The Curiosity Jan 03 2023 The Curiosity is a gripping, poignant, and thoroughly original thriller that raises disturbing questions about the very nature of life and humanity—man as a scientific subject, as a tabloid plaything, as a living being, as a curiosity.... Dr. Kate Philo and her scientific exploration team make a breathtaking discovery in the Arctic: the body of a man buried deep in the ice. Remarkably, the frozen man is brought back to the lab and successfully reanimated. As the man begins to regain his memories, the team learns that he was—is—a judge, Jeremiah Rice, and the last thing he remembers is falling overboard into the Arctic Ocean in 1906. Thrown together by circumstances beyond their control, Kate and Jeremiah grow closer. But the clock is ticking and Jeremiah’s new life is slipping away...and all too soon, Kate must decide how far she is willing to go to protect the man she has come to love.

Authentic Patriotism May 07 2023 A provocative, inspiring account of our neglected American ideals and the people who are living them today—and restoring our nation's dream Patriotism has become a loaded word: one that is wielded against people with whom we might disagree, or whose cultural origins don't match our own. But our founding fathers--Washington, Jefferson, Adams, and others--saw patriotism as a dynamic force: an act of service, in an evolving nation that defined its purpose by offering all people a better way of life. In *Authentic Patriotism*, author and award-winning journalist Stephen P. Kiernan explores the original ideals that have been lost in our current climate, where war and economic turmoil have eroded our sense of civic obligation. Kiernan describes "a nation adrift," out of touch with its origins--and then introduces a range of inspiring people who have revived our national purpose by taking action: - The out-of-work college graduate who led an economic and environmental renewal of her blighted home community. - The retired executive who pioneered a revolutionary concept in health care for people without insurance. - The minister who created a legendary choir, with the goal of uniting children of different races, genders, and classes in one voice. - The family who donated their daughter's heart, so that another might live. These and other "New Americans" are profiled in a book that offers hope, ideas, examples, and practical resources for readers who want to renew the American spirit.

How to Think Like a Scientist Mar 13 2021 Every day you answer questions--dozens, even hundreds of them. How do you find the answers to questions? How can you be sure your answers are correct? Scientists use questions to learn about things.

Scientists have developed a way of helping make sure they answer questions correctly. It is called the scientific method. The scientific method can help you find answers to many of the questions you are curious about. What kind of food does your dog like best? Is your sister more likely to help you with your homework if you say please? Can throwing a dead snake over a tree branch make it rain? The scientific method can help you answer these questions and many others. Stephen Kramer's invitation to think like a scientist, illustrated by Felicia Bond's humorous and appealing pictures, will receive enthusiastic response from young readers, scientist and nonscientist alike.

Universe of Two Mar 25 2022 “Stephen Kiernan has pulled off the nearly impossible...The most tender, terrifying, relevant book you'll read this year.” — Jenna Blum, New York Times bestselling author of *Those Who Save Us* and *The Lost Family* From the critically acclaimed author of *The Baker’s Secret* and *The Curiosity* comes a novel of conscience, love, and redemption—a fascinating fictionalized account of the life of Charlie Fisk, a gifted mathematician who was drafted into Manhattan Project and ordered against his morals to build the detonator for the atomic bomb. With his musician wife, he spends his postwar life seeking redemption—and they find it together. Graduating from Harvard at the height of World War II, brilliant mathematician Charlie Fish is assigned to the Manhattan Project. Working with some of the age’s greatest scientific minds, including J. Robert Oppenheimer, Enrico Fermi, and Leo Szilard, Charlie is assigned the task of designing and building the detonator of the atomic bomb. As he performs that work Charlie suffers a crisis of conscience, which his wife, Brenda—unaware of the true nature of Charlie’s top-secret task—mistakes as self-doubt. She urges him to set aside his qualms and continue. Once the bombs strike Hiroshima and Nagasaki, the feelings of culpability devastate him and Brenda. At the war’s end, Charlie receives a scholarship to pursue a PhD in physics at Stanford—an opportunity he and Brenda hope will allow them a fresh start. But the past proves inescapable. All any of his new colleagues can talk about is the bomb, and what greater atomic weapons might be on the horizon. Haunted by guilt, Charlie and Brenda leave Stanford and decide to dedicate the rest of their lives to making amends for the evil he helped to birth into the world. Based on the life of the actual mathematician Charles B. Fisk, *Universe of Two* combines riveting historical drama with a poignant love story. Stephen Kiernan has conjured a remarkable account of two people struggling to heal their consciences and find peace in a world forever changed.

A Brief History of the Roman Empire Jul 05 2020 In this lively and very readable history of the Roman Empire from its establishment in 27 BC to the barbarian incursions and the fall of Rome in AD 476, Kershaw draws on a range of evidence, from Juvenal's Satires to recent archaeological finds. He examines extraordinary personalities such as Caligula and Nero and seismic events such as the conquest of Britain and the establishment of a 'New Rome' at Constantinople and the split into eastern and western empires. Along the way we encounter gladiators and charioteers, senators and slaves, fascinating women, bizarre sexual practices and grotesque acts of brutality, often seen through eyes of some of the world's greatest writers. He concludes with a brief look at how Rome lives on in the contemporary world, in politics, architecture, art and literature.

Deconstructing the Mind Feb 09 2021 During the past two decades, debates over the viability of commonsense psychology have occupied center stage in both cognitive science and the philosophy of mind. A group of prominent philosophers known as eliminativists argue that advances in cognitive science and neuroscience will ultimately justify a rejection of our folk theory of mind because it gives a radically mistaken account of mental life. In *Deconstructing the Mind*, distinguished philosopher Stephen Stich, once a leading advocate of eliminativism, offers a bold and compelling reassessment of this view. The book opens with a groundbreaking multi-part essay in which Stich maintains that even if the sciences develop in the ways that eliminativists foresee, none of the arguments for ontological elimination are tenable. Succeeding essays explore folk psychology in more detail, develop a systematic critique of simulation theory, and counter widespread concern about naturalizing psychological properties.

The Hummingbird Dec 22 2021 From the author of the acclaimed debut novel *The Curiosity* comes an emotionally resonant tale about a woman who must take care of two wounded men – one, her soldier-husband, just home from the war in Iraq; the other, a dying World War II scholar-historian who harbors a long-buried secret. Deborah Birch is a seasoned hospice nurse whose daily work requires courage and compassion. But her skills and experience are tested in new and dramatic ways when her easygoing husband, Michael, returns from his third deployment to Iraq haunted by nightmares, anxiety, and rage. She is determined to help him heal, and to restore the tender, loving marriage they once had. At the same time, Deborah’s primary patient is Barclay Reed, a retired history professor and expert in the Pacific Theater of World War II whose career ended in academic scandal. Alone in the world, the embittered professor is dying. As Barclay begrudgingly comes to trust Deborah, he tells her stories from that long-ago war, which help her find a way to help her husband battle his demons. Told with piercing empathy and heartbreaking realism, *The Hummingbird* is a masterful story of loving commitment, service to country, and absolution through wisdom and forgiveness.

The Baker's Secret Nov 01 2022 A tale beautifully, wisely, and masterfully told.” — Paula McLain, author of *The Paris Wife* and *Circling the Sun* From the multiple-award-winning, critically acclaimed author of *The Hummingbird* and *The Curiosity* comes a dazzling novel of World War II—a shimmering tale of courage, determination, optimism, and the resilience of the human spirit, set in a small Normandy village on the eve of D-Day. On June 5, 1944, as dawn rises over a small town on the Normandy coast of France, Emmanuelle is making the bread that has sustained her fellow villagers in the dark days since the Germans invaded her country. Only twenty-two, Emma learned to bake at the side of a master, Ezra Kuchen, the village baker since before she was born. Apprenticed to Ezra at thirteen, Emma watched with shame and anger as her kind mentor was forced to wear the six-pointed yellow star on his clothing. She was likewise powerless to help when they pulled Ezra from his shop at gunpoint, the first of many villagers stolen away and never seen again. In the years that her sleepy coastal village has suffered under the enemy, Emma has silently, stealthily fought back. Each day, she receives an extra ration of flour to bake a dozen baguettes for the occupying troops. And each day, she mixes that precious flour with ground straw to create enough dough for two extra loaves—contraband bread she shares with the hungry villagers. Under the cold, watchful eyes of armed soldiers, she builds a clandestine network of barter and trade that she and the villagers use to thwart their occupiers. But her gift to the village is more than these few crusty loaves. Emma gives the people a taste of hope—the faith that one day the Allies will arrive to save them.

Taylorism Transformed Apr 25 2022 This intellectual history interprets recent American business management ideas as political theory, describing their underlying assumptions about power and value. According to Stephen Waring, most business management theory descends from either Frederick Taylor's 'bureaucratic' theory of scientific management or Elton Mayo's 'corporatist' idea of human relations. Waring discusses the subsequent evolution of several management theories and techniques, including organization theory, computer simulation, management by objectives, sensitivity training, job enrichment, and innovations usually attributed to the Japanese, such as quality control circles.

The Right to Bear Arms Aug 18 2021 The U.S. Supreme Court has recognized the individual right to keep and bear arms, but courts in states that have extreme gun control restrictions apply tests that balance the right away. This book demonstrates that the right peaceably to carry firearms is a fundamental right recognized by the text of the Second Amendment and is part of our American history and tradition. Halbrook’s scholarly work is an exhaustive historical treatment of the fundamental, individual right to carry firearms outside of the home. Halbrook traces this right from its origins in England through American colonial times, the American Revolution, the Constitution’s ratification debates, and then through the antebellum and post-bellum periods, including the history surrounding the enactment of the Fourteenth Amendment to the U.S. Constitution. This book is another important contribution by Halbrook to the scholarship concerning the text, history and tradition of the Second Amendment’s right to bear and carry arms.
