The world has never seen such a huge business opportunity for which they have so little understanding of how to address it. Many entrepreneurs have, more or less seriously, dreamt of being able to sell just one product to every single Chinese. That dream is now quickly turning into a possibility for many hotels, restaurants, shops and attractions. As of 2012. Chinese tourists are the largest group of travellers in the world. Unfortunately, understanding of the needs that these Chinese tourists have is exceptionally poor. What do they want to eat, do or buy? Where do they want to stay, and what places do they want to visit? All these differ radically from the needs of other tourists. In this book, we will take you through what is different and why it is so. In the book, we will also offer ideas on how to easily shift your offering to match what Chinese tourists want. We will also provide plenty of examples on what others have done to attract their business -- since, naturally, many have already invested heavily to do this. So yes, competition for Chinese tourists has undoubtedly begun, but an equally vital investment for winning this fight is understanding. What do you know about their needs? INGEMAR FREDRIKSSON has

Said about the Swedish edition of this book: "This book is basically a huge checklist and a fantastic basis for those who would like to attract Chinese tourists." Monika Fleming-Glogoza, West Sweden Tourist Board Do you want to have only successful ideas, and to have them every time you desire? Join the team, since this is what everybody wants. Do you want to generate successful ideas with ease, every time you need and desire? Then you have to understand everything about ideas, you have to know how you generate ideas, how you influence and use ideas, and how you control ideas. More importantly, you have to understand how ideas integrate within your entire cognitive system and within society, since ideas are not only at the base of your achievements in life and in society, they are not only at the base of your life and society altogether, but your ideas sustain your entire cognitive system and therefore your behavior and entire life, influencing

your attitudes, modes of life, and your inner and outer interconnectivity. In this manner, you may never understand, generate, and master your ideas, if you do not understand how ideas integrate within your entire intelligence, within your entire life, within the entire society, and within this entire world. Additionally, you may understand all these only through your own ideas standing at the base of this knowledge about ideas, because you have to figure it out yourself, since no one will ever offer it to you, neither Science, nor society, not education, and not the media. And it is done this way on purpose, to keep you and your ideas out of the way. Yet as already stated, you are a living human being, and you may do anything in life, since the human mind and human nature allow it. And in this situation, you may simply undergo your normal mental models throughout reasoning, mental models always generating successful ideas, when they are pertinent and accurate enough to make a difference in life and in the world. Therefore, the easiest way to generate and control ideas in a conscious manner is through your conscious mental models. Mental models are simply a specific type of reasoning, part of your comprehensive analytical reasoning that you should be able to undergo at will, continuously throughout life. You create and perfect your entire cognitive system throughout life around mental models, consciously and subconsciously, and you do so for only one reason, to create, generate, and acquire ideas, as successfully as possible. This is exactly how you think, and this is why you think the way you do, only to create your mental models, and through them, only to generate ideas, ideas needed throughout the fulfillment of all your needs and meanings. Or at least this is the case with your conscious ideas, since your subconscious, classconscious, and highconscious ideas are conceived by your other selves and intelligences, and they simply pop up in your mind

whenever you need them. If you want to have genuine, successful ideas throughout life, then you have to understand how you generate and control ideas, and how your ideas integrate within your cognitive system. This book explains how to conduct your mental models in order to generate successful ideas throughout life, with emphasis in business, arts, needs, social interaction, science, sports, and much more. Anyone can start a business. But only leaders can succeed. Most entrepreneurs know the long odds: only a fraction of them will lead their enterprises through the rocky stages of growth to launch self-sustaining companies. Very few know how to outflank the failures that await them at every turn, including the most*

painful—being abandoned by key members of their team or getting pushed out by their board just as their business starts to generate real value. Derek Lidow is on a mission to improve these odds and change these outcomes. Throughout his long career—as CEO, innovator, and entrepreneur—he has tested virtually every aspect of launching a business. Lidow now argues that success is far less dependent upon a firm's idea or any grand strategy than it is upon something more personal: leadership. Emerging companies have specific leadership requirements, stage by fast-moving stage. Few founders have been able to leverage the tremendous power of this underrecognized reality—until now. *Startup Leadership* demonstrates how founders can adopt the skills that are required at each stage of their journey. Whether you are at the idea stage or managing a more mature enterprise, you can start to recognize the fundamental conflict: how to balance your selfish drives with the more selfless leadership required by the organization at any given time. The book shows you how to achieve this balance by:

- Assessing your unique motivations, traits, and skills
- Creating a personal leadership strategy that leverages your strengths and mitigates your weaknesses
- Mastering how to lead teams, including boards
- Understanding the five prerequisites for driving change
- Taking control of your inevitable crises, thereby strengthening your team and your leadership

With Lidow's help, you will learn how to become the startup leader your business needs, and you'll move forward with your plans with greater confidence and success. First published in 2004.
