A crime that is so well executed, with clues and evidence so scarce, that even the experts are left baffled. The Killer Book of Cold Cases takes you behind the crime scene tape and deep into the investigations of some of the most puzzling and notorious cold cases of all time from murders to kidnappings to massive bombings that were open for years before the criminal was finally brought to justice. Read about: *The New York City judge whose disappearance was so famous, his name became synonymous with cold cases * The first use of DNA to help solve a murder case that had been cold for years * The bomber who took down an entire plane of people, just to collect on his mother's insurance * The legendary bank robber D.B. Cooper * The murder of two cops in a small California town-a case that took more than 50 years to solve * The Mad Bomber, who drove New Yorkers half crazy in the fifties by planting bombs all over the city Bury yourself in these edge-of-your-seat tales, read chilling quotes, and test your crime IQ with cold-case trivia. You'll stay up wondering which criminals might still be on the loose! The debut issue of Serial Killer Quarterly, "21st Century Psychos", explores seven of the new millennium's most notorious multiple murder cases and examines how modern technological advancements and political developments are influencing the manner in which serial murder is being articulated. Dr. Katherine Ramsland examines the life and crimes of Israel Keyes - arguably the most organized and mobile serial murderer in American history. In direct contrast to Keyes's secretive slayings, the Beltway Snipers, John Muhammad and Lee Boyd Malvo, murdered random civilians in broad

daylight and openly taunted the authorities. Michael Newton - author of 265 books including the groundbreaking Encyclopedia of Serial Killers - details their three week reign of terror in his feature "Islam Will Explode". Lee Mellor's "Web of Spiders" discusses the milestone case of "Slavemaster" John Edward Robinson: the Internet's first serial killer. Other articles in "21st Century Psychos" include: "Love in the Ashes" - Arthur Ellis-award nominee Robert J. Hoshowsky takes on Sheila Labarre - an aging nymphomaniac who seduced, slaughtered, and incinerated three male victims on her New Hampshire farm, challenging our views on the nature of female serial killers forever. "The Interview" - Curtis Yateman's impressionistic look at the 2009-2010 murders committed by Canadian Airforce base commander Col. Russell Williams. "Checkmate" - The story of post-Soviet Russia's most prolific serial slaughterer, "Chessboard Killer" Alexander Pichushkin, as recounted by Grinning Man Press co-founder Aaron Elliott. "Canada's Killer Countryboy?" - Award-winning author, Kim Cresswell, sheds light on clean-cut "country boy" Cody Legebokoff, who at the age of 21 was charged with the murders of four women in western Canada. Is his guilt a certainty, or is there more to this story than meets the eye? Also read...Infamous Words, Feasts of Death and Killer Flicks: Grinning Man Reviews - Mr. Brooks. All models. A daily diary of actual interactions between a reference desk librarian and his patrons *Reference Librarianship* documents a year in the life of a young librarian working in the "trenches" at a library in the Midwestern United States. This one-of-a-kind book provides a daily diary of every librarian/patron transaction--no matter how mundane or absurd--to demonstrate not only how advances in technology have affected the reference librarian's job, but how the public's expectations have changed, as well. The book also includes observations by a now-retired reference librarian on the current state of the field based on these unedited interactions. Over the past two decades, the job of reference librarian has seen many changes. But in many ways, reference desk work hasn't changed a bit, with its mix of odd, humorous, routine, and ridiculous requests that capture what it's like to deal with patrons day after day. *Reference Librarianship* paints a clear picture of the field for library school students, provides emotional and philosophical support to practitioners, and reminds library administrators of what life was

like on the "front lines." A sampling of the daily transactions documented in Reference Librarianship: Monday, May 19, 2003: pencil pencil network down I tell people that I can't sign them up for an Internet terminal because the network is down and they just stand there, staring into space One of them asks for three days worth of newspapers microfiche machine explanation Sorry, Sir, the network is still down (multiply by twenty and insert randomly into the remainder of the day) magic tricks, but he pretty much knew where they were One of our large interior plate glass windows shattered. No one was hurt and it made a fascinating noise, like a crystal waterfall landing on soil. "Books on prostitution, you know—whores?" Someone from the County called to ask if any criminal activity had occurred on a particular street. Someone else referred her to us. She was dubious—with good reason. "Math puzzles." Okay. I show him the books. "Just math." Certainly. I show him the books. "I need them in Spanish." Grrr ... Reference Librarianship is an enlightening, educational, and entertaining look at the real world of reference desk work. It's an essential read for reference librarians (both public and academic), library administrators, and library school students, as well as anyone who works with the public. The high-water mark of the muscle car era is usually credited as 1970, and for good reason; Chevrolet was now stuffing high-powered 454 engines into Chevilles. Adding a larger displacement above the still-available 396 (402) offered buyers the option to order the most powerful production car of that era. The 1970-1972 Chevilles remain the most collectible of the model to this day. Author and historian Dale McIntosh pairs with restoration expert

Rick Nelson to provide this bible of authenticity on the legendary 1970, 1971, and 1972 Chevelle models.
