This TEACHER'S EDITION  
workbook was created by a  
20+ year certified veteran  
teacher and curriculum writer  
for classes in drawing, painting  
& sculpture designed for  
grades 6 through 12. Lessons  
are easily adjusted to  
accommodate special needs  
students & material availability  
in many environments from the  
school classroom to a fine arts  
camp program. It includes  
more than 2 year's worth of  
lesson ideas, project samples,  
vocabulary, worksheets,  
sample tests, research paper  
samples, grading rubrics,  
sketch and note taking pages,  
and short creative 5 minute  
writing assignments. This book  
is also a helpful aid in fulfilling

US State & Federal  
accommodation requirements  
(504, IEP) by providing special  
needs students additional  
documented & written material  
that may be taken home. Every  
lesson is designed to be  
personal & expressive fine art.  
There are NO "crafty" projects  
or "cookie-cutter" lessons  
where everyone has the same  
outcome. This book stresses a  
"divergent thinking processes"  
approach and creative problem  
solving, with an art therapy  
undertone. Most lesson  
suggestions may be done in  
different media to work within  
tight budgets. Anecdotal  
evidence from the author's  
guidance department indicates  
that students who take his

course with this workbook are 50% LESS likely to fail standardized testing. These are real numbers that can grab the attention of your administration & Board of Education. These lessons combine information from core curriculum and merge it with fine art. Concepts of math, science, history, language, & writing converge in a well-orchestrated, rigorous, and relevant program. Students not only come to understand the concepts but use them and manipulate them for deeper understanding on multiple sensory levels of thinking. This workbook is divided by multicurricula units so that this concrete connection to

academic "core courses" is more easily seen. Does this mean that an art class loses its creative edge by incorporating other subjects? No, this integration enhances it. Students have a deeper understanding of the work, they come to see the relevance, and are more likely to "buy into" the concept. When students ask, "Why do we have to know this stuff," the answer becomes relevant through the daily approach, process, and end products. ALL projects herein are designed to have successful divergent results, incorporate creative problem solving, & bring relevant connections to students' lives. This book is built for student

success on many levels from gifted to challenged. This in turn is helpful in fulfilling mandated accommodations so that no child is left behind. This book is also

These are real numbers that can grab the attention of your administration and Board of Education if you have the same results. These lessons combine information from core curriculum and merge it with fine art. Art is the meeting place for all subjects. When we grid-we use geometry. When we make sculptures-we use engineering. When we mix colors-we reveal information about physics. When we create illustrations for stories-we learn about literature. When we review the styles of art from da Vinci to Warhol-we teach

history. Students not only come to understand the concepts, but use them, and manipulate them for deeper understanding on multiple sensory levels of thinking.
