Race, Labor, and Civil Rights Jan 01 2020 In 1966, thirteen black employees of the Duke Power Company's Dan River Plant in Draper, North Carolina, filed a lawsuit against the company challenging its requirement of a high school diploma or a passing grade on an intelligence test for internal transfer or promotion. In the groundbreaking decision *Griggs v. Duke Power* (1971), the United States Supreme Court ruled in favor of the plaintiffs, finding such employment practices violated Title 7 of the Civil Rights Act of 1964 when they disparately affected minorities. In doing so, the court delivered a significant anti-employment discrimination verdict. Legal scholars rank *Griggs v. Duke Power* on par with *Brown v. Board of Education* (1954) in terms of its impact on eradicating race discrimination from American institutions. In *Race, Labor, and Civil Rights*, Robert Samuel Smith offers the first full-length historical examination of this important case and its connection to civil rights activism during the second half of the 1960s. Smith explores all aspects of *Griggs*, highlighting the sustained energy of the grassroots civil rights community and the critical importance of courtroom activism. Smith shows that after years of nonviolent, direct action protests, African Americans remained vigilant in the 1960s, heading back to the courts to reinvigorate the civil rights acts in an effort to remove the lingering institutional bias left from decades of overt racism. He asserts that alongside the more boisterous expressions of black radicalism of the late sixties, foot soldiers and local leaders of the civil rights community -- many of whom were working-class black southerners -- mustered ongoing legal efforts to mold Title 7 into meaningful law. Smith also highlights the persistent judicial activism of the NAACP-Legal Defense and Education Fund and the ascension of the second generation of civil rights attorneys. By exploring the virtually untold story of *Griggs v. Duke Power*, Smith's enlightening study connects the case and the campaign for equal employment opportunity to the broader civil rights movement and reveals the civil rights community's continued spirit of legal activism well into the 1970s.

Human Rights, Power and Civic Action May 09 2023 Human Rights, Power and Civic Action examines the interrelationship between struggles for human rights and the dynamics of power, focusing on situations of poverty and oppression in developing countries. It is argued that the concept of power is a relatively neglected one in the study of rights-based approaches to development, especially the ways in which structures and relations of power can limit human rights advocacy. Therefore this book focuses on how local and national struggles for rights have been constrained by power relations and structural inequalities, as well as the extent to which civic action has been able to challenge, alter or transform such power structures, and simultaneously to enhance protection of people's basic human rights. Contributors examine and compare struggles to advance human rights by non-governmental actors in Cambodia, China, Ghana, Kenya, South Africa and Zimbabwe. The country case-studies analyse structures of power responsible for the negation and denial of human rights, as well as how rights-promoting organisations challenge such structures. Utilising a comparative approach, the book provides empirically grounded studies leading to new theoretical understanding of the interrelationships between human rights struggles, power and poverty reduction. Human Rights, Power and Civic Action will be of interest to students and scholars of human rights politics, power, development, and governance.

Power & Rights in US Constitutional Law Jun 29 2022 This book provides a coherent, readily accessible analysis of the tensions inherent in American constitutional law between the governing body and the governed. Combining extensive analysis with text from seminal Supreme Court decisions, each chapter examines different components of constitutional law. It has been updated to include the most current legislative and Supreme Court decisions affecting constitutional law. Part One examines the structure of the federal government of the United States, focusing on the core principles of separation of powers and federalism. Part Two presents an overview of the constitutional rights of U.S. citizens. For ease of understanding, these are divided into liberty and equality rights. A thorough review for students of constitutional law as well as a systematic reference for lawyers and scholars, Power & Rights in U.S. Constitutional Law is an invaluable guide to the delicate balance between governmental power and the constitutional rights of individual citizens.

Human Rights and Power in Times of Globalisation Jan 05 2023 How does globalisation affect the ability of human rights to constrain power? The contributions to the volume tackle this question in various areas of human rights and international law calling for rethinking of the structure and functioning of human rights.

Realizing Human Rights Apr 03 2020 At the dawn of a new era, this book brings together leading activists, policy-makers and critics to reflect upon fifty years of attempts to improve respect for human rights. Authors include President Jimmy Carter, who helped inject human rights concerns into US policy; Wei Jingsheng, who struggled to do so in China; Louis Henkin, the modern "father" of international law, and Richard Goldstone, the former chief prosecutor for the Yugoslav and Rwandan war crimes tribunals. A half-century since the adoption of the Universal Declaration of Human Rights the time is right to assess how policies and actions effect the realization of human rights and to point to new directions and challenges that lie ahead. A must have for everyone in the human rights community and the broader foreign policy community as well as the reader who is increasingly aware of the visibility of human rights concerns on the public stage.

Rights to Language May 17 2021 Rights to Language: Equity, Power, and Education brings together cutting-edge scholarship in language, education, and society from all parts of the world. Celebrating the 60th birthday of Tove Skutnabb-Kangas, it is inspired by her work in minority, indigenous, and immigrant education; multilingualism; linguistic human rights; and global language and power issues. Rights to Language situates issues of minorities and bilingual education in broader perspectives of human rights, power, and the ecology of language. The rich mix of papers serves to underline that the issues are comparable worldwide, that many disparate topics can cross-fertilize each other, and that our understanding of the issues can benefit from coverage that is global, reflective, and committed. The Power of Human Rights Sep 01 2022 This book celebrated the 50th anniversary of the Universal Declaration of Human Rights by showing how global human rights norms have influenced national government practices in eleven different countries around the world. Had the principles articulated in the Declaration had any effect on the behavior of states towards their citizens? What are the conditions under which international human rights norms are internalized in domestic practices? And what can we learn from this case about why, how, and under what conditions international norms in general influence the actions of states? This book draws on the work of social constructivists to examine these important issues. The contributors examine eleven countries representing five different world regions - Northern Africa, Sub-Saharan Africa, Southeast Asia, Latin America, and Eastern Europe - drawing practical lessons for activists and policy makers concerned with preserving and extending the human rights gains made during the past fifty years.

Women, Power, and Property Jul 07 2020 Quotas for women in government have swept the globe. Yet we know little about their capacity to upend entrenched social, political, and economic hierarchies. Property and Power seeks to explore this issue within the context of India, the world's largest democracy. Brulé uses cutting-edge research design and extensive field research to make connections among political representation, backlash, and economic empowerment. Her findings show that women in government catalyze access to fundamental economic rights: property rights. Women in politics also have the power to support constituent rights at critical junctures, such as marriage negotiations, sparking integrative solutions to intra-household bargaining. Although they can lead to backlash, quotas are essential for enforcement of rights. In this groundbreaking study, Brulé shows how quotas can operate as a crucial tool to foster equality and benefit the women they are meant to empower.

Normal Life Jan 31 2020 Revised and Expanded Edition Wait—what's wrong with rights? It is usually assumed that trans and gender nonconforming people should follow the civil rights and "equality" strategies of lesbian and gay rights organizations by agitating for legal reforms that would ostensibly guarantee nondiscrimination and equal protection under the law. This approach assumes that the best way to address the poverty and criminalization that plague trans populations is to gain legal recognition and inclusion in the state's institutions. But is this strategy effective? In *Normal Life* Dean Spade presents revelatory critiques of the legal equality framework for social change, and points to examples of transformative grassroots trans activism that is raising demands that go beyond traditional civil rights reforms. Spade explodes assumptions about what legal rights can do for marginalized populations, and describes transformative resistance processes and formations that address the root causes of harm and violence. In the new afterword to this revised and expanded edition, Spade notes the rapid mainstreaming of trans politics and finds that his predictions that gaining legal recognition will fail to benefit trans populations are coming to fruition. Spade examines recent efforts by the Obama administration and trans equality advocates to "pinkwash" state violence by articulating the US military and prison systems as sites for trans inclusion reforms. In the context of recent increased mainstream visibility of trans people and trans politics, Spade continues to advocate for the dismantling of systems of state violence that shorten the lives of trans people. Now more than ever, *Normal Life* is an urgent call for justice and trans liberation, and the radical transformations it will require.

The Power of Freedom Nov 22 2021 Are the quests for human rights and economic development compatible? In this thought-provoking book, Jean-Pierre Chauffour argues that the answer depends on the place given to freedom in both human rights and development. When freedom advances, prosperity and human rights progress. When freedom is threatened—especially economic and civil liberties—fundamental human rights are violated and economic development suffers. Yet although the connection between rights and development has long been recognized, practice has not followed principle. Human rights advocates and economic development experts rarely engage each other and often work at cross purposes. Moreover, the proposition that freedom plays a central role in both agendas challenges a number of human rights and development orthodoxies as well as practices developed over the last 60 years. A reconciliation of the human rights and development communities is possible. It requires highlighting the role that freedom plays in both. Rights advocates must recognize economic liberty as an essential component of human rights, and development experts must recognize the broad range of institutions and economic policies consistent with human rights. With his engaging style, Chauffour makes clear that empowering people with economic freedom, civil rights, and political liberties is the best way to ensure development and respect for the individual. This book provides major lessons to meet the challenges of securing freedom, peace, and prosperity.

Accountability and the Law May 05 2020 This book discusses contemporary accountability and transparency mechanisms by presenting a selection of case studies. The authors deal with various problems connected to controlling public institutions and incumbents' responsibility in state bodies. The work is divided into three parts. Part I: Law examines the institutional and objective approach. Part II: Fairness and Rights considers the subject approach, referring to a recipient of rights. Part III: Authority looks at the functional approach, referring to the executors of law. Providing insights into increasing understanding of various concepts, principles, and institutions characteristic of the modern state, the book makes a valuable contribution to the area of comparative constitutional change. It will be a valuable resource for academics, researchers, and policy-makers working in the areas of constitutional law and politics.
