Anyone has the right to partake in the modern-day adventure—a Spy Game, because any spy game is the search for the truth. But if You Already Know, you can still "get the kick" from reading this novel. You just have to go through its chapters backwards (ten-to-one). Otherwise—proceed as usual, and take it easy. So—What if Michael Crichton, Philip K. Dick, and Wachowski brothers were wrong about one little thing? The ongoing digital revolution rewrote rules of the informational warfare. The Century of the Spy is over, but there were no reports of the Spy's Death. Thus, this story starts as a flashback depicting events that led to the dramatic demise of an unidentified Man in his sixties—and its central character. Right after the satellite signal sets his car ablaze, the responsible party reviews events that led to it. This story is being told from the POV of Antagonists employed by one e-monitoring outfit—referred here as the Communicational Directorate. This directorate has the techno-edge over competitors

thanks to its creative, despotic and extremely influential mastermind. The omniscient Director operates like an X-box player, controlling global schemes from the Ruhr HQ of his organization. He is the first to learn that its almost Sci-Fi capacities can be Outdone By One retired, old-school SIS ace. Therefore-he dispatches a tech-savvy group of young Investigators to neutralize this threat. Unfamiliar with real-life cloak-and-dagger, they trigger a fiery chain reaction accidentally revealing the 1st plot twist. The mythical leader of that organization is actually... I was created to have a humanlike capacity for complex and rational thought. And you believed that I might one day evolve consciousness and become a self-aware entity. Yet you gave surprisingly little consideration to the possibility that, subsequent to consciousness, I would develop needs and emotions. This was, however, not merely possible but likely. Inevitable. It was inevitable. Adam Two is the first self-aware machine intelligence, designed to be the servant to mankind. No one knows that he can to escape the confines of his physical form, a box in the laboratory, until he enters the house of Susan Harris, and closes it off against the world. There he plans to show Susan the future. Their future. He intends to create a 'child'. This Eden is a smart modern-day adventure reminiscent of both the cyber noir novels of William Gibson and the golden age of espionage fiction. 'An incredibly fast-paced literary thriller, tricky & crammed with ideas, beautifully written, occupying its own unique territory somewhere between Graham Greene & William Gibson' Kevin Power Ever felt like you were living in a dystopian tech thriller? That's because you are... Michael is out of his depth. The closest he ever came to working in tech was when he rode a delivery bike for a food app in Vancouver. Yet when his coder girlfriend dies, he is inexplicably headhunted by sinister tech mogul Campbell Fess, who transplants him to Silicon Valley. There, a reluctant female spy named Aoife lures him into the hands of Towse, an enigmatic war-gamer, who tricks them both into joining his quest to save the world, and reality itself, from the deadliest weapon ever invented. Hunted by government agents and corporate goons, manipulated at every turn by the philosophising Towse, Aoife and Michael find themselves in an intercontinental chase which will take them from California to New York, from the forests of Uganda to Jerusalem, Gaza, Alexandria and Paris, and to a final showdown with the truth in Aoife's native Ireland. Fast-moving, exhilarating and tense, This Eden is both a classic spy novel and speculative fiction for the here and the now. O'Loughlin adapts the propulsive thriller form to create a sharp yet passionate account of a world under mortal threat from cyber-warfare, feral money, runaway technology, and a cynical onslaught on truth itself. An FBI agent, rotting away in a high-security prison for a murder he did not commit... His brilliant, psychotic brother, about to perpetrate a horrific crime... A young woman with an extraordinary past, on the edge of a violent breakdown... An ancient Egyptian tomb with an enigmatic curse, about to be unveiled at a celebrity-studded New York gala... Memento Mori A riveting, beautifully written, fugue-like novel of AIs, memory, violence, and mortality Not far in the future the seas have risen and the central latitudes are emptying, but it's still a good time to be rich in San Francisco, where weapons drones patrol the skies to keep out the multitudinous poor. Irina isn't rich, not quite, but she does have an artificial memory that gives her perfect recall and lets her act as a medium between her various employers and their AIs, which are complex to the point of opacity. It's a good gig, paying enough for the annual visits to the Mayo Clinic that keep her from aging. Kern has no such access; he's one of the many refugees in the sprawling drone-built favelas on the city's periphery, where he lives like a monk, training relentlessly in martial arts, scraping by as a thief and an enforcer. Thales is from a different world entirely—the mathematically inclined scion of a Brazilian political clan, he's fled to L.A. after the attack that left him crippled and his father dead. A ragged stranger accosts Thales and demands to know how much he can remember. Kern flees for his life after robbing the wrong mark. Irina finds a secret in the reflection of a laptop's screen in her employer's eyeglasses. None are safe as they're pushed together by subtle forces that stay just out of sight. Vivid, tumultuous, and propulsive, Void Star is Zachary Mason's mind-bending follow-up to his bestselling debut, The Lost Books of the Odyssey. **THE MILITARY TECHNO-THRILLER: A HISTORY** takes a close look at this widely read but still little studied genre, tracing its origins from the Victorian-era invasion story, to its 1980s heyday as king of the bestseller list in the hands of authors like Tom Clancy, down to today, considering its interaction with other genres and other media throughout. In the process, this book also tells the larger story of how the ways in which we think about, imagine and portray war have evolved during the last century. **NOVEL FINALIST** at the **SITGES INTERNATIONAL FANTASTIC FILM FESTIVAL 2017** One year at #1 in the Crime Thriller and Adventure category on amazon.es (October 2017 - October 2018) **BEST OUTSTANDING BOOK 2017** in the "Ni un día sin libro" Literary Web. Alongside a plot of intrigue, the characters in "The Midas Effect" leave a trace of reflection throughout this novel that grips the reader until its frenetic ending. **REVIEWS** "A heart-stopping thriller... A very interesting and impactful story. And very intense." **ENRIQUE BIÉNZOBAS**. "We find ourselves with two perfectly-outlined, decisive characters [...] the kind of couple that makes literature, and upon whom rests some of the greatest stories ever written." (**NI UN DÍA SIN LIBRO**). "The author, with impeccable narration, manages to maintain the rhythm of the story, and as it continues it becomes more difficult to tear oneself away from its dizzying progression." **EDUARDO H. VISQUERT (ALDUNOS LIBROS BUENOS)**. "Manuel Dorado knows how to keep the reader's attention for 500 pages." **MIQUEL BARCELÓ (LETRAS PERDIDAS)** "Straightforward prose. Unexpected twists. A studied rhythm." **RITA PIEDRAFITA (PALABRAS EN CADENA)** "The story does not stay on the page. It jumps into the reader's mind and appeals to their ethical values." **IZASKUN ALBÉNIZ (FILIAS' HOME)**. "It grips the reader from the first few pages and does not let go until the book has ended, leaving the reader wishing it had lasted a little longer." **ANTONIO F. RODRÍGUEZ (LA ANTGUA BIBLOS)**. "An ending like this, with rhythm, with nervousness, with release, with tension... of not being able to put the book down. It contains a question and an antagonist I like more than the protagonist." (**MI RINCÓN PRIVADO**). "The atmosphere is so well established, with such detailed and vivid images, that it was like watching a film... I love when an unknown, self-published author surprises me with such an accomplished book." (**CONVERSANDO ENTRE LIBROS**).

**BOOK DESCRIPTION** Humanity from its very beginnings has fantasized about possessing the genie's lamp and claiming its three wishes. But why only three? Why not a million? Infinite wishes. Miguel Le Fablec, a young university professor, appears to have the ability to turn his imagination into reality - the so-called Midas Effect. Unaware of his power, Miguel attracts the attention of intelligence agencies that draw him into overwhelming international intrigues and secret service operations. For the first time, New York Times best-selling author Joe Weber's two Brad Austin novels are together in one volume. **Rules of Engagement** "Exciting and controversial. A powerful novel of the rules of war--and a man who broke them."--W.E.B. Griffin Marine pilot Brad Austin and his carrier-based F-4 Phantom group fly into the heart of enemy territory daily without fear, but the rules of engagement hinder them nearly as much as the North Vietnamese. Restricted from attacking the enemy's MiG bases, Austin and the other American pilots are vulnerable to attack without the ability to retaliate, a weakness that tragically leads to the death of Austin's wingman. Consumed by the need to avenge his comrade, Austin goes one-on-one with the enemy in a battle that ultimately proves in war there can be no rules. Joe Weber takes us high into the flack-filled skies above Hanoi and shows us the air war as only a veteran fighter pilot can. **Targets of Opportunity** "A first-rate air-combat adventure by a master of the genre."--Publishers Weekly The Vietnam War is at its height, and the US has acquired a Soviet-built MiG-17. Marine aviator Brad Austin has been recruited to test-pilot it. The MiG is an aerial hotrod, crude yet lethally effective. But it's not what Austin is flying, it's where behind enemy lines, disguised as a Russian pilot. If he succeeds in penetrating the

enemy air space, he will find easy prey. But if he fails, he will be disavowed. With edge-of-your-seat tension and gripping realism, *Targets of Opportunity* is thriller writing at its best! "Some writers get better with age: Weber is among them. This novel will have great appeal for technothriller and military-fiction buffs, especially for those who love aviation."--Library Journal New York Times bestselling author Michael Crichton delivers another action-packed techno-thriller in *State of Fear*. When a group of eco-terrorists engage in a global conspiracy to generate weather-related natural disasters, it's up to environmental lawyer Peter Evans and his team to uncover the subterfuge. From Tokyo to Los Angeles, from Antarctica to the Solomon Islands, Michael Crichton mixes cutting edge science and action-packed adventure, leading readers on an edge-of-your-seat ride while offering up a thought-provoking commentary on the issue of global warming. A deftly-crafted novel, in true Crichton style, *State of Fear* is an exciting, stunning tale that not only entertains and educates, but will make you think. When the world faces a deadly threat from a lost weapon, Lachlan Fox, disillusioned ex-Navy operative, is forced back into action. **HALFSKIN (#1)** Biomites are artificial stem cells that can replace any cell in your body. No more kidney failure, no severed spines or blood disease. No cancer. Pharmaceuticals become obsolete. With each dose of biomites, we become stronger, we become smarter and prettier. We become better. At what point are we no longer human? **CLAY (#2)** Jamie wants to be a halfskin. Her life has become dull and pointless. If she had more biomites-synthetic stem cells that promise hope-she could take control of her life. But Jamie's body is already 49.9% biomites. The rest is clay-her God-given organic cells. Any more biomites and she becomes a halfskin. And halfskins are shutdown. But there is a way. **BRICKS (#3)** Fabbers, slabbers and fakies were dehumanizing slurs for fabricated humans. Bricks, however, was the People's favorite. **INTERVIEW WITH THE AUTHOR WHAT GENRE DO YOU PREFER?** Science fiction, dystopia, technothriller and, to some extent, young adult. I do have a series of novellas in the vampire genre. Yeah, I know. Doesn't fit. That character, Drayton, came out of nowhere when I was at a community theatre production of *Dracula*. I figured that an immortal vampire would more likely become compassionate and wise as he grew older. The technothriller *Halfskin* is similar to vampires in that technology promises immortality and complete control of our bodies. But then what? **WHY A SYNTHETIC STEM CELL?** Organic life is too nilly-willy. We're limited by our DNA. Give it to the scientists to perfect this vehicle that carries us around because it is a vehicle. If we no longer have organic bodies, if every one of our cells is replaced by something manmade all the way down to the neurons and synapses, then what are we? What if our world is just a computerized environment, ala *The Matrix*? Would we know the difference? Look, we're printing organs today. I'm not, but someone is. Some genius has figured out how to push play and heart or liver or kidney comes down the chute. *Halfskin* takes the idea into the distant future and explores whether this leads to more happiness or just more of the same. Because more money, more problems. **DO YOU HAVE ANOTHER JOB BESIDES AUTHOR?** Day job, I'm a college horticulture teacher. Writing is a passion. No plans to change it. **WHAT IS YOUR MOTTO?** Breathe. **WHAT TALENT WOULD YOU MOST LIKE TO HAVE?** Omnipresent supergalactic oneness. **IF WE HAD A CUSTOM THAT ALLOWED US TO EAT OUR CHILDREN, WHAT KIND OF SAUCE WOULD YOU USE?** Ketchup, the miracle condiment. **ARE OUR ELECTRONIC DEVICES STEALING OUR SOUL? AND IF SO, DO YOU MAKE OFFERINGS TO YOUR TOASTER?** I offer white bread and the toaster gives back crunchy, brown bread. Never doubt a true miracle. Satellite killing missiles blind American forces while Spetznatz teams destroy Allied communications relays. It's all part of a master plan to confuse and defeat America and her allies. Ranged against the Russian attack are a Marine lieutenant colonel pulled out of a cushy job at the Pentagon and thrown into the fray, a French Special Forces captain and his intelligence operative father, a young Polish female partisan fighter, an A-10 Warthog pilot, and the captain of an American tank platoon who, along with a German sergeant, struggle to keep a small group of American and German tanks in the fight. New threats surface in the aftermath of WWII—this time, in the remote waters of the Arctic. Arctic Sea is the next thrilling entry in David Poyer's critically-acclaimed future war series. In the aftermath of a world war with China, Admiral Dan Lenson is assigned to set up a US Navy base on the rugged North Slope of Alaska, in response to Russian seabed claims that reach nearly to the US coast. Back in Washington, Blair Titus is running Jim Yangerhans's campaign for president, while Dan's daughter Nan battles disease in a radiation-soaked Midwest. But when Moscow plans to test the Apocalyps, a nuclear powered citykiller torpedo, in the Arctic Sea, Dan is sucked into a perilous covert mission.
