Homeless kids of all ages exist in every community, but few realize this. Because of their invisibility, the needs of these kids, a population of over 3 million, go largely unmet. The Charlie Book not only offers a range of ways ordinary compassionate people can help in their own communities, but it also gives background information to help understand the scope of this hidden problem. Additionally, it directs readers to existing resources. Schools districts must have a trained homeless liaison to identify and assist students experiencing homelessness. The federal McKinney-Vento Education for Homeless Children and Youth Act, reauthorized in December 2015 as part of the Every Student Succeeds Act (ESSA), specifies duties and responsibilities of these liaisons. One is to develop local resources to help the students succeed in school. "Charlie," for whom the book is named, was instrumental in passage of homeless children and youth's educational rights. Society's choice in dealing with widespread angst about income inequality, racial strife, domestic and international violence, and personal challenges could angrily tumble into an apathetic stupor or embrace compassion that spurs action. The Charlie Book: 60 Ways to Help Homeless Kids grew out of the desire to create a "compassion epidemic" that would spill out across the country to ease the suffering of millions of homeless children and youth. It was created and reviewed by people with years of experience working with homeless kids. This concise handbook will provide the know-how for adults and kids, civic organizations and faith communities, scout troops and neighborhood associations to make a viable difference in their local communities for the mostly invisible families and youth experiencing a variety of shapes of homelessness. Those involved in this book believe that good people doing good things will mitigate the apathy and anxiety that grabs headlines and shatters lives. The Charlie Book offers a simple, doable approach to providing tangible help to young people striving to get an education despite the formidable challenges they face. The antidote to apathy is action. The Charlie Book, offers simple activities that can simply change lives for the better. Become Your Own Life Coach An inspirational book of self-care. It's projected that in 50 years, one American in three will be diabetic. Many today are well on their way to becoming a sad statistic in the war on obesity, high blood sugar, and the related diseases—including diabetes—that can result from a diet that's seriously out of whack. In his previous bestselling book, Overcoming Runaway Blood Sugar, Dennis Pollock shared his personal experience with this deadly epidemic—including his success at lowering his runaway blood sugar to acceptable levels. Whether it's leading a brainstorming meeting for a staff of five or giving a keynote speech to an audience of 5000, public speaking with confidence and competency is an essential skill for success. Unfortunately, many people feel uncomfortable and even afraid when it comes to standing up and delivering a presentation. The popular comedian Jerry Seinfeld once joked that because American's fear of public speaking was on par with their fear of death, at a funeral most people would rather be in the casket than giving the eulogy. Public Speaking In An Instant shows the reader how to make all their presentations professional, polished, and painless. The book provides time-proven techniques on writing an engaging presentation, developing an interactive style, reading and responding to an audience, and making the most of visual aids. Topics include: Use body language to get your message across High energy equals high impact The power of silence Focus on the message, not the slides Be funny, not foolish The key to spontaneity: preparation Writing is not like chemical engineering. The figures of speech should not be learned the same way as the periodic table of elements. This is because figures of

speech are not about hypothetical structures in things, but about real potentialities within language and within ourselves. The "figurings" of speech reveal the apparently limitless plasticity of language itself. We are inescapably confronted with the intoxicating possibility that we can make language do for us almost anything we want. Or at least a Shakespeare can. The figures of speech help to see how he does it, and how we might. Therefore, in the chapters presented in this volume, the quotations from Shakespeare, the Bible, and other sources are not presented to exemplify the definitions. Rather, the definitions are presented to lead to the quotations. And the quotations are there to show us how to do with language what we have not done before. They are there for imitation. By the author of the multiple award-winning *The Boy in the Moon*, and *Sixty*, comes the story of a father searching for a home for his disabled son, and his conversations with Jean Vanier, one of our great moral thinkers, about the value of every human and where each of us can find our place. In 2008, Ian Brown began a correspondence with Canadian philosopher and humanitarian Jean Vanier, in which Ian asked him questions such as "What is our human value?" "Are you afraid of death?" and "How have you managed the crises in your own faith?" Jean Vanier wrote back with unfailing humility, patience and acceptance, to Ian, who was searching for answers about where his profoundly disabled son, Walker, fit in the world. This is a book for both secular readers and spiritual seekers; for people who are looking for deeper meaning, if not happiness, and ways to make sense of the world. Both Ian Brown and Jean Vanier show us how we might take risks to move beyond our comfort zones and place ourselves among other humans who are conventionally judged as "weaker" than the rest of us, and what they and we can gain by an even playing field between the "normal" and the "broken." By the time Phil Chase is elected president, the world's climate is far on its way to irreversible change. Food scarcity, housing shortages, diminishing medical care, and vanishing species are just some of the consequences. The erratic winter the Washington, D.C., area is experiencing is another grim reminder of a global weather pattern gone haywire: bone-chilling cold one day, balmy weather the next. But the president-elect remains optimistic and doesn't intend to give up without a fight. A maverick in every sense of the word, Chase starts organizing the most ambitious plan to save the world from disaster since FDR—and assembling a team of top scientists and advisers to implement it. For Charlie Quibler, this means reentering the political fray full-time and giving up full-time care of his young son, Joe. For Frank Vanderwal, hampered by a brain injury, it means trying to protect the woman he loves from a vengeful ex and a rogue "black ops" agency not even the president can control—a task for which neither Frank's work at the National Science Foundation nor his study of Tibetan Buddhism can prepare him. In a world where time is running out as quickly as its natural resources, where surveillance is almost total and freedom nearly nonexistent, the forecast for the Chase administration looks darker each passing day. For as the last—and most terrible—of natural disasters looms on the horizon, it will take a miracle to stop the clock . . . the kind of miracle that only dedicated men and women can bring about. Life is a precious gift, miraculous and amazing but we are not always able to appreciate this miracle fully. When we face obstacles and difficulties our lives can become such a struggle that we lose touch with the amazingness of it all. This little book is full of ways to bring the magic back into your life. All the techniques are simple, practical and tried and tested many times. Surveys show that people in corporations receive an average of 175 messages per day. Topping the list is e-mail, surpassing voice mail, faxes, and telephone messages as the most frequent type of message received. While e-mail is the biggest communication tool for business use, its remote nature—which eliminates tone of voice and body language—presents a huge potential for misunderstanding and misinterpretation. Many people find themselves dealing with dozens of e-mails every day whose impact has been lost in cyberspace and, as a result, frequently miss the mark.
