This volume contains the unpublished writings of the late Joe Allmon, edited by his son, Warren. Joe Allmon grew up poor in Depression-era Mississippi, and became a Baptist minister like his father. But he suffered a crisis of faith as a young man, and switched careers to become a human resources executive, applying many of the counseling skills he had developed in the ministry. His life in corporate America, however, was unusual. As the writings collected here eloquently demonstrate, he was always in the process of becoming something else and expanding whatever mold he was in. Joe Allmon was a Baptist minister who became a Unitarian. He was a white southerner who became dedicated to equality of opportunity regardless of race. He was a corporate executive who unpretentiously quoted Shakespeare and the Bible, wrote poetry, and could read Greek and Hebrew. He was a Mississippian who had deep admiration for northeastern culture and Ivy-league education. He was a Republican devotee of laissez-faire who wound up proudly voting for liberal Democrats. His life was in a way dedicated constantly to struggle, to be smarter, more educated,

more cultured, never poor again, and to leave the world a slightly better place. Although he spent almost 20 very influential years living in New York, Joe was rooted in the South. His strongest memories were always of Mississippi. He was shaped by the regions complex history and sometimes contradictory qualities: poverty, beauty, cruelty, grace, religion, gentility, ignorance, tradition, conservatism, and the struggle for a better life. His life spanned and contributed to a remarkable social and cultural transformation of this region. The writings in this volume are divided into three sections. First is a selection of the scores of sermons he delivered, from his time as a divinity student at Theological Seminary to his service as a Naval chaplain. The second includes speeches Joe gave from the 1950s to the 1980s. Most of these were given as part of his job as a human resources executive, but this included not just personnel matters (such as compensation, recruiting, and training), but also serving as a general spokesperson for the company to various public audiences. Toward the end of his career, Joe was not only invited to talk as a representative of the corporation, but also as a respected commentator on business-related topics in his own right. A number of the speeches are also connected to his not-for-profit involvements, including his association for 50+ years with Unitarian-Universalism. At the end of the volume is a short section that includes a short fragment of a novel, and the small number of poems and pieces of prose. In their emphasis on individual merit and effort combined with equal opportunity and an intellectual approach to human resources, the business speeches are valuable for their own sake. What holds them together with the rest is that they all focus on a limited set of themes -- the worth of the individual (regardless of race or background), the value of work, and the power of the mind. Joe Allmon strongly believed in these three things, and he applied them to almost everything he did from his paying job to his volunteer work to his family life. The worth of the individual. For Joe, every person was inherently important and worthy of respect and being listened to, no matter what their background or point of view. He loved to talk to people, and he loved to listen. He loved to hear peoples stories, where they were coming from, why they thought what they did. He loved conversation, and the learning that he said always resulted. He thought that everyone had something interesting to say, and that you could always learn something from talking to someone, no matter who they were. The value of work. Like many of his generation, which grew up in the Great Depression, Joe knew the importance of hard work. Although his family was not among the poorest of the poor, th After breaking his leg, eleven-year-old Nate feels useless because he cannot work on the family farm in nineteenth-century Nebraska, so when his father brings

home an orphan boy to help with the chores, Nate feels even worse. Told from the point of view of a young boy, this account shows how a family "faced the 1930s head on and lived to tell the story." It is the story of growing up in southern Illinois, specifically the Marion, area during the Great Depression. But when it was first published in 1972 the book proved to be more than one writer's memories of depression-era southern Illinois. "People started writing me from all over the country," Hastings notes. "And all said much the same: 'You were writing about my family, as much as your own. That's how I remember the 1930s, too.'" As he proves time and again in this book, Hastings is a natural storyteller who can touch upon the detail that makes the tale both poignant and universal. He brings to life a period that marked every man, woman, and child who lived through it even as that national experience fades into the past. From the founders of nonprofits Water.org & WaterEquity Gary White and Matt Damon, the incredible true story of two unlikely allies on a mission to end the global water crisis for good On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water—and think nothing of it. But around the world, more than three-quarters of a billion people can't do any of that—because they have no clean water source near their homes. And 1.7 billion don't have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It's also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they've helped over 40 million people access water and/or sanitation. In *The Worth of Water*, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of launching a brand-new model with extremely high stakes: better health and greater prosperity for people all over the world. *The Worth of Water* invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors' proceeds from the sale of this book will be donated to Water.org. DIV Published on the occasion of Richard C. Levin's retirement as president of Yale University, this captivating collection of speeches and essays from the past decade reflects both his varied intellectual passions and his deep commitment to university life and

leadership. Whether discussing the economic implications of climate change or speaking to an incoming class of Yale freshmen, he argues for the vital importance of scholarship and the critical role that universities play in educating students and promoting the overall well-being of our society. This collection is a sequel to *The Work of the University*, which contained the principal writings from Levin's first decade as Yale's president, and it enunciates many of the same enduring themes: forging a strong partnership with the city of New Haven, rebuilding Yale's physical infrastructure, strengthening science and engineering, and internationalizing the university. But this companion volume also captures the essence of university leadership. In addressing topics as varied as his personal sources of inspiration, the development of Asian universities, and the university's role in promoting innovation and economic growth, Levin challenges the reader to be more engaged, more creative, more innovative, and above all, a better global citizen. Throughout, his commitment to and affection for Yale shines through. /div Through anecdotes and famous stories, this text takes an in-depth look at exactly how the circumstances of a sale influence the price a work ultimately commands. In a world of dragons, magic, and technology, a world that has been drastically changed from what we know, the weakest man alive must rise to overcome the greatest evil and discover a thousand years of mystery and secrets. Alfonso Vivyander Brockovich the third, one of the seven High Lords of Alfirea, has officially been declared dead and his life forever changed. Now he and his friends travel to Glandedale to find the one they believe can help slow down Vackzilian's onslaught. However, they are not the only ones searching for her. This book fills a gap in the literature about the social economy. of today must cater and for which questions of evaluation appear to be the most telling. -- The death of a person is a tragedy while the explosion of a lifeless galaxy is a mere firework. The moral difference is grounded in the nature of humans: humans have intrinsic worth, a worth that makes their fate really matter. This is the worth that the Australian philosopher James Franklin proposes as the foundation of ethics. In *The Worth of Persons* he explains that ethics in the usual sense of right and wrong actions, rights and virtues, and how to live a good life, is founded on something more basic that is not itself about actions, namely the worth of persons. Human moral worth arises from certain properties that distinguish humans from the rest of creation (though some animals share a lesser degree of those properties): rationality, consciousness, the ability to act for reasons, emotional structure and love, individuality. This complex package makes humans the "piece of work" of which Hamlet says, "How noble in reason, how infinite in faculty." In clear prose and deeply informed philosophical argument, *The Worth of Persons* establishes a foundation for ethics in the equal worth of persons, which makes ethics absolutely objective and immune to relativist attacks because it is based on the metaphysical truth about humans. *The Worth of Persons* will appeal to all those who feel that endless debate about ethical dilemmas, rules, and principles fails to connect with what is really important ethically, that is, what makes humans matter. Dignity Rights is the first book to explore the constitutional law of dignity around the world. In it, Erin Daly shows how dignity has come not only to define specific interests like the right to humane treatment or to earn a living wage, but also to protect the basic rights of a person to control his or her own life and to live in society with others. Daly argues that, through the right to dignity, courts are redefining what it means to be human in the modern world. As described by the courts, the scope of dignity rights marks the outer boundaries of state power, limiting state authority to meet the demands of human dignity. As a result, these cases force us to reexamine the relationship between the individual and the state and, in turn, contribute to a new and richer understanding of the role of the citizen in modern democracies. This updated edition features a new preface by the author, in which she articulates how, over the past decade, dignity rights cases have evolved to incorporate the convergence of human rights and environmental rights that we have seen at the international level and in domestic constitutions. The former MLB all-star pitcher, cancer survivor, and author of *Comeback* "seeks to inspire men to find their God-given worth and identity" (Dr. John C. Maxwell, founder, INJOY, Inc.). In Western culture, a man's worth so often hinges on his performance, career, and success. For bestselling author Dave Dravecky, worth was once defined by his career as an all-star pitcher in the Major Leagues—until he lost his arm to cancer. In this inspirational book, Dravecky speaks from a place of first-hand familiarity with loss and setbacks. Examining the traditional benchmarks men so often define themselves by—including jobs, successes, struggles, friendships, and families—Dravecky navigates a new path to self-worth based on Christian teachings, faith, and compelling personal experience. "In his loss, Dave discovered a depth of significance, security, value, and worth he had never known. Now he takes us back to the basics of God's word, helping us go beyond who we think we are to become who God says we can be . . . men of character and integrity." —Garry J. Oliver, PhD, author of *Real Men Have Feelings Too* "Dave takes on the fundamental issues of masculinity that every man worth his salt deals with. It took guts to write this book. It will take some guts to read it. But you will walk away a better man." —Steve Farrar, *Men's Leadership Ministries* "Nobody has more to say to men about manhood than Dave Dravecky. He's faced tests and trials, and passed them valiantly—so when he points to the possibilities for any of us, he's credible." —Jack W. Hayford, senior pastor, Church on the Way The Cambridge Advanced Learner's Dictionary gives the vital support which advanced students need, especially with the essential skills: reading, writing, listening and speaking. In this book Hugh Sykes Davies addresses Wordsworth's major poetry from the perspectives of language, Freud, Coleridge and the Romantic Imagination. A remarkable combination of analytic and empathic intelligence, this book should earn a place among the few essential studies of the poet. From the founder and superstar CEO of DailyWorth.com, the go-to financial site for women with more than one million subscribers, comes a fresh book that shows women how to view money as a source of personal power and freedom—and live life on their own terms. Millions of women want to create financial stability and abundance in their lives, but they don't know how. They are stuck in overwhelming confusion and guilt, driven by internalized "money stories" that have nothing to do with what is really possible. As the founder of DailyWorth.com, a financial media and education platform, Amanda Steinberg encounters these smart, ambitious women every day. With this book, she helps them face their financial situations head on and wake up to the prosperity that awaits them. *Worth It* outlines the essential financial information women need—and everything the institutions and advisors don't spell out. Steinberg gets to the bottom of why women are stressed and anxious when it comes to their finances and teaches them to stay away from strict budgeting and other harsh austerity practices. Instead, she makes money relatable, while sharing strategies she uses herself to build confidence and ease in her own financial life. Through her first-hand experiences and the stories from other women who've woken up, Steinberg's powerful and encouraging advice can help women of any age and income view money as a source of freedom and independence—and create bright financial futures. There is no more fundamental substance to life on earth than water. Three quarter of the Earth's surface is covered by either saltwater or freshwater, yet millions face a daily struggle to access enough water for survival. The effects of*

ongoing climate change have expanded the water crisis to areas previously considered water secure. This book addresses the role rainwater harvesting (rwh) can play in developing a resilient water infrastructure that will prove adaptive to climate change. The book features three sections. The first section presents the concepts underpinning a new approach to water infrastructure. The term “the worth of water” was developed to reflect the importance of the social life of water. This encompasses all human relationships with water including the social, cultural, hydrological, political, economic, technical and spiritual. A technology portfolio showcasing the worth of water from the Qanats of the ancient world to the modern Rain Cities is presented. Other concepts discussed include the circular economy of water and the concept of multiple waters for multiple users of multiple qualities. Water and its properties are a function of its peculiar molecular structure and this is illustrated in the book. Rainwater harvesting is considered by the authors as containing an inherent treatment train which functions as a complex water treatment system providing physical, chemical and biological removal mechanisms. Part two presents a new design methodology together with design templates and worked examples for the hydraulic and economic analysis of rwh systems. A state-of-the-art literature review of the potential health implications of utilizing rwh is also presented. The final section of the book discusses how rwh can play a vital role in contributing to achieving the Sustainable Development Goals and to living within the Planetary Boundaries. In this "punny" introduction to US currency, a penny, doubting her value, sets out to find her purpose at any cost. How do we place value on goods - and, importantly, why? Valuation and pricing are core issues in the market economy, but understanding of these concepts and their interrelation is weak. In response, The Worth of Goods takes a sociological approach to the perennial but timely question of what makes a product valuable. Structured in three parts, it first examines value in the broader sense - moral values and how they are formed, and the relations between economic and non-economic values - discussing such matters as the value of an oil spill, the price of a scientific paper, value in ethical consumption, and imaginative value. The second part discusses the issues surrounding valuation in aesthetic markets, specifically wine, fashion models, art, and the creative industries. The third part analyzes valuation in financial markets - credit rating agencies, stock exchange markets, and industrial production. This pioneering volume brings together leading social scientists to provide a range of theoretical tools and case studies for understanding price and the creation of value in markets within social and cultural contexts and preconditions. It is an important source for scholars in economics, sociology, anthropology, and political science interested in how markets work, and how value is established. Credit or debit? Rent or buy a house? Buy or lease a car? Take or decline the rental car insurance? Renovate the kitchen or finish the basement? Buy stocks or mutual funds? Every day we are forced to make financial decisions, but the right answers all seem to require complicated, mind-numbing research. And who has time for homework when you're paying for a

bag of Fritos at 7-11? Or filling out a payroll form on the first day of a new job? Thankfully, there's WORTH IT . . . NOT WORTH IT? WORTH IT . . . NOT WORTH IT? demystifies complex, real-world dilemmas and breaks the answers down into simple, Do This/Not That solutions. Organized around six basic topics-Getting Started, Shelter, Automotive, Investing, Family Matters, and Retirement-this handy book is the Swiss Army knife of personal finance. Popular author Dianna Booher uses 41 unforgettable vignettes of everyday situations to demonstrate the power that words have to hurt or heal. The third in Paul Selig's popular "I Am the Word" channeled literature series, this extraordinary psychological-spiritual guide addresses how to overcome low self-worth and claim our true purpose as individuals. Winner of the 2014 Nautilus Award represents "Better Books for a Better World"—the Silver Award in the category of Religion /Spirituality: Other Traditions. In his third channeled text, Paul Selig—acclaimed author of I Am the Word and The Book of Love and Creation—brings us his most practical message yet. Informing us that “you decide what you are worth,” Selig’s spiritual guides take readers through a program to understand our own inherent worth, and beat the fears that drain our inborn spiritual knowing.. Selig reveals that true understanding of our life’s purpose can be found through “service”—the practice of the thing that you most love. Readers can discover their own form of service through this powerful mantra: “I know who I am, I know what I am, I know how I serve.”
