Why GAO Did This Study SBA was created in 1953, and its regional offices were established shortly thereafter. In the late 1990s and early 2000s, the agency downsized the staff and responsibilities of the regional offices. These offices, which are managed by politically appointed administrators, are currently responsible for supervising SBA's district offices and promoting the President's messages throughout the region. GAO was asked to review SBA's current organizational structure, with a focus on the regional offices. Among other objectives, this report (1) examines challenges related to SBA's organizational structure and (2) discusses the budgetary effects of closing the regional offices and SBA managers' and staff's views on other possible effects of closures. GAO reviewed documentation on changes to SBA's organizational structure from fiscal years 2005-2014 (following SBA's last major reorganization in 2004); analyzed data on fiscal year 2013 regional budgets (the most recent data SBA provided);

and interviewed a total of 60 SBA officials at headquarters, all 10 regional offices, and a nongeneralizable sample of 10 of the 68 district offices (one from each region reflecting a variety of sizes). This paper discusses Ukraine's Request for a Stand-by Arrangement. Ukraine's economy had been in recession since mid-2012. Inconsistent macroeconomic policies pursued in 2012-2013 aggravated deep-seated vulnerabilities and eventually generated a balance-of-payment crisis. Key objectives of the authorities' program are to restore macroeconomic stability, strengthen economic governance and transparency, and lay the foundation for robust and balanced economic growth. To achieve these objectives, the government will implement immediate measures aimed at securing stability, combined

with deeper reforms to achieve and sustain external sustainability, ensure financial stability, restore sound public finances, rationalize the energy sector, and improve the business environment. This book provides advice and sample questions for the Part 1 MRCOG examination. Ukraine requested a 24-month SDR 10.976 billion exceptional access Stand-By Arrangement (SBA) in April 2014 against the backdrop of large internal and external imbalances, considerable domestic political upheaval, and an emerging conflict in the East. Inconsistent macroeconomic policies in the preceding years had led to a potent combination of an overvalued pegged exchange rate, large and growing twin deficits, and a weak banking system by end-2013. Domestic political turmoil and conflict in Crimea and Eastern Ukraine added to these problems, creating an urgent need for financial assistance from the international community. The 2014 SBA (of about \$17 billion) was Ukraine's third since 2008. The Code of Federal Regulations Title 13 contains the codified Federal laws and regulations that are in effect as of the date of the publication pertaining to business credit and assistance, including: economic development; small business development, assistance and guaranteed Federal disaster loans. The book is structured around seven modules or building blocks designed to be taught across a full semester with natural break points built into each chapter within the modules. The building blocks present macro-concepts which are explored in greater detail in each of the chapters. A starting chapter provides guidance about the use of cases for students and a concluding chapter delivers information about how to win business plan competitions. Each concept is illustrated by a short case, and

followed by thoughtful questions to enhance learning. The cases, previously unpublished, are written by an international group of experienced case writers from the field of finance, and deal with real companies, real problems, and currently unfolding issues. A case teaching manual geared to finance in general, and short cases in particular, is provided for the instructor and includes specific tips, techniques, and activities for each case in the text. Through use of practical examples and a plainspoken narrative style that minimises the use of maths, this book demystifies data concepts, sources, and methods for public service professionals

interested in understanding economic and social issues at the regional level. By blending elements of a general interest book, a textbook, and a reference book, it equips civic leaders, public administrators, urban planners, nonprofit executives, philanthropists, journalists, and graduate students in various public affairs disciplines to wield social and economic data for the benefit of their communities. While numerous books about quantitative research exist, few focus specifically on the public sector. Running the Numbers, in contrast, explores a wide array of topics of regional importance, including economic output, demographics, business structure, labour markets, and income, among many others. To that end, the book stresses practical applications, minimises the use of maths, and employs extended, chapter-length examples that demonstrate how analytical tools can illuminate the social and economic workings of actual American regions. The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king! Our national security increasingly depends on access to the most sophisticated and advanced technology. Yet the next time we set out to capture a terrorist leader, we may fail. Why? The answer lies in a conflict between two worlds. One is the dynamic, global, commercial world with its thriving innovations. The other is the world of national security, in which innovation is a matter of life or death. The conflict is about secrecy. Innovating in a Secret World is a detailed examination of the U.S. government and innovation landscapes and of the current trends in often secret national security-related research and development (R&D). Based on case studies, detailed research, and interviews with executives at Fortune 500s, startup entrepreneurs, and military directors and program managers, this accessible and timely book is a must-read. Tina P. Srivastava evaluates whether the strategy of technology innovation in the world of national security leaves certain innovations behind or unintentionally precludes certain classes of innovators from participating. She identifies the unintended consequences and emergent behaviors of this conflict. This examination unfolds in a complex, dynamic system that includes the legal framework in which technology innovation must exist. For more than a decade Srivastava has been on the front lines of cutting-edge technology innovation. She suggests focusing on an emerging class of R&D strategy called "open

innovation"--a strategy that broadens participation in innovation beyond an individual organization or division traditionally assigned to perform R&D activities. Through compelling stories of commercial and early government applications, she shows how open technology innovation strategies can enable, accelerate, and enhance technology innovation. Successful incorporation of open innovation into the previously closed U.S. government R&D landscape can yield profound benefits to both national security and global leadership.
