Portnoy's Complaint Nov 01 2022 The groundbreaking novel that propelled its author to literary stardom: told in a continuous monologue from patient to psychoanalyst, Philip Roth's masterpiece draws us into the turbulent mind of one lust-ridden young Jewish bachelor named Alexander Portnoy. Portnoy's Complaint n. [after Alexander Portnoy (1933-)] A disorder in which strongly-felt ethical and altruistic impulses are perpetually warring with extreme sexual longings, often of a perverse nature. Spielvogel says: 'Acts of exhibitionism, voyeurism, fetishism, auto-eroticism and oral coitus are plentiful; as a consequence of the patient's "morality," however, neither fantasy nor act issues in genuine sexual gratification, but rather in overriding feelings of shame and the dread of retribution, particularly in the form of castration.' (Spielvogel, O. "The Puzzled Penis," Internationale Zeitschrift für Psychoanalyse, Vol. XXIV, p. 909.) It is believed by Spielvogel that many of the symptoms can be traced to the bonds obtaining in the mother-child relationship.

Embodiment in Language (II) Jun 27 2022 This book provides useful strategies for language learning, researching and the understanding of social factors that influence human behavior. It offers an account of how we use human, animal and plant fixed expressions every day and the cultural aspects hidden behind them. These fixed expressions include various linguistic vehicles, such as fruit, jokes and taboos that are related to speakers' use in the real world. The linguistic research in Mandarin Chinese, Hakka, German and English furthers our understanding of the cultural value and model of cognition embedded in life-form embodiment languages.

The Language of Riddles Jun 03 2020 For the folklorists and linguists who are serious students of what has been designated "a minor genre," the riddle is, in fact, a complex linguistic and aesthetic structure that, when subjected to systematic and scientific study, reveals a great deal about

the major human systems--such as language, culture, and art--with which it is inextricably bound up. Riddles conform to a model of communication made up of a code and an encoded message that is first transmitted and then decoded. As what Professors Pepicello and Green term "a licensed artful communication," the riddle employs quite ordinary language in conventional ways to satisfy the demands placed upon it as the art form that it is. And as an art form, the riddle is subject to constraints that are semiotic (some primary graphic, aural, or other code), aesthetic (artistic conventions that are also semiotic), and grammatical (linguistic restrictions). The riddle operates, therefore, within a cultural framework that is entirely predetermined, and represents what Pepicello and Green designate "a conventional performance." The signified of riddles is not easily defined; and indeed it is possible--perhaps even necessary--to distinguish several signata. All riddles, the authors point out, whether they are based on grammatical or metaphorical ambiguity or represent one of the transitional types they identify, are solvable within the confines of the culture in which they have been constructed and in which they are posed. But the signified of a riddle is not its answer. Nor is it an object or a situation. Rather it is the code employed by the riddle itself. Riddles are therefore metalinguistic: ways of using language to deal with language--ways of using language to gain mastery over language. W. J. Pepicello is director of humanities and social sciences in the School of Allied Health Professions at Hahnemann University in Philadelphia. Thomas A. Green is associate professor of English at Texas A&M University.

Montessori Madness Dec 30 2019 "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.
