who are responding to the need for new thinking about economics in the face of environmental and social forces that are reshaping the world. The Changing Nature of Work examines the causes and effects of the rapid transformation of the world of work. It provides concise summaries of the key writings on work and workplace issues, extending the frontiers of labor economics to include the often overlooked social and psychological dimensions of work. The book begins with a foreword by former Secretary of Labor Robert Reich that presents labor in contemporary perspective. An introductory overview provides a brief history of the changing nature of work and situates current problems in the context of longer-term developments. Following that are eight topical sections that feature three- to five-page summaries for each of the ten to twelve most important articles or book chapters on a subject. Sections cover new directions in labor economics social and psychological dimensions of work and unemployment globalization and labor new technologies and organizational change flexibility and internal labor markets new patterns of industrial relations family, gender, paid and unpaid work difference and diversity in the workplace. The book provides a roadmap for scholars on the vast and diverse literature concerning labor issues, and affords students a quick overview of that rapidly changing field. It is an important contribution to the series and is a valuable book for anyone interested in labor, as well as for students and scholars of labor economics, industrial sociology, industrial relations, social psychology, and their respective disciplines.

The Frontier Worker Apr 25 2022

Airline Labor Relations in the Global Era Sep 30 2022 Emerging from a 1993 conference on airline labor relations convened by the National Mediation Board, this volume provides a comprehensive discussion of the problems facing the airline industry, the significance of globalization, the impact of deregulation and labor relations, and

possible solutions. "The lasting contribution of this volume may be its use to historians as they try to understand what the players were thinking in the early 1990s, as the industry embarked on another era of transformation." (from the introduction) Paper edition (unseen), \$18.95. Annotation copyright by Book News, Inc., Portland, OR

The First American Frontier Jun 03 2020 In *The First American Frontier*, Wilma Dunaway challenges many assumptions about the development of preindustrial Southern Appalachia's society and economy. Drawing on data from 215 counties in nine states from 1700 to 1860, she argues that capitalist exchange and production came to the region much earlier than has been previously thought. Her innovative book is the first regional history of antebellum Southern Appalachia and the first study to apply world-systems theory to the development of the American frontier. Dunaway demonstrates that Europeans established significant trade relations with Native Americans in the southern mountains and thereby incorporated the region into the world economy as early as the seventeenth century. In addition to the much-studied fur trade, she explores various other forces of change, including government policy, absentee speculation in the region's natural resources, the emergence of towns, and the influence of local elites. Contrary to the myth of a homogeneous society composed mainly of subsistence homesteaders, Dunaway finds that many Appalachian landowners generated market surpluses by exploiting a large landless labor force, including slaves. In delineating these complexities of economy and labor in the region, Dunaway provides a perceptive critique of Appalachian exceptionalism and development.

Motherhood, Rescheduled Jun 27 2022 THE CLOCK TICKER'S REPRIEVE tells the stories of five women who freeze their eggs and chronicles how it affects their lives.

Freedom's Frontier Apr 06 2023 Most histories of the Civil War era portray the struggle over slavery as a conflict that exclusively pitted North against South, free labor against slave labor, and black against white. In *Freedom's Frontier*, Stacey L. Smith examines the battle over slavery as it unfolded on the multiracial Pacific Coast. Despite its antislavery constitution, California was home to a dizzying array of bound and semibound labor systems: African American slavery, American Indian indenture, Latino and Chinese contract labor, and a brutal sex traffic in bound Indian and Chinese women. Using untapped legislative and court records, Smith reconstructs the lives of California's unfree workers and documents the political and legal struggles over their destiny as the nation moved through the Civil War, emancipation, and Reconstruction. Smith reveals that the state's anti-Chinese movement, forged in its struggle over unfree labor, reached eastward to transform federal Reconstruction policy and national race relations for decades to come. Throughout, she illuminates the startling ways in which the contest over slavery's fate included a western struggle that encompassed diverse labor systems and workers not easily classified as free or slave, black or white.

The Scanlon Plan Jun 15 2021

Policing the Great Plains Jan 29 2020 In the late nineteenth century, the Texas Rangers and Canada's North-West Mounted Police were formed to bring the resource-rich hinterlands at either end of the Great Plains under governmental control. Native and rural peoples often found themselves squarely in the path of this westward expansion and

the law enforcement agents that led the way. Though separated by nearly two thousand miles, the Rangers and Mounties performed nearly identical functions, including subjugating Indigenous groups; dispossessing peoples of mixed ancestry; defending the property of big cattlemen; and policing industrial disputes. Yet the means by which the two forces achieved these ends sharply diverged; while the Rangers often relied on violence, the Mounties usually exercised restraint, a fact that highlights some of the fundamental differences between the U.S. and Canadian Wests. Policing the Great Plains presents the first comparative history of the two most famous constabularies in the world.

Plantation and Frontier Documents: 1649-1863 Apr 01 2020

The Pearl Frontier Jul 29 2022 Remarkable for its meticulous archival research and moving life stories, The Pearl Frontier offers a new way of imagining Australian historical connections with Indonesia. This compelling view from below of maritime mobility demonstrates how, in the colonial quest for the valuable pearl-shell, Australians came to rely on the skill and labor of Indonesian islanders, drawing them into their northern pearling trade empire. From the 1860s onward the pearl-shell industry developed alongside British colonial conquests across Australia's northern coast and prompted the Dutch to consolidate their hold over the Netherlands East Indies. Inspired by tales of pirates and priceless pearls, the pearl frontier witnessed the maritime equivalent of a gold rush; with traders, entrepreneurs, and willing workers coming from across the globe. But like so many other frontier zones it soon became notorious for its reliance on slave-like conditions for Indigenous and Indonesian workers. These allegations prompted the imposition of a strict regime of indentured labor migration that was to last for almost a century before giving way to international criticism in the era of decolonization. The Pearl Frontier invites the reader to step outside the narrow confines of national boundaries, to see seafaring peoples as a continuous population, moving and in communication in spite of the obstacles of politics, warfare, and language. Instead of the mythologies of racial purity, propagated by settler colonies and

European empires, this book dissects the social and economic life of the port cities around the Australian-Indonesian maritime zone and lays open the complex, cosmopolitan relationships which shaped their histories and their present situations. Julia Martínez and Adrian Vickers bring together their expertise on Australian and Indonesian history to challenge the isolationist view of Australia's past. This book explores how Asian migration and the struggle against the restrictive White Australia policy left a rich legacy of mixed Asian-Indigenous heritage that lives on along Australia's northern coastline. This book is an important contribution to studies of the coastal, or Pasisir, culture of Southeast Asia, that situates the local cultures in a regional context and demonstrates how Indonesian maritime peoples became part of global migration flows as indentured laborers. It offers a hitherto untold story of Indonesian diaspora in Australia and reveals a degree of Indian-Pacific interconnectedness that forces us to rethink the construction of regional boundaries and national borders.

Expanding the Frontier Nov 08 2020

Plantation and Frontier, 1649-1863 Aug 06 2020 The basis of this discipline must consist in accustoming your negroes to an absolute submission to orders; for if you suffer them to disobey in one instance, they will do so in another; and thus an independence of spirit will be acquired, that will demand repeated punishment to suppress it, and to re-establish your relaxed authority. You should, therefore, lay it down as a rule, never to suffer your commands to be disputed; and, at the same time, you should take care to give none but what are reasonable and proper; for negroes are penetrating enough into the foibles of their masters. If you have any, you should conceal them with a good opinion of your temper and judgment. -from I: "Plantation Management"

American historian ULRICH BONNELL PHILLIPS (1877-1934) made a career of studying slavery and the economics of the American South through the 19th century, and he was often criticized by his successors for his emphasis on painting slave masters and plantation owners in a positive light. But even Phillips' detractors acknowledge the valuable work he did in bringing to light the priceless original source material

from which we can better understand the period. In this two-volume work, first published in 1909, Phillips creates a portrait of the economic life of the South drawn from the details and minutiae found in legal contracts, personal letters and diaries, newspaper articles and editorials, advertisements, plantation records, court records, warrants and affidavits, public notices, city ordinances, and other hard-to-find documents. From the everyday realities of the usage of slave labor to the working conditions of poor whites to the daily routines and management of plantations, what emerges is a unique, on-the-ground perspective of the slaveholding era. Excerpts from the table of contents of Volume I: "Records of a rice plantation" "Management of scattered plantations; Georgia 1844-1849" "Diary of work on a sea-island cotton plantation" "Upland cotton methods" "Uncertainty of returns in tobacco" "Loses by disease and accidents among the slaves" "Bad seasons and slave runaways" "An overseer's testimonial" "The routine problems and policies of an efficient overseer" "Classes and conditions of white servants" "Indented labor useless on a disturbed frontier" "Convict transportation, vicissitudes"

Animal Labour Feb 04 2023 Is animal labour inherently oppressive, or can work be a source of meaning, solidarity, and social membership for animals? This challenging question drives this thought-provoking collection which explores the possibilities and complexities of animal labour as a site for interspecies justice. The book assembles an international and interdisciplinary group of scholars who carefully grapple with the many facets, implications, and entanglements of animal labour, and who, crucially, place animals at the heart of their analyses. Can animals engage in good work and have humane jobs? What kind of labour rights are appropriate for animal workers? Can animals consent to work? Would recognizing animals as workers improve their legal and political status, or simply reinforce the perception that they are beasts of burden? Can a focus on labour help to create or deepen bonds between animal advocates and other social

justice movements? While the authors present a range of views on these questions, their contributions make clear that labour must be taken seriously by everyone interested in more just and ethical multispecies futures.

The Next American Frontier Mar 01 2020 Brings together economic, social, and political analyses to formulate a program for an American revival, in terms of the nation's economy and of a more equitable life for the American people

The Fair Labor Standards Act of 1938 Jan 03 2023

The Great Frontier Dec 02 2022 A leading American historian examines the character of the frontiers of European expansion throughout the modern age, questioning a notion of frontier freedom popular since Turner. William McNeill argues that social hierarchy characterized the frontier more often than pioneer equality. As Europeans traveled to various lands, bringing new diseases to vulnerable natives, formerly isolated populations died in great numbers, creating an "open" frontier where labor was scarce. European efforts to develop frontier areas involved either a radical leveling of the hierarchies common in Europe itself or, alternatively, their sharp reinforcement by resort to slavery, serfdom, peonage, and indentured labor. Juxtaposing national and transnational experiences and illuminating the complex interchange of peoples (and illnesses) in the modern era, Professor McNeill brings the history of the United States into perspective as an example of a process that encircled the globe. His book clarifies both the experience of the global frontier and the processes that now mark the end of hundreds of year of expansion of the European center. William H. McNeill is Robert A. Millikan Distinguished Service Professor of History at the University of Chicago. His numerous books include *The Rise of the West* (Chicago); *Plagues and Peoples* (Doubleday); and *The Human Condition* (Princeton). Originally published in 1983. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these

important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Slavery in South Africa Jan 23 2022 South African slavery differs from slavery practiced in other frontier zones of European settlement in that the settlers enslaved indigenes as a supplement to and eventually as a replacement for imported slave labor. On the expanding frontier, Dutch-speaking farmers increasingly met their labor needs by conducting slave raids, arming African slave raiders, and fomenting conflict among African communities.

Labor Relations Jul 17 2021

Slavery and Frontier Mississippi, 1720-1835 May 15 2021 Historians have considered slavery and Mississippi together in academic studies, assuming that the two were, and always had been,

inextricable linked. Libby attempts to answer the hows and whys of slavery's development during the period when Mississippi was a frontier region. His findings suggest that slavery took many shapes in Mississippi before it became the institution stereotyped in so much scholarship studying the later antebellum period. -- adapted from Introduction.

Birthing Models on the Human Rights Frontier May 07 2023 This book addresses the politics of global health and social justice issues around birth, focusing on dynamic communities that have chosen to speak truth to power by reforming dysfunctional health care systems or creating new ones outside the box. The chapters present models of childbirth at extreme ends of a spectrum—from the conflict zones and disaster areas of Afghanistan, Israel, Palestine, and Indonesia, to high-risk tertiary care settings in China, Canada, Australia, and Turkey. Debunking notions about best care, the volume illustrates how human rights in health care are on a collision course with global capitalism and offers a number of specific solutions to this ever-increasing problem. This volume will be a valuable resource for scholars and students in anthropology, sociology, health, and midwifery, as well as for practitioners, policy makers, and organizations focused on birth or on social activism in any arena.
