Throughout the nineteenth and early twentieth centuries, as Americans increasingly came into contact with the Islamic world, U.S. diplomatic, cultural, political, and religious beliefs about Islam began to shape their responses to world events. In *Sacred Interests*, Karine V. Walther excavates the deep history of American Islamophobia, showing how negative perceptions of Islam and Muslims shaped U.S. foreign relations from the Early Republic to the end of World War I. Beginning with the Greek War of Independence in 1821, Walther illuminates reactions to and involvement in the breakup of the Ottoman Empire, the efforts to protect Jews from Muslim authorities in Morocco, American colonial policies in the Philippines, and American attempts to aid Christians during the Armenian Genocide. Walther examines the American role in the peace negotiations after World War I, support for the Balfour Declaration, and the establishment of the mandate system in the Middle East. The result is a vital exploration of the crucial role the United States played in the Islamic world during the long nineteenth century--an interaction that shaped a historical legacy that remains with us today. Examining the situations of African Americans in the U.S.A., Lucius Outlaw's essays illustrate over twenty years of work dedicated to articulating a 'critical theory of society' that would account for issues and limiting-factors affecting African-descended peoples in the U.S. Attempting to put politics aside, Outlaw writes from a non-partisan standpoint, in the hopes that the issues he raises in his essays will inspire improvement for the well-bring of African Americans and will also strengthen America's democracy. Outlaw envisions a democratic order that is not built upon racist projections of the past. Instead, he seeks in these essays a transformative social theory that would help create a truly democratic social order. Focusing on a persistent crux of Sino-American relations, the author shows how an essentially new Taiwan has emerged in terms of political, economic, diplomatic and security developments. He explores the future prospects of the new Taiwan and analyzes its implications for US interests and policy. In *The Interest of Others* develops a new theory of organizational leadership and governance to explain why some organizations expand their scope of action in ways that do not

benefit their members directly. John Ahlquist and Margaret Levi document eighty years of such activism by the International Longshore and Warehouse Union in the United States and the Waterside Workers Federation in Australia. They systematically compare the ILWU and WWF to the Teamsters and the International Longshoremen's Association, two American transport industry labor unions that actively discouraged the pursuit of political causes unrelated to their own economic interests. Drawing on a wealth of original data, Ahlquist and Levi show how activist organizations can profoundly transform the views of members about their political efficacy and the collective actions they are willing to contemplate. They find that leaders who ask for support of projects without obvious material benefits must first demonstrate their ability to deliver the goods and services members expect. These leaders must also build governance institutions that coordinate expectations about their objectives and the behavior of members. In the Interest of Others reveals how activist labor unions expand the community of fate and provoke preferences that transcend the private interests of individual members. Ahlquist and Levi then extend this logic to other membership organizations, including religious groups, political parties, and the state itself. Clearly discusses the impact and uses of interest representation in the development of the EU system. * Examines the complexities of representation at EU level, a vital issue for potential lobbyists and interest groups * Charts new trends and issues such as enlargement, Europeanization and Central and Eastern Europe * Contributions by acknowledged experts with a proven track record of research and publication in this field, including seven current and past practitioners of EU politics with experience as lobbyists from either institutional, NGO or corporate perspectives * Places interest representation in its historical and theoretical context. American Interests and Policies in the Middle East, 1900-1939 was first published in 1963. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Scholars concerned with the diplomatic history of the United States have largely neglected the subject of American relations with the Middle East during the four decades before World War I. With this study, Professor DeNovo fills the gap by describing and assessing the United States' cultural, economic, and diplomatic relations with Turkey, Persia, and the Arab East in that period. He traces, chronologically and topically, the activities of such American interest groups as Protestant missionaries, educators, philanthropists, archaeologists, businessmen, and technical advisers, as well as the official actions of their government. The account falls roughly into three chronological periods. The first section traces the interest groups through the pre-World War I years of political and cultural stirring in the Ottoman Empire and Persia. Special attention is given to the Chester Project for railroad development in Turkey. The second part deals with the upheavals accompanying World War I and the tasks of peacemaking from the Mudros armistice through the Lausanne settlement of 1923. The latter chapters detail the rise of the Turkish national movement, the deepening Persian and Arab nationalism, and the accommodation of American cultural and economic groups to these conditions. The author points out that before World War II began, Americans had acquired a significant interest in Middle Eastern oil and had become emotionally involved in the Arab-Zionist tension. In 1939 the United States was on the verge of a new phase in its Middle Eastern relations when that region would become more intimately linked to America's national security. The book explores "what are the societal interests that may be affected by a takeover, are these protected under the current regulatory frameworks of the U.K., Germany, and China, (and if so) how are they protected and what recommendations can be made for future reforms in the three jurisdictions?" The book adopts three main methods: law and economics analysis, doctrinal legal research, and comparative analysis. The content of this book is intended not only for the academia; it may also benefit the policy makers by providing an evaluation on the strengths and weaknesses of different protection mechanisms and recommendations for future reforms. Besides, companies which are (potentially) interested in conducting takeovers in the three countries may also find this book useful with its overall analysis of the regulatory frameworks and representative takeover cases in the jurisdictions. This book addresses major theoretical issues in the fields of public

administration and comparative politics. It discusses the role which ideology played as a unifying force for at least parts of the German state bureaucracy in Wilhelmine Germany . The examination of a modernizing ideology in the German case is useful for an understanding of the political dynamics of state-led modernization and industrial strategy in many contemporary societies and the author explains political behaviour and relations in Germany in general terms that are universally relevant. Examining the situations of African Americans in the U.S.A., Lucius Outlaw's essays illustrate over twenty years of work dedicated to articulating a 'critical theory of society' that would account for issues and limiting-factors affecting African-descended peoples in the U.S. Outlaw envisions a democratic order that is not built upon racist projections of the past, but instead seeks a transformative social theory that would help create a truly democratic social order. Don't know what to do with your life? Drawn to so many things that you can't choose just one? New York Times best-selling author Barbara Sher has the answer--do EVERYTHING! With her popular career counseling sessions, motivational speeches, workshops, and television specials, Barbara Sher has become famous for her extraordinary ability to help people define and achieve their goals. What Sher has discovered is that some individuals simply cannot, and should not, decide on a single path; they are genetically wired to pursue many areas. Sher calls them "Scanners"--people whose unique type of mind does not zero in on a single interest but rather scans the horizon, eager to explore everything they see. In this groundbreaking book, you will learn: What's behind your "hit and run" obsessions When (and how) to finish what you start How to do everything you love What type of Scanner you are (and which tools you need to do your very best work) Does an airline pilot really need to surrender his tweezers at airport security when he's about to board an aircraft equipped with an axe on the back of the cockpit door Can a mobile phone really cause a major explosion at a gas station And is there really a good reason why you should be prevented from swimming in a lake more than a foot deep These rules exist, and they exist in the name of our own protection. But in this engrossing dissection of global health, safety and security regulations, authors Tracey Brown and Michael Hanlon dig a little deeper to discover the real reasons behind many of the instructions we obey without questioning their creators' motives. Their conclusions range from the startling to the staggering, and in presenting them the authors seek to empower readers to question the people and organisations who come up with them in the first place. This title will explore China's strategic interests in the South China Sea, with a specific emphasis on power projection and resource security. China's regional actions and reactions are reshaping the power dynamics in East and South-East Asia, while economic and geopolitical futures depend on the variegated outcomes of these complex relationships with neighbours and the West. An introductory section will be complemented by four case studies (Japan, Vietnam, the USA and the Philippines) and the concluding chapter will discuss the importance of the South China Sea to China as its new leadership deals with growing economic and military might. In this volume, Albert Hirschman reconstructs the intellectual climate of the seventeenth and eighteenth centuries to illuminate the intricate ideological transformation that occurred, wherein the pursuit of material interests--so long condemned as the deadly sin of avarice--was assigned the role of containing the unruly and destructive passions of man. Hirschman here offers a new interpretation for the rise of capitalism, one that emphasizes the continuities between old and

new, in contrast to the assumption of a sharp break that is a common feature of both Marxian and Weberian thinking. Among the insights presented here is the ironical finding that capitalism was originally supposed to accomplish exactly what was soon denounced as its worst feature: the repression of the passions in favor of the "harmless," if one-dimensional, interests of commercial life. To portray this lengthy ideological change as an endogenous process, Hirschman draws on the writings of a large number of thinkers, including Montesquieu, Sir James Steuart, and Adam Smith. Featuring a new afterword by Jeremy Adelman and a foreword by Amartya Sen, this Princeton Classics edition of *The Passions and the Interests* sheds light on the intricate ideological transformation from which capitalism emerged triumphant, and reaffirms Hirschman's stature as one of our most influential and provocative thinkers. Jan De Winter criticizes existing views on the integrity of science and the roles of financial, political, and other interests in science, and develops an alternative view to shed new light on cases from medical science, aerospace science, climate science, and biology. "The season's best book so far gets right to the heart of the game's survival at the organizational level." —The Boston Globe "A compelling examination of the national pastime as seen through the prism of the commissioner's office." —The Wall Street Journal "A thoughtful and objective analysis of baseball's labor and economic policy evolution. Interesting, relevant, and a good read." —Randy Levine, President of the New York Yankees and former chief labor negotiator for MLB "A tour de force. It's an incredibly interesting read that ends with a vision for the sport that is squarely on target and a clarion call to our industry." —John Henry, principal owner of the Boston Red Sox and member of the MLB Executive Committee "Those who are determined to have Selig's head on a stick will be disappointed; rational baseball fans will rejoice in this tough but fair view of a decent man in a thankless job." —John Thorn, coauthor of *Total Baseball* "This thoroughly researched book by one of the foremost authorities on sports business is an oral history of the game through the Office of the Commissioner. Zimbalist provides a fascinating look at the game's history and those who have helped shape it." —mlb.com, April 3, 2006 "The best baseball book I've read in forty years." —Mike Murphy, 670 *The Score*, Chicago "When a home business is built around an individual's interest there is also the added advantage of the individual having the necessary knowledge about the choice made that will help to steer the business exercise in the right direction. Going in blind will not be an issue, and good decisions can be made simply based on the knowledge that comes from the interest in that particular area." Read this book for more info Are we morally required to act in the interests of others? Does our worth as persons depend in any way on our valuing the good of others? These questions, illustrative of those addressed in this book, concern the relevance of other-interested considerations -- of facts about what is good or bad for others -- to the moral status of persons and their actions. Pursuing answers to such questions is not only interesting and important in its own right, but also yields valuable insights in to the nature of morality. A distinguishing feature of the book is its unusually comprehensive treatment of the moral significance of other-interested considerations per se, of how these considerations are interrelated, and of where they should be located in more general moral theory. It will be of greatest interest to individuals with fairly well-developed philosophical interests and abilities -- to teachers and advanced students of moral philosophy in particular. the growing divide between the incomes of the wealthy class and those of middle-income Americans, exonerating popular suspects to argue that the nation's political system promotes greed and under-representation. In the late 1960s, colleges and universities became deeply embroiled in issues of racial equality. To combat this, hundreds of new programs were introduced to address the needs of "high-risk" minority and low-income students. In the years since, university policies have flip-flopped between calls to address minority needs and arguments to maintain "Standard English." Today, anti-affirmative action and anti-access sentiments have put many of these high-risk programs at risk. In *Interests and Opportunities*, Steve Lamos chronicles debates over high-risk writing programs on the national level, and locally, at the University of Illinois at Urbana-Champaign. Using critical race theorist Derrick Bell's concept of "interest convergence," Lamos shows that these programs were promoted or derailed according to how and when they fit the interests of underrepresented minorities and mainstream whites (administrators and academics). He relates struggles over curriculum, pedagogy, and budget, and views their impact on policy changes and course offerings. Lamos finds that during periods of convergence, disciplinary and institutional changes do occur, albeit to suit mainstream standards. In divergent times, changes are thwarted or undone, often using the same standards. To Lamos, understanding the past dynamics of convergence and divergence is key to formulating new strategies of local action and "story-changing" that can preserve and expand race-consciousness and high-risk writing instruction, even in adverse political climates. *Vocational Interests in the Workplace* is an essential new work, tying together past literature with contemporary research to present the most comprehensive coverage on vocational interests to date. With increasing recognition of the importance of vocational interests and their relevance to the workplace, this book emphasizes the strong links between vocational interests and work behavior. It proposes new models and approaches that facilitate thorough exploration of the implications of this relationship between interests and practice. The authors, drawing on knowledge and experience from a range of professional backgrounds, cover essential topics, including: interest measurement; personnel selection; motivation and performance; expertise; meaningful work; effects of a global business environment; diversity; and the ongoing development of interests through adulthood to retirement. Endorsed by the Society for Industrial and Organizational Psychology board, this book is a valuable resource for researchers, professionals, and educators in the fields of human resources, organizational behaviour, and industrial or organizational psychology. Motivate your students by offering instructional experiences within their interest areas! Based on the idea that children learn best when they are interested in the topic, the six interest assessment tools that comprise the Interest-A-Lyzer Family of Instruments help educators identify each student's unique interests. In this manual, Dr. Joseph Renzulli discusses the importance of assessing student interests and provides suggestions for administering and interpreting these instruments in the school setting. Sample pages from each interest assessment tool are included in the appendix. Class sets of 30 instruments are sold separately.
