The first Quantitative Analysis of Poker Staking Poker staking, buying poker players into tournaments or cash games in return for a share of the potential profits, is most likely as old as poker itself. Famous codebreaker Herbert Yardley recalls being staked for 200\$ in an Indiana saloon already in 1910, as told in his bestseller "The Education of a Poker Player." Even though the knowledge of playing and winning at poker increased tremendously since then, poker staking was never thoroughly analyzed until now. Sharp Staking: The Economics of Poker Tournament Staking is the first book that applies a comprehensive economic framework to poker stakes. Our book explains ... How to calculate the expected value (EV) of any stake. The difference between the nominal and real backers cut. Why many short-term stakes, including the popular stakes for a single tournament, may often be financially unfeasible. Why ultimately you should not try to maximize EV of an investment, but rather the growth rate of your capital. How to use the appendices that contain the results of more than seven billion simulations. Advice from the Pro In addition to the math, poker pro and veteran of the poker tournament circuit Alexander Fitzgerald shares his journey in the world of poker staking. From his own experience of getting backed and staking players himself, he gives a glimpse into the mindset of backers and players. From moral hazard to a first-hand account

of the biggest staking scandal at the 2009 EPT San Remo, his writings give a blunt and unapologetic look at the underbelly of the poker community that will help you avoid the downfalls that so many backers succumb to. We live in a world of both profound separation and deep longing for connection. Betz and Kimsey-House explore not only the historical and spiritual history of our disconnection and its cost to individual and societal well-being, but also provide a compelling, neuroscience-based argument for how to make the next “great turning” of human development: becoming more integrated human beings. They invite you to accompany them through a road map to integration by exploring in detail the Co-Active model, originally used by coaches, but with practical application to business, parents, teachers, and anyone with a desire to be more effective, connected, and whole. Richly illustrated with true stories of integration in action, as well as current research in neuroscience, this book provides a guide to reaching our full potential within ourselves, with each other, in groups and organizations and with society at large.

The first novel in a YA fantasy romance series featuring “vampires with bite and girls who bite back. A witty, exhilarating and fresh take on an old tale” (Kelley Armstrong). On her sixteenth birthday, Solange Drake is going to die . . . But that’s okay. As the only daughter ever born to an ancient vampire dynasty, Solange’s

sweet sixteen just means she will fully come into her own as an immortal. Unfortunately, it also means a lot of people both dead and undead are now watching her. Especially Kieran Black—a vengeful agent with an anti-vampire league who blames Solange’s family for his father’s death. Luckily, Solange has her human best friend, Lucy, who tries to help her have as normal a life as possible, despite her overprotective brothers and the politics of the undead realm. But when Solange is abducted by a power-hungry vampire queen, it will take all her friends—as well as the daring and dangerous Kieran—to rescue her before she loses her eternal life . . .

In this “action-packed” (School Library Journal) story of love, loyalty, and blood ties, Alyxandra Harvey kicks off a saga of thrills with a nail-biter—and a neck-biter—that will have readers eager to devour the rest of the series.

Hearts at Stake is the 1st book in the Drake Chronicles, which also includes Blood Feud and Out for Blood.

Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases--such as sets of teachers, staff development sessions, or clinics operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that

balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis. Renaissance ideas of honour had a profound influence on the English people who formed Shakespeare's audiences. In *When Honour's at the Stake*, first published in 1973, Norman Council describes the increasing importance of these ideas to the themes and structure of a number of Shakespeare's major plays. The validity of the most widely approved code of honour was being challenged on a variety of fronts, yet both personal standards of behaviour and public affairs were habitually understood in terms of honour. A series of tragedies are given their basic form by dramatizing the pernicious effects of man's disobedience to the various demands of honour; in *Julius Caesar*, *Troilus and Cressida*, *Hamlet*, *Othello*, and *King Lear* honour is among the principal motives of tragedy. In this way, the modern reader's comprehension of the plays can be greatly enhanced by reference to Elizabethan honour codes. Today's world requires men and women who can lead from their vision, their passion, and their deepest sense of purpose. These new leaders respect the preciousness of life. They know how to call forth the resourcefulness and creativity of those they lead. They

hold a deep belief in their own capacity to change their world for the better. In *The Stake*, a step-by-step account of how these leaders are created, the founder of an international leadership training program has teamed up with an award-winning mystery writer. The result is a compelling, readable book about the development of authentic, responsible leaders.

In 1706 19-year-old Mary Channing was convicted of poisoning her husband and became the last woman to be burned at the stake in Dorset. Despite her impressive attempts to defend herself, the jury had taken only half an hour to find her guilty. Yet on pronouncement of the death sentence, Mary 'pleaded her belly' and thus postponed her execution until after she had given birth to her child in gaol. When the day finally arrived, her execution was made into something of a county fair, with 10,000 spectators gathering to view the barbaric ordeal upon the floor of Dorchester's ancient Roman amphitheater, Maumbury Rings. Although the law extended an act of clemency allowing for Mary to be strangled to death before the fires were lit, there is evidence to suggest that she was, in fact, still alive when consigned to the flames. After the gory spectacle was complete, it was said 'not one of those 10,000 people ever cared particularly for hot roast after that.' More than 300 years after her dramatic demise, Mary's fate still holds a macabre fascination, as it did for Thomas Hardy, who recorded

some of the grislier details of her execution in his notebooks and used her as the inspiration for his poem, 'The Mock Wife'. Yet while Mary Channing has been granted a kind of grim celebrity, as well as an established place in the annals of female murderers, a measure of compelling sympathy for her case is nonetheless another lasting aspect of her legacy. In spite of the inquest findings, Doc and Rocky were certain that Cran was murdered --- but was it necessary that they lose other friends also? And could Gerty forgive?

The First Management Classic of the New Millennium! A bold experiment is taking place these days, as leading-edge companies turn upside down the management paradigm that has dominated corporate thinking for more than one hundred years. Southwest Airlines is perhaps the most visible practitioner, soaring through economic downturns while its competitors slash their budgets and order massive layoffs, but you can find other pioneers of the new approach in almost every industry and market niche. Their secret: a culture of ownership that allows them to tap into the most underutilized resource in business today—namely, the enthusiasm, intelligence, and creativity of working people everywhere. No one knows more about building a culture of ownership than CEO Jack Stack, who's been working on one for the past twenty years with his colleagues at SRC Holdings Corporation (formerly Springfield ReManufacturing

Corporation). Along the way, they've turned their company into what Business Week has called a "management Mecca," attracting thousands of people representing hundreds of businesses to SRC's home in Springfield, Missouri. There the visitors learn how to incorporate the ideals and values of SRC's remarkable corporate culture into their own organizations—and then they go back and do it. Now, in *A Stake in the Outcome*, Stack offers a master class on creating a culture of ownership, presenting the hard-won lessons of his own twenty-year journey and explaining what it really takes to build for long-term success. The pioneer of "open-book management" (described in the best-selling classic *The Great Game of Business*), Stack and twelve other managers began their journey in 1982, when they purchased their factory from its struggling parent company. SRC grew 15 percent a year, while adding almost a thousand new jobs, and the company's stock price rocketed from 10 cents to \$81.60 per share. In the process, Stack discovered that long-term success required constant innovation—and that building a culture of ownership involved much more than paying bonuses, handing out stock options, or setting up an employee stock ownership plan. In a successful ownership culture, every employee had to take the fate of the company as personally as an individual owner would. Achieving that level of commitment was extraordinarily difficult, but

Stack realized that the payoff would be enormous: a company that was consistently able to outperform the market. A Stake in the Outcome isn't about theory—it's about practice. Stack draws from his own successes and failures at SRC to show how any company can teach its employees to think and act like owners, including how to implement an effective equity-sharing program, how to promote continuous learning at every level of the organization, how to fire up employees' competitive juices, how to broaden the concept of leadership and delegate responsibility for the business, and how to build a workforce that is fast on its feet and ready to take advantage of every opportunity. You'll also learn about other companies that have succeeded in building cultures of ownership—and the lessons they can teach the rest of us. Written in Jack Stack's straightforward, witty, no-beating-around-the-bush style, A Stake in the Outcome is like having a one-on-one session with a master entrepreneur and business innovator. It shows managers and executives of companies both large and small how to build a ferociously motivated workforce that is energized and committed to meeting and overcoming the most daunting challenges a company can face.

Typescript of a transcription of the meeting minutes of the Parowan Stake. The item was originally penned in the "Deseret Alphabet" and was transcribed into English script. The item documents the administration of the

stake including matters of theology, Mormon Church practices, and membership problems. Also included is an explanation of the "Deseret Alphabet" and how difficulties with the transcription were resolved. This book examines the varied competences of the European Union (EU) in relation to its capacity to externalize its policy preferences. Specifically, it explores the continued resilience within the EU's policy toolbox of supranational modes of governance beyond the State. The book first situates European experiences of supranationality in relations to the wide variety of regional and global modes of governance it comes into contact with when seeking to deal with an increasingly complex and fragmented international environment. Over the course of its subsequent sections, the book analyses the resilience, flexibility and adaptability of the EU's supranational practices across a significant cross-section of policy fields, for example, Area Freedom of Justice, Justice and Security; Socio-economic Governance; or Trade Policies. Overall, these chapters unpack the impact of the EU's internal institutional complexity on the EU's external capacity to export its preferences in an increasingly fragmented international environment. This in turn, sees the book also question whether the EU has the institutional tools to guarantee and implement consistency between its internal and external policies. This book will be of key interest to

scholars and students of EU politics/studies and more broadly to International relations, International/EU Law, comparative regionalism, international political economy, security studies, international law. This book provides invaluable guidance for thinking through and planning a qualitative study. Rather than offering recipes for specific techniques, master storyteller Robert Stake stimulates readers to discover "how things work" in organizations, programs, communities, and other systems. Topics range from identifying a research question to selecting methods, gathering data, interpreting and analyzing the results, and producing a well-thought-through written report. In-depth examples from actual studies emphasize the role of the researcher as instrument and interpreter, while boxed vignettes and learning projects encourage self-reflection and critical thinking. Other useful pedagogical features include quick-reference tables and charts, sample project management forms, and an end-of-book glossary. After reading this book, doctoral students and novice qualitative researchers will be able to plan a study from beginning to end. "A Stake in the Land" by Peter A. Speek. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition

has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. Erin is very sad elephant. She only has one wish and only her friends can help make that wish come true. Find out how Erin learns to believe in herself and become courageous enough to do what her heart desires. "The story of The Elephant and the Stake contributes to the positive changes which are gaining momentum upon this planet. How? Because the underlying message is about empowering ourselves, in order to follow our heart's desires. This is a priceless gift that one can give a child."

--Reuben Lowe, Mindful Creation A true story of crime and punishment in eighteenth-century England, and the first trial in recorded history to employ forensic evidence. In 1706, nineteen-year-old Mary Channing was convicted of poisoning her husband and became the last woman to be burned at the stake in Dorset. Despite the likely culpability of her lover, and her impressive attempts to defend herself, the jury took only half an hour to find her guilty, having accepted the groundbreaking toxicological evidence by prosecutors. When the day finally arrived, Mary's execution was made into something of a county fair, with ten thousand spectators gathering to see the young mother consigned to the flames upon the floor of Dorchester's ancient

Roman amphitheater, Maumbury Rings. More than three hundred years after her barbaric demise, Mary's fate still holds a macabre fascination, as it did then for author Thomas Hardy, for whom it became an obsession. Hardy recorded the details of Mary's execution in his notebooks, expressed doubt of her guilt, and used her as the inspiration for his poem, "The Mock Wife". Yet while Mary Channing has been granted a kind of grim celebrity, as well as an established place in the annals of female murderers, a measure of compelling sympathy for her case is another lasting aspect of her legacy is this "dramatic and fascinating" chronicle of a woman accused (Ripperologist Magazine). The book examines and annotates an actual case study to demonstrate to readers how to resolve some of the major issues of case study research, for example : how the case is selected, how to generalize what is learned from one case to another, and how to interpret data. Other topics covered include : differences between quantitative and qualitative approaches, data-gathering including document review, coding, sorting and pattern analysis, the roles of the researcher, triangulation and reporting a case study. Stake is a modern-day vampire tale that follows the exploits of a teenage vampire hunter who missed growing up when vampires stole her formative years. Now, with the help of her ancient vampire mentor, she hunts those same vampires while sharing her life on

social media. Stake is a coming-of-age story featuring LGBTQ+ characters about a teenager who missed growing up when her new enemies stole her childhood. When vampires announced their presence to the world by live streaming the murder of her friend Brock, Angel's life changed forever. Three years later, she goes by the Internet moniker STAKE while she documents her quest to track down the vampires who killed one friend and sent another into a catatonic state. With the help of her ancient vampire mentor Jessamy, Angel does it LIVE and unfiltered. New York Times bestselling author Laura Childs presents the best way to start your day—with a hearty breakfast and a side of hard-boiled murder.

Suzanne, Toni, and Petra found a second life after losing their husbands—opening their own successful business, the Cackleberry Club café. But the three women never expected sleuthing to be the special of the day... **A KILLER HAS THE TOWN WALKING ON EGG SHELLS** When a snowmobile crashes into the woods behind the Cackleberry Club café, Suzanne finds her town's most-hated banker beheaded by a wire staked in the snow. Now some of her best customers are prime suspects with a bushel of motives, and the murder investigation is snowballing. An elusive young runaway may be the Cackleberry Club's only way to crack the case...provided Suzanne can keep her head long enough to track down the cold-blooded killer. The book begins with the main

strategic choices an evaluator needs to make between approaches: quantitatively, by explicating criteria, needs, standards, and performances, or qualitatively, by studying the activity, aspirations, problems, and accomplishments of the participants and critical observers. After reading the text, students will have a better appreciation of evaluation as a process that needs to be custom-fit to the situation. Throughout the book, Stake presents evaluation as a series of choices for the reader: - To remain independent or to join with program staff or stakeholders - To value personal experience as evidence or to shun it as biased - To aid development formatively or to assess the existing program summatively - To use issues, goals, gains, efficiency, or problem solving as the key conceptual structure - To invest small or large in trying out and validating data-gathering procedures - To support the standards and ethical codes of professional associations

Still reeling from having lost her chance to become a vampire, sixteen-year-old Rayne learns that she is destined to be the new Vampire Slayer and must go undercover to stop a maniacal member of the undead who seeks vengeance and power by spreading a fatal blood disease.

A book of poetry by Charles Valle

The new book from one of TIME's 2021 most influential people

Author was in Forbes 30 Under 30 Hall of Fame "A crucial contribution to development of a new technology

that will impact all of our lives.” –Laura Shin, host of the Unchained podcast and author of *The Cryptopians: Idealism, Greed, Lies, and the Making of the First Big Cryptocurrency Craze* “Vitalik Buterin is one of the most influential creators of our generation....Like most of his work, it is sure to become a must-read.”–Camila Russo, author of *The Infinite Machine*, founder of The Defiant

The ideas behind Ethereum in the words of its founder, describing a radical vision for more than a digital currency—reinventing organizations, economics, and democracy itself in the age of the internet. When he was only nineteen years old, in late 2013, Vitalik Buterin published a visionary paper outlining the ideas behind what would become Ethereum. He proposed to take what Bitcoin did for currency—replace government and corporate power with power shared among users—and apply it to everyday apps, organizations, and society as a whole. Now, less than a decade later, Ethereum is the second-most-valuable cryptocurrency and serves as the foundation for the weird new world of NFT artworks, virtual real estate in the metaverse, and decentralized autonomous organizations. The essays in *Proof of Stake* have guided Ethereum’s community of radicals and builders. Here for the first time they are collected from across the internet for new readers. They reveal Buterin as a lively, creative thinker, relentlessly curious and adventuresome in exploring the consequences of his

invention. His writing stands in contrast to the hype that so often accompanies crypto in the public imagination. He presents it instead as a fascinating set of social, economic, and political possibilities, opening a window into a conversation that far more of us could be having. Media scholar Nathan Schneider provides introductions and notes. Meandering between desert sands and skyscrapers, between past, present, and alternate timelines, "She Nailed a Stake Through His Head" is a gallery of horrors inspired by the most nightmarish images of Near Eastern cultures. Excerpt from *The Stake: A Story of the New England Coast* In the distance lie isolated masses of rock, which seem to have moved out from the shore, like scouts, to receive the first shock of attack from their eternal foe: the Sentinel, the Hound, the Jaw-bone, each has its name, famous in many local traditions. Woe betide the mariner who attempts to sail these seas, unless he know well the many perils of rock and shoal which beset his course at every turn. Indeed, few venture in these waters, save the handful of fishermen, who, for generations, from father to son, have sailed in and out of the cove, and followed these invisible pathways, guided by that same instinct which enables a landsman to walk fearlessly in the dark through the familiar passages of his dwelling-place. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find
