***The Information Revolution in Early Modern Europe Jun 24 2020 This provocative new history of early modern Europe argues that changes in the generation, preservation and circulation of information, chiefly on newly available and affordable paper, constituted an 'information revolution'. In commerce, finance, statecraft, scholarly life, science, and communication, early modern Europeans were compelled to place a***

***new premium on information management. These developments had a profound and transformative impact on European life. The huge expansion in paper records and the accompanying efforts to store, share, organize and taxonomize them are intertwined with many of the essential developments in the early modern period, including the rise of the state, the Print Revolution, the Scientific Revolution, and the Republic of Letters. Engaging with historical questions across many fields of human activity, Paul M. Dover interprets the historical significance of this 'information revolution' for the present day, and suggests thought-provoking parallels with the informational challenges of the digital age.***

***than twenty countries. Writing and Publishing Scientific Papers is the distillation of Lövei's lecture notes and experience gathered over two decades; it is the coursebook many have been waiting for. The book's three main sections correspond with the three main stages of a paper's journey from idea to print: planning, writing, and publishing. Within the book's chapters, complex questions such as 'How to write the introduction?' or 'How to submit a manuscript?' are broken down into smaller, more manageable problems that are then discussed in a straightforward, conversational manner, providing an easy and enjoyable reading experience. Writing and Publishing Scientific Papers stands out from its field by targeting scientists whose first language is not English. While also touching on matters of style and grammar, the book's main goal is to advise on first principles of communication. This book is an excellent resource for any student or scientist wishing to learn more about the scientific publishing process and scientific communication. It will be especially useful to those coming from outside the English-speaking world and looking for a comprehensive guide for publishing their work in English.***

**Black Pioneers in Communication Research Jun 05 2021 " Black Pioneers in Communication Research is a pathbreaking book that displays a refreshingly joyful and critical spirit. Here, communication theory is shown to be the work of real persons living real lives, asking real questions of real problems. By celebrating and evaluating the lives of Black scholars as they have sought to advance communication studies, readers are introduced to perhaps the first truly foundational text our field has to offer! By tracing pioneers' life histories up to their current contributions to the field of communication, students will not simply be exposed to a concept and its definition, but rather invited to explore the evolution of both the concept and its progenitor. This illuminates and enlivens the study of communication while helping readers to be conscious of the conditions that have helped to shape our current state of knowledge. Black Pioneers in Communication Research is fully edifying: It lifts all communication scholars higher by being courageous enough to teach us as intellectuals that when we lay bare some of the intricacies of our lives, our students are better able to understand the complex canvases upon which our paradigms are built." --Eric King**

***Watts, Wake Forest University Black Pioneers in Communication Research is the only book in the field of communication that-through personal interviews-systematically explores the lives, careers, and profound conceptual contributions of the men and women who have helped shape the contours of humanistic and social scientific inquiry within communication studies and beyond. The personal lives and careers of eleven leading scholars are profiled: Molefi Kete Asante, Donald E. Bogle, Hallie Quinn Brown, Melbourne S. Cummings, Jack L. Daniel, Oscar H. Gandy, Jr., Stuart Hall, Marsha Houston, Joni L. Jones, Dorothy L. Pennington, and Orlando L. Taylor. These pioneers have had an indelible impact on Black Studies, sociology, communication, political science, film studies, rhetoric, sociolinguistics, and cultural studies. Black Pioneers in Communication Research presents a penetrating look into the circumstances that shifted the paradigms of interdisciplinary thought. ***White Magic May 04 2021 Paper is older than the printing press, and even in its unprinted state it was the great network medium behind the emergence of modern civilization. In the shape of bills, banknotes and accounting books it was indispensable to the economy. As forms and files it was essential to bureaucracy. As letters it became the setting for the invention of the modern soul, and as newsprint it became a stage for politics. In this brilliant new book Lothar Müller describes how paper made its way from China through the Arab world to Europe, where it permeated everyday life in a variety of formats from the thirteenth century onwards, and how the paper technology revolution of the nineteenth century paved the way for the creation of the modern daily press. His key witnesses are the works of Rabelais and Grimmelshausen, Balzac and Herman Melville, James Joyce and Paul Valéry. Müller writes not only about books, however: he also writes about pamphlets, playing cards, papercutting and legal pads. We think we understand the ?Gutenberg***

***era?, but we can understand it better when we explore the world that underpinned it: the paper age. Today, with the proliferation of digital devices, paper may seem to be a residue of the past, but Müller shows that the humble technology of paper is in many ways the most fundamental medium of the modern world.***
