Some issues, Aug. 1943-Apr. 1954, are called
Radio-electronic engineering ed. (called in 1943
Radionics ed.) which include a separately paged

section: Radio-electronic engineering (varies) v.
1, no. 2-v. 22, no. 7 (issued separately Aug.
1954-May 1955). The use of coaching books
systematically deceived the American
immigration system during the years following
the Chinese Exclusion Act of 1882. Follow Jim's
life as an eight-year-old immigrant from
Taishan whose diligent memorization of false
identities, dates and places erased all memories
of his boyhood in China. After facing language
difficulties and isolation during assimilation and
education, he eventually achieves academic
success. But then he must overcome the
institutional racism of the 1950s, and reaches
the plateau of middle class America during the
Cold War. He finds himself oddly suited to the
silence and secrecy shrouding his work with the
military and NASA. But despite having lived the
American Dream, he sees the world as a
Chinese American in a racist society. Mr. Eng
completed this memoir at the age of 95. He
attributes his health, long life, and success to
his beautiful wife Lan. A history of ham radio
culture: how ham radio enthusiasts formed
identity and community through their technical
hobby, from the 1930s through the Cold War.

Kara Nkosi is a Mariner—sworn to protect those of her blood and heart, sworn to protect the sea. Generations ago, her people escaped starvation and oppression on stolen boats, only to find themselves in the midst of increasingly violent storms, rising waters, and international scorn. They were up for the challenge. Now, at the dawn of the twenty-second century, Kara's people are approached by their age-old adversary. When an ambassador from the United States begs the Mariners for help recovering a cache of unstable weapons of mass destruction, her people are naturally suspicious, but the threat of such weapons being unleashed in their waters is too great to ignore. Only, the Mariners aren't the only ones racing to recover the cache, and Kara and her shipmates find themselves pitted against powerful corporate mercenaries and hardened criminals, all in the name of helping their sworn enemy. An enemy who may not be telling them the whole truth. "In his first autobiographical tale Teenage Hobo, author Robert S. Weil shares what it was to be like to be on the road with his two other brothers (the oldest of the group was 14 years old). He

deliberately finished the story with the statement 'we arrived'. Readers would then ask him what exactly happened afterwards. So begins the rest of the story in *We Arrived*. The three brothers were reunited with their mother, a widow, and the rest of their siblings upon setting foot in Los Angeles. Adroitly weaving his stories right after their harrowing journey for 30 days between Cincinnati, Ohio and Los Angeles, California. Weil vividly recounts the events that followed thereafter in *We Arrived* from a near death experience on an alfalfa farm to hearing the horrifying news that Pearl Harbor had been bombed. In later chapters, Weil tells of the family traveling east again, having his own career, meeting his soul mate, and what it was like to survive the Second World War, with pictures."
