System Administration (SAP HANA as a Database) with SAP NetWeaver: SAP Certified Technology Associate These questions are similar to the ones asked in the actual Test. How should we know? We know, because although we have been working as an SAP Basis and Hana for many years, we have recently certified with the latest version of the Certification test. Before you start here are some Key features of the Certification Exam. This certification exam verifies that the candidate has the knowledge required in the area of System Administration with SAP HANA as a Database. This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. Candidates must also demonstrate understanding of Installation, System Administration for both AS ABAP and AS Java, Database Administration, Transport Management, System Monitoring and User Administration, among other things. The exam is Computer based and you have three hours to answer 80 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the SAP Consulting World open for you to explore. Helping you with the first step on your ladder to success is this book!
