The editor of "Practical Sailor" newsletter offers a highly readable and affectionate account of the fiberglass boat, from its earliest incarnation in World War II to the present day. 310 illustrations. "Describ[es] the Type VII and its place in the history of warfare . . . probably the finest book on German submarines of WWII available in print."—Firetrench First conceived in the mid-1930s, the Type VII was still in production in the closing stages of the Second World War a decade later. Subject to continuous improvement through six major variants and with around 650 completed, it was built in larger numbers than any other submarine design in history. It formed the backbone of the Kriegsmarine's campaign against merchant shipping for the whole of the war, and in terms of tonnage sunk was by far the most successful U-boat type. This encyclopedic work combines a technical description of the type in all its variations with a history of its development and an overview of its most significant operations—especially those convoy battles that were to have a crucial impact on the evolution of the design and its equipment. A particular attraction of the book is the comprehensive visual coverage—photographs of virtually every aspect of design, construction, fittings and shipboard life; highly detailed general arrangement plans and close-up scale drawings; and, with modelmakers in mind, a stunning collection of full-color three-dimensional illustrations of every external feature and variant of the boats. There have been many books on U-boats reflecting an enduring public interest so any new offering has to be special. With its unique concentration of information and illustrative reference, Type VII is unrivalled. "A comprehensive history of the Kriegsmarine's most potent weapon . . . includes detailed modelmakers' plans together with over 320 photographs."—Maritime Advisor This book is about fixing up old boats made of wood. For many people, a boat isn't a boat unless it's made of wood. The psychological and philosophical reasons for needing to own a boat made from honest trees instead of the material that L. Francis Herreshoff characterized as "frozen snot" needn't concern us. But in this day and age, hard-nosed economics and the ubiquitous bottom line certainly should. FACT: You can buy a repairable wooden boat and renovate and remodel it for a lot less money than you can buy and renovate a plastic or metal of similar size and condition. Jim Trefethen has renovated dozens of good old wooden boats, and in this book he's sharing his collected wisdom, craftsmanship, and penury with you. It will supply you with the basic skills you'll need to successfully renovate an old wooden boat--any old wooden boat, from a 16-foot canoe to a 50-foot cruiser, and everything in between--provided the boat actually is repairable (and you'll learn how to determine that, too). After you've read *Wooden Boat Renovation*, we hope you come away knowing what is possible and how to accomplish it. Then we hope you actually do it. In 1977, with a \$20,000

investment and a speedy, garage-built sailboat, brothers Rod and Bob Johnstone launched the company that today dominates the performance-oriented sailboat market. The J/24, the boat based on Rod Johnstone's first homebuilt vessel, has become the world's most popular recreational offshore keelboat. The J/Boats brand has earned renown not just for performance but also for comfort and day sailing suitability. Want to learn exactly how to get started on that Boat Charter Holiday and learn what the pros do? Discover The Secrets For A Successful Boat Charter Holiday That Teach You How to Have Fun Safely Every Time...Even As A Beginner! Just Follow The Instructions And You'll Be Having the Best Fun In No Time! Are you ready to get started on your holiday of a lifetime? Yes? Then let's get started! All too often a budding holidaymaker will boot up the computer, book the first holiday accommodation they see online, pack their bags and head right out for a week or weekend of outdoor fun. Sadly, the experience can be less than positive and they arrive home grumpy and disappointed with their holiday because it was the same boring old thing. The luggage ends up in the cupboard and the dream of an enjoyable holiday that is different disappears. Another scenario that occurs frequently is going on a boating holiday with a buddy or acquaintance presenting himself as a self-proclaimed "expert" at having fun. You know the type. He knows it all and proceeds to let you know everything you are doing "wrong." Before you know it you have connected the less-than-fun experience with the jerk and you let the whole experience fade into oblivion never willing to try it again. It doesn't have to be like that. You can learn the basics of boating holidays and take it to whatever destination you desire. You can do it with your own copy of "Boat Charter Holidays." "Boat Charter Holidays" gives you everything you need to get started. Not only will you learn how to select the right boat for your needs, you will learn also learn how to have the most fun and the safest holiday ever. Here's more: Are You Physically Prepared for the Boating Experience? Although it is a very delightful activity, you have to stay physically fit for the challenges at hand in some boats - but with others this is not important. Water Safety Regulations: The use and possession of a boat is regulated for the safety and interest of the public, as well as the preservation of life. Sailors will be subject to municipal, federal and state boating regulations. Learn more inside. Different Types of Boating Holidays: Some people imagine all boating holidays to be the same - lazing on the deck of a million dollar yacht. But there are more opportunities than that - and you don't have to be a millionaire. All About Boats. There are several different kinds of boats, each with its unique advantages and disadvantages. Some kinds of boating holidays are better suited to certain people, depending on what you are trying to achieve. We want "Boat Charter Holidays" to be an absolute 100% no-brainer for you. That's why you can order your copy with complete peace of mind. You know that you are acquiring knowledge that can give you pleasure for years. We guarantee it! Learn to live and lead with enthusiasm and optimism, impact your team, and transform your culture In Row the Boat, Minnesota Golden Gophers Head Coach P.J. Fleck and bestselling author Jon Gordon deliver an inspiring message about what you can achieve when you approach life with a never-give-up philosophy. The book shows you how to choose enthusiasm and optimism as your guiding lights instead of being defined by circumstances and events outside of your control. Discover how to put the three key components of row the boat into practice in your life: The Oar: The energy. Only you can dictate whether your oar is in the water or whether you take it out and decide not to use it. The Boat: The sacrifice. The more you give, serve, and make your life about helping others, the better and more fulfilled your life will be, and the bigger your boat gets. The Compass: The direction. The vision you have for your life and the people you surround yourself with help create the dream of where you want to go. Perfect for athletes, coaches, business leaders, and anyone else who hopes to squeeze a little more enjoyment and productivity out of life, Row the Boat will propel leaders, teams, and organizations to greater heights than they have ever reached before. With its winning mix of gripping narrative and easy-to-implement performance-raising tips, this book has become a best-selling classic. It's garnered 5-star reviews and wide-ranging endorsements - from Sebastian Coe and Dame Kelly Holmes to Lord Digby Jones. The book tells the inspiring story of how Ben Hunt-Davis - an ordinary guy in an ordinary team - achieved something pretty extraordinary: Olympic Gold. Co-author Harriet Beveridge, Executive Coach, then gives

a simple, engaging account of how we can apply these strategies to raise our own game... in sport, in business and in life. Building on the huge success of the original, this second edition includes two completely new chapters - on high performance conversations and performance under pressure - as well as a general update, based on the successes readers and businesses have reaped from the first edition. In the book's signature, down to earth and practical style, the new chapters unlock simple ways for readers to thrive in their own pressured environments, and to communicate in ways which consistently improve results. Whether you are a business leader looking to achieve a compelling vision, an individual with a dream, or a coach supporting others to unlock their potential...this book is jam-packed with tried and tested methods to help you achieve your own 'gold medal'. BEFORE taking up the construction of any of the model power boats described in this book, it will be well for the young boat-builder to become acquainted with such terms as buoyancy, displacement, center of gravity, etc. Knowledge of these subjects is more or less necessary if successful boats are to be made. Aside from this, they are terms that every boy who claims an interest in boats should understand. How to buy a sailboat (Revised in 2018) So you've decided to buy your first boat. Congratulations! Two third of the earth's surface is covered by water, which means you'll soon be able to visit many more places with your new boat than with your car. You're about to discover how to successfully buy a sailboat and how to avoid many common, costly mistakes. The biggest reason that many people never become boat owners is not because of the cost involved but, rather, because of fear of the unknown. They fear that they will make a mistake, buy the wrong boat, pay too much, end up having an accident, or will simply be overwhelmed with boat maintenance or some other imagined problem. Samuel Barrington shares his sailboat buying experience, giving the reader a detailed step-by-step guide, ensuring no questions remain unanswered. Here Is A Preview Of What You'll Learn... How to select the right sailboat How to do thorough research Inspecting a sailboat The purchase process Much, much more! Purchase your copy today! Take action today and save thousands of dollars in costly boat buying mistakes by purchasing this book for a limited time for only \$7.99! Tags: boating, sailboat, boating books, sailboat buying, boat buying, how to buy a sailboat, avoid boat buying mistakes, boat buying process, sailboat purchase, boat purchase, how to purchase a sailboat Those suffering the merest hint of desire to go seafaring in their own boat will learn from these heart-breaking examples just what can go wrong,Read the secrets of successfully leaving a mooring with topsides unmarked, happening miraculously upon your destination, and then, for the pièce de resistance, dropping anchor with aplomb. Inevitable binocular watchers will murmur appreciatively and even your crew will be impressed. Perfect.For the cognoscenti, those who know all, this fine book can be used for everything from a chock for a deck-stepped mast, a wedge for propping open a broken hatch, to slapping a wayward crew member into shape. So, buy it anyway. The tales of the mess some fools get into will give you a good laugh while leaving you, dare we say it, feeling a trifle smug. This book is best enjoyed with a pinch of salt, four parts gin, one-part dry vermouth. Shaken, not stirred.Any profits from the sale of this publication, claims the author, go directly towards the purchase of his next boat. A chance sailing trip with a friend from work led me to wonder if I could learn to sail. After all, I'm a woman, and the sailing world seems to favor men. I am not athletic; I didn't grow up in a family where we learned about boating; I would be starting late, since I was in my thirties; and I suffer from seasickness. What I discovered over the next twenty-five years is that I could indeed learn to be a competent sailor. But I didn't expect to be an expert overnight. Instead, as a novice, I layered on new knowledge slowly, over time, through experiential learning. This book describes the process whereby this happened. Using examples from trips along the coast of Maine, New Hampshire, and Massachusetts, it reviews the essential knowledge needed to be a sailor as well as explanations about the parts of a sailboat, major boat systems, and tasks associated with maintaining a sailboat. It also discusses some Zen-like attitudes that lead to successful and fun sailing, such as focusing, the no-blame rule, and stripping down to the essentials. Unlike some other sailing guides, this book points out that sailing can be a lifestyle that includes many dimensions. It's not just about getting a boat to sail. Traveling by boat is a unique experience, and visiting small coastal New England communities is an

adventure. Learning about history, art, ecology, star constellations, technology, and birds are only a few of the kinds of activities that can be built into a rich and rewarding sailing experience. This book will be helpful for people who would like to learn to sail but who are intimidated by the process, particularly women, fledgling sailors just starting out, and families with children. Three Men and Their Boat is a sweet yet realistic tale about friends who work hard and play hard together in the tropics. They dream about what selling their fish will bring. They sail their boat called The Three Amigos (Friends) looking for fish. After sailing a while, they had a successful catch. And went on to shore. The amigos celebrated. There were cheers all around. They had been praying for such a catch as this. "No problem paying for Javier's school this term, thought Marco. Miguel said to himself that he could get the one vehicle repaired and get all the groceries on the list. "Bernardo, who was the youngest of the three, could see a moped in the near future. May be a bright red one." What else will their load of fish pay for? Working is hard, but necessary to pay the bills. Then the worst thing happened. What will the three friends do? No boater should leave the dock without reading this unique guide to the basics of boating. Roger Siminoff's decades of experience are boiled down into valuable, even life-saving advice on safety aboard...navigation...anchoring...dinghies...maintenance... sailing at night...and heavy weather. A step-by-step instruction manual on how to build a lightweight 'environmentally-friendly' boat with recyclable resources. The boats simply fold up from ¼" thick cardboard obtaining their strength from the geometry of the component parts. The boats are 8-feet long, weigh about 25-pounds, and can accommodate a 250-pound person without risking structural damage. Each boat is constructed with 21-pieces of cardboard that are used to make 7-component parts. The 7 parts are assembled together with 'environmentally-friendly' contact cement and paper drywall tape. Once assembled the boats are sealed with an 'environmentally-friendly' water-based waterproof coating. No special tools are required and they are very simple to build. All of the materials used to build a boat are typically found at 'do-it-yourself' home improvement stores. The boats can be outfitted with 12-volt electric fishing motors, although they are typically propelled with traditional Kayak style paddles. An exploration of the reasons for the extraordinary educational success in America of the children of the Boat People From Lifeguard to Sun King is a compelling account of the life of Robert Bell, the founder of the Banana Boat sun care brand and one of America's most innovative entrepreneurs. 'Monumental!' - Bob Ross, Australian Sailing High Performance Sailing is now regarded as the bible of racing sailors and carries a string of endorsements from high achievers. Since its publication in 1984, racing yachts and dinghies have developed out of all recognition - a new high-tech breed of 'apparent wind' fast racers has claimed the water and so far no-one has applied themselves seriously to analysing what makes these boats sail fast (and what will make them faster). This is Frank Bethwaite's ground-breaking achievement in Higher Performance Sailing. By means of extensive research, and working with sailors of different racing calibre, Bethwaite analyses how to harness the apparent wind for increased speed and better position on your rivals. Higher Performance Sailing will provide the key to racing sailors' dreams. Praise for Bethwaite's High Performance Sailing: 'It represents a breakthrough...It is a book that my Olympic squad will benefit from.' Rod Carr, former British Olympic Sailing Team Manager 'Allowed only one "if only" in yacht racing, it would have been to have read Higher Performance Sailing years ago.' Bob Fisher, journalist, broadcaster and international championship winner This clear and detailed handbook on renovating boats provides step-by-step instructions on various boat fitting out techniques with helpful photo accompaniments. A comprehensive history of yacht design in New Zealand as seen by one of the country's leading designers. 298 pages in full colour with plans and drawings. This book covers a unique period in the history of yachting and boating in New Zealand that happened to coincide with Jim Young's life as a boatbuilder/ designer/ yachtsman. It was an era that saw dramatic advances in design and construction technology from what was an ancient craft, steeped in tradition, unchanged for centuries, to a time when boat builders have had to relearn the trade completely as wood has been steadily replaced by synthetics. This book lays out Jim Young's boat building career from his boyhood canoe made of roofing iron and tar to some of the most successful boat designs in New Zealand

maritime history. The life we live is a real truism of cause and effect. Consequently, to succeed we need to understand the laws that govern success, which are as pervasive on us as the physical laws of gravity. 'Sail Your Boat' argues in favor of, and identifies, universal metrics of success which 'measure' our successes in life irrespective of our individual callings. The book also brings out five imperative factors of success which are derived from the metrics. In turn, these imperative factors 'generate' the hundreds of offshoot factors that many consider as the 'fundamentals'. Success is a mindset that creates principles for an objective-driven life as well as a lifestyle that guides daily actions. To succeed, we need to: 1. Clearly understand and define success itself, 2. Understand the five imperative factors of success, 3. Know the traits and counter-traits of successful people, 4. Develop the success mindset, 5. Live the success lifestyle. The book consolidates key success issues and brings out the explicable linkage between life and success as that of a journey with various destinations. 'Sail Your Boat' will be of great value to young adults striving to make sense of the direction they are taking in life. It will also clarify various issues to senior adults and help them make necessary corrections or put things in their proper perspectives. Success is a lifestyle and a journey, and we can only live lives of success if we understand what it takes to do that. The author of "A Manual of Sail Trim" has designed a guide for the competitive racing dinghy sailor that explains the art of maneuvering. The object of the text is to provide instructions on keeping a dinghy in relation to its competitors so that it finishes the race in the lead. BEFORE taking up the construction of any of the model power boats described in this book, it will be well for the young boat-builder to become acquainted with such terms as buoyancy, displacement, center of gravity, etc. Knowledge of these subjects is more or less necessary if successful boats are to be made. Aside from this, they are terms that every boy who claims an interest in boats should understand. "How does a steel boat float?" is a question that many boys ask. The reason they usually designate a steel boat is probably because steel is so much heavier than water. But many things heavier than water can be made to float if they are in the form of a boat. Concrete, for instance, is now being used in ship construction, and this substance, when reinforced with steel rods, is very much heavier than water. This DVD instructs you how to successfully dock your twin engine boat, even in winds and currents. Forget the why's of boat docking; this book is filled with the how to's that will lead you to dock your boat successfully, even in wind and/or current. It presents the local knowledge of the authors in an easily understood, and simply implemented, 7-step process. For helmsmen/women with single-engine inboard vessels, power or sail; twin-engine inboard and outboard vessels; single-engine outboard or inboard/outboard or stern-drive vessels. This is the story of home-grown kiwi innovation and thinking that has been the force behind our highly successful boat design industry. Written on several different levels to cater for enthusiasts and 'non-sailors', key technical concepts are explained in boxes for readers unfamiliar with basic terms. With its winning mix of gripping narrative and easy-to-implement performance-raising tips, this book has become a best-selling classic. It's garnered 5-star reviews and wide-ranging endorsements - from Sebastian Coe and Dame Kelly Holmes to Lord Digby Jones Boating secrets Uncovered - "Why is it so important for you to invest in this book on boating now ... "What's really important now is not the small amount you will invest in this boating book, but how much you will lose if you don't invest! Understand that you may actually be missing out on discovering the top family boat tour guide successfully. And to show my sincerity, I'll show you something that will definitely sweeten our deal ... "Here's your unbeatable money back guarantee!" This Boat Trip ebook may be the most important book you have ever read in your life. Make no mistake,

because if you don't get the right information, you will have a lot of headaches and lose a lot of money (up to 30 times the price of this eBook, FOR SURE IN THE WORLD!)Get this great eBook titled "Boat Trips" now and discover the top guide to a complete and happy family experience! I guarantee you will enjoy the secrets of boating you will discover when you buy this great ebook!Tags: BoatingBoat rideboatboatsboatused boatsBoatingboat tradermarineswest marineRepossessed Boats for Saleboats for salefishing boatsboatingpontoon boatsmarineboatsMarinesmarine corpsboat repo's in madison alabamaboatsville used boatsseattle marinersmarine biologyboatrader.comBoat bangersboaters worldaluminum boatslund boatsused boats for salethe marineUnited States Marine CorpsUS Marinesair force navy army marinesLake Hubbard Boat DockLake Hubbard Boatingboat namesLake Hubbard Boat Rentalboat planslife is like a boattriton boat From the author of the bestselling High Performance Sailing and Higher Performance Sailing comes the first scientific analysis of what makes fast sailors fast. Eschewing the idea that luck or innate talent are the keys to success, Frank Bethwaite shows how knowledge truly is power. Making use of video cameras aligned to GPS read-outs to track the fastest racers, he meticulously analyses what winners do and how they do it, to show the rest of us how to get the best out of a racing craft. Frank Bethwaite's previous books were groundbreaking bibles that applied scientific theories to how sails and hulls interact with wind and water to influence boat speed. But whilst they applied scientific theories to boat construction, they didn't apply science to practical boat handling. This book fills that gap, and then goes further. Budding racers of all levels will welcomethis unique book as a godsend. It will inform, instruct and enable them toemploy the techniques (and timing) of the most successful racers, and make racingmore competitive for participants, and more exciting for those of us watching. After day sailing, the next step for the adventurous yachtsman or motorboater is their first open sea crossing, and for many that invariably entails crossing the English Channel. This invaluable guide walks the first timer through their first Channel crossing step by step, tackling all the aspects that have to be taken into account before embarking, as well as managing on the trip, in the order in which they will be encountered. The trip is eminently achievable given good planning, reasonably competent crew and a working knowledge of navigation, and this essential handbook shows how to apply knowledge and skills to crossing the Channel in a safe and enjoyable way - for all concerned. Aspects covered include: - Preplanning: navigation, tides, weather, timing, course setting, bolt holes, collision regs, boat preparations, etc - Provisioning for all conditions - Weather on the day - Crew briefing (safety, watches, etc) - Grab bag, flares, etc Packed with instructional photos, facts and advice, this handholding book is perfect for anyone thinking of attempting a Channel crossing, whether by sail or power. Encouraging, engaging and practical, by covering each stage in precisely the amount of detail required for the first-timer, it is like having an instructor or mentor on board. In August 1939, U-48, commanded by 'Vaddi' Schultze, took up a waiting position around England. Schultze showed himself to be a notable humanitarian: he addressed signals to Churchill giving positions of ship sinkings so that crews could be saved. By 1 August 1941 this most successful boat of World War II, had sunk 56 merchant ships one corvette. If you're looking at this book, you are probably thinking about buying your first boat. I'm not talking about a row boat or canoe or even a little sailboat, but a large enough boat to take your family and friends out on the water, probably the ocean or a large (Great) lake. And you're not certain how to go about it.Is it like buying a car? How big a boat do I need? Do I need to get a license to drive a boat? Where should I start my search? In short, what are the Rules of the Road for buying a boat?I have created a path for your successful boat purchase. I provide you a course to follow and beacons to help you stay on track. If you are anything like me, you are anxious to get away from the dock and go out for a day's sail and learn how to sail a boat even better than before. But wait, you might be forgetting the most important part of sailing: Preparation. How many times have you been out sailing and the luff on your mainsail or headsail begins to sag, or show scallops after the breeze picks up? This often means a trip to the mast to tension the halyard. But did you know you can do this without a halyard? Before you even think of casting off, you need to make sure that you go through these basic checklists in this book. Book Content Includes: Chapter 1 - Safety Equipment For

Sailing and Boating Chapter 2 - Sailing and Boating - Propeller Care Tips 101 Chapter 3 - Five Tips to Successful Sailing in Restricted Waters Chapter 4 - Cracking the Mystery of Apparent Wind Chapter 5 - How to Sail a Boat Better With the Secret of Sail Draft Control Chapter 6 - Make This Ten-Point Inspection For Worry-Free Day Sailing Chapter 7 - How to Adjust Sail Luff Tension Without a Halyard Chapter 8 - Sailing and Understanding Sails

In August 1939, U-48, commanded by 'Vaddi' Schultze, took up a waiting position around England. Schultze showed himself to be a notable humanitarian: he addressed signals to Churchill giving positions of ship sinkings so that crews could be saved. By 1 August 1941 this most successful boat of World War II, had sunk 56 merchant ships one corvette. Navigate uncharted waters with visionary and inspirational leadership After a successful career in the US Navy, retired Rear Admiral Danelle Barrett knows plenty about effective, motivational leadership, and now she's sharing it with anyone who strives to be a bold change leader. As Barrett learned in the military, strong leadership is inherently about people and behavior, not formulas and complex theory. The hallmarks of great leaders are their vision, tenacity, integrity, and thoughtful mentorship of others. Barrett imparts her experience through practical advice for leaders in any industry and the best examples she's learned from the remarkable leaders she's served with in the navy. She also includes plenty of wit via engaging "Sea Stories"—anecdotes told by sailors, chiefs, and officers, often embellished over time—that have humor, heart, and valuable lessons. Leadership is not complicated, but it is deliberate. It can be summed up in these basic principles: • Inspire and connect • Find three positives • Don't be a jerk

Becoming a fearless agent of change is particularly relevant today as we face the unprecedented and exponential pace of technological advancement, and Barrett provides you with the powerful tools you need to succeed and ride the wave of this evolution in whatever industry you work. Having your boat as a business can be a very fulfilling endeavor. Imagine having a regular reason to do what most others only do for recreation. To be a business, however, it has to be run as a business. This book's author, Capt. Rooker, and his wife Diann have a boating business based on a Gemini catamaran. They offer day sails on their boat, plus Alex provides contract captain work for other companies. Having a Business Degree and having earned a CMA -Certificate in Management Accounting, he has provided personal insights into what he feels needs to be in your Boat Business Plan. He says that, additionally, you should hire a professional tax adviser (CPA or attorney) to review your plan- before you begin the business. Included in the material are: > insights from tour captains, fishing guides, and charter operators; > a business plan outline; > excerpts from the IRS Audit Technique Guide; > over 100 questions an IRS Auditor might ask; and > a sample spreadsheet with "break even" formula. The companion book, "Boat Business Activity Log," provides a means to track business and personal activity for a vessel. When allocation of expense is needed, the Log offers a record of use. Learn the skills necessary to successfully create an accurate model boat from scratch, including structural elements, paper model renderings, hull features, and mechanical drawings. This book takes the reader through all the steps necessary to create one model boat based on the "Annie Buck," an actual Chesapeake Bay "Deadrise" workboat. Based on all readers learn here, they will be able to apply the design techniques and theories to successfully create models of other boats that appeal to them. In fact, the detailed text also explains how to read marine drawings for reference and describes the tools and techniques needed to successfully execute bulkhead and lift building theory. For inspiration, a gallery of finished models includes Coronados, cruisers, and trawlers. This book will prove its worth to modelers everywhere.

Driving down the glamorous Las Vegas Strip, Bryce Hartman is plotting revenge against his former boss, the powerful governor of Nevada. Three thousand miles away, in Washington, D.C., Peter Holden, a two-bit lobbyist, will soon be doing the same. Long silenced by Governor Logan Key, they alone suspect the dark secret he hides, one that threatens a multimillionaire Las Vegas casino baron who will stop at nothing to protect his interests. When Albert Tom, a young Paiute Indian, discovers a body in the desert, he tells his story to reporter Mike Stanton. Now Stanton must uncover a web of deceit and murder stretching from Las Vegas to Washington, two cities where power, greed and illusion are the real games of chance. Take the first steps to become certified to charter a boat anywhere in the world. Imagine having the

credentials to charter and skipper a boat in the Caribbean—or anywhere in the world. Grant Headifen and the experts at NauticEd have certified thousands of sailors for bareboat skippering in some of the most alluring seas of the world. NauticEd’s résumé-building system is accepted by yacht charter companies worldwide. Successfully Skipper a Sailboat offers everything you need to know—and with its unique, scannable QR codes providing clear instructional videos and animations, it is the next best thing to being on the water with an instructor at your side. Here is all you need to quickly learn how to confidently handle skippering and boat operations near shore with ease. NauticEd is the world’s most advanced sailing education and sailing certification program, providing sailing training from basics to advanced education through entertaining and interactive multimedia online sailing courses and an unparalleled network of global training centers. No other program in the world can offer you this. Here is what just one of NauticEd’s students had to say: “I’ve sailed for the last thirty-plus years, and have a fifty-ton master’s credential. I’m constantly learning something new or forgotten from NauticEd.” Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home. ‘The inventions, the innovations, the stories, the surprises. A combination of history, reference and entertainment - something for every seafarer and many others too.’ - Vice Admiral Sir Tim Laurence. People have been sailing for thousands of years, but we’ve come some distance from longboats and clippers. How did we arrive here? In fifty tales of inventors and innovations, Sails, Skippers and Sextants looks at the history of one of our most enjoyable pastimes, from the monarch who pioneered English yachting to the engineer who invented sailboards. The stories are sometimes inspiring, usually amusing and often intriguing - so grab your lifejacket, it’s going to be quite an adventure.
