Children and Chores Nov 01 2020 Why should parents make the effort to insist that children do chores? Of course there is the immediate value of getting help around the home, but far more important is the research that Elizabeth Crary cites, research that indicates the importance of doing chores in preparing children for responsible adulthood. In fact, this research shows that doing chores from a young age is more important in successful adulthood than IQ. In this easy-to-read guide, Crary explains what kids can realistically be expected to do at what ages, how to introduce chores and increase the level of responsibility as a child grows, and how to deal with children's resistance to helping.

What Do You Say? Jul 10 2021 A guide to effectively communicating with teenagers by the bestselling authors of *The Self-Driven Child* If you're a parent, you've had a moment--maybe many of them--when you've thought, "How did that conversation go so badly?" At some point after the sixth grade, the same kid who asked "why" non-stop at age four suddenly stops talking to you. And the conversations that you wish you could have--ones fueled by your desire to see your kid not just safe and healthy, but passionately engaged--suddenly feel nearly impossible to execute. The good news is that effective communication can be cultivated, learned, and taught. And as you get better at this, so will your kids. William Stixrud, Ph.D., and Ned Johnson have 60 years combined experience talking to kids one-on-one, and the most common question they get when out speaking to parents and educators is: What do you say? While many adults understand the importance and power of the philosophies behind the books that dominate the parenting bestseller list, parents are often left wondering how to put those concepts into action. In *What Do You Say?*, Johnson and Stixrud show how to engage in respectful and effective dialogue, beginning with defining and demonstrating the basic principles of listening and speaking. Then they show new ways to handle specific, thorny topics of the sort that usually end in parent/kid standoffs: delivering constructive feedback to kids; discussing boundaries around technology; explaining sleep and their brains; the anxiety of current events; and family problem-solving. *What Do You Say?* is a manual and map that will immediately transform parents' ability to navigate complex terrain and train their minds and hearts to communicate ever more successfully.

Raising Kids Who Read Nov 13 2021 How parents and educators can teach kids to love reading in the digital age Everyone agrees that reading is important, but kids today tend to lose interest in reading before adolescence. In *Raising Kids Who Read*, bestselling author and psychology professor Daniel T. Willingham explains this phenomenon and provides practical solutions for engendering a love of reading that lasts into adulthood. Like Willingham's much-lauded previous work, *Why Don't Students Like School?*, this new book combines evidence-based analysis with engaging, insightful recommendations for the future. Intellectually rich argumentation is woven seamlessly with entertaining current cultural references, examples, and steps for taking action to encourage reading. The three key elements for reading enthusiasm—decoding, comprehension, and motivation—are explained in depth in *Raising Kids Who Read*. Teachers and parents alike will appreciate the practical orientation toward supporting these three elements from birth through adolescence. Most books on the topic focus on early childhood, but Willingham understands that kids' needs change as they grow older, and the science-based approach in *Raising Kids Who Read* applies to kids of all ages. A practical perspective on teaching reading from bestselling author and K-12 education expert Daniel

Do You Have Kids? Feb 02 2021 A savvy and validating guide to what might be in store for growing numbers of childfree and childless adults worldwide, *Do You Have Kids? Life When the Answer is No* takes on topics from the shifting meaning of family to what we leave behind when we die. Weaving together wisdom from women ages twenty-four to ninety-one with both her own story and a growing body of research, Kate brings to light alternate routes to lives of meaning, connection, and joy. Today about one in five American women will never have children, whether by choice or by destiny. Yet few women talk much about what not having kids means to their lives and identities. Not that they don't want to; there just aren't obvious catalysts for such open conversations. In fact, social taboos preclude exploration of the topic—and since our family-centric culture doesn't know quite what to do with non-parents, there's potential for childless and childfree women to be sidelined, ignored, or drowned out. Yet there's widespread, pent-up demand for understanding and validating this perfectly normal way of being. In this straight-shooting, exhaustively researched book, women without kids talk candidly about the ways in which their lives differ from societal norms and expectations—the good, the bad, and the unexpected.

Why Is My Child in Charge? Apr 26 2020 Solve typical toddler challenges with eight key mindshifts that will help you parent with clarity, calmness and self-control. Through stories from her practice, Claire Lerner shows parents how making critical mindshifts—seeing their children's behaviors through a new lens —empowers parents to solve their most vexing childrearing challenges. This process puts parents back in the driver's seat, where they belong and where their children need them to be. These real life stories provide a roadmap for how to tune into the root causes of children's behavior and how to create and implement strategies that are tailored to the unique needs of each child and family. Through these stories, Claire provides a treasure trove of practical solutions that are based in science and which work in real life. Why Is My Child In Charge? picks up where other books have left parents hanging. Most parenting books offer solutions that sound good on paper but don't work in practice. They are aspirational rather than achievable, or they offer one-size-fits-all approaches that don't meet the needs of an individual child. They can compound parents' feelings of frustration and thus, can be counterproductive. Case by case, Claire unpacks the individualized process she guides parents through to solve the most common challenges such as throwing tantrums in public; delaying bedtime for hours; refusing to participate in family mealtimes; and resisting potty training. Employing a relatable story-telling approach, Claire elucidates: The faulty mindsets that pose obstacles to parents seeing the situation more objectively The essential mindshifts that enable parents to quickly identify the root causes of the problem The development of an action plan tailored to each unique child and family Why is My Child in Charge? is

like having a child development specialist in your home. It shows how you can develop “win-win” strategies that translate into adaptable, happy kids and calm, connected and in-control parents. It will help you be the parent you want to be.

Parenting Matters Jan 04 2021 Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers"--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters

identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
