Did you know that animals use body odors to help them survive? They also use their scents to communicate. Find out how animals use different scents. This title supports NGSS standards for *Biological Evolution: Unity and Diversity*. Meet Homer Pudding, an ordinary farm boy who's got big dreams-to follow in the footsteps of his famous treasure-hunting uncle. But when Uncle Drake mysteriously disappears, Homer inherits two things: a lazy, droopy dog with no sense of smell, and a mystery. Why would his uncle call this clumsy dog his "most treasured possession?" And why did he put a gold coin on the dog's collar? And who will continue Uncle Drake's quest-to find the most coveted pirate treasure in the world? Join Homer, his sister Gwendolyn, and Dog on an adventure that will test their wits and courage as they leave their peaceful

farm and head into a world where ruthless treasure hunters hide around every corner. Where they discover that Dog has a hidden talent and that treasure might be closer than they ever imagined... From the gene that causes people to age prematurely to the "bitter gene" that may spawn broccoli haters, this book explores a few of the more exotic locales on the human genome, highlighting some of the tragic and bizarre ways our bodies go wrong when genes fall prey to mutation and the curious ways in which genes have evolved for our survival. Lisa Seachrist Chiu offers here a smorgasbord of stories about rare and not so rare genetic quirks--the gene that makes some people smell like a fish, the Black Urine Gene, the Werewolf Gene, the Calico Cat Gene. We read about the Dracula Gene, a mutation in zebra fish that causes blood cells to explode on contact with light, and suites of genes that also influence behavior and physical characteristics. The Tangier Island Gene, first discovered after physicians discovered a boy with orange tonsils (scientists now realize that the child's odd condition comes from an inability to process cholesterol). And Wilson's Disease, a gene defect that fails to clear copper from the body, which can trigger schizophrenia and other neurological symptoms, and can be fatal if left untreated. On the plus side, we read about the Myostatin gene, a mutation which allows muscles to

become much larger than usual and enhances strength--indeed, the mutations have produced beefier cows and at least one stronger human. And there is also the much-envied Cheeseburger Gene, which allows a lucky few to eat virtually anything they want and remain razor thin. While fascinating us with stories of genetic peculiarities, Chiu also manages to explain much cutting-edge research in modern genetics, resulting in a book that is both informative and entertaining. It is a must read for everyone who loves popular science or is curious about the human body.

Boys, basketball, barf -- the perfect middle grade novel! Nick wants to convince the coach that he's a point guard, get rid of Dwayne-the-dork, and stop missing his mother. But that's tough to do when he can't keep the ball away from Carson Jones, the dork is his stepbrother, the honor code's a joke, and he's been splattered with something worse-smelling than ham.

It is a must read for everyone who loves popular science or is curious about the human body. The title of this book, *I May Smell Like Bacon But I Haven't Oinked Yet*, speaks to the resiliency of Richard Allen Warner, Captain USMC (ret.). The Marine Corps motto: *Semper Fidelis* (always faithful) attests to the character of this man. And the three core values of the Marine Corps: Honor, Courage, and Commitment exemplify his life. HONOR: Discipline at an early age set the stage for his accomplishments. Obeying and honoring his parents were paramount. "Please Mom. I won't do it again!" he pleaded. "That's the purpose of this whipping!" she affirmed. "How dare you give your

mother **THE LOOK!**" his dad fumed. "You're going to the basement with me!" **COURAGE:** Richard's first step in this direction occurred when he defied his mother. "Well, I've been thinking about joining the Navy." "Listen hear young man! I've told you several times that you are going to college!" "No Mom, I've made up my mind!" **COMMITMENT:** Richard was committed to his military service and his family. In the summer of 1970, he took his family westward from Florida on an educational tour to visit the Western States' Capitals.

You Smell! is a hilarious, surprising and scientific look at your sense of smell. A great read for kids aged 7 to 11. Everyone smells! The sense of smell plays a crucial part in survival, communication, and taste, and is the basis of a multi-billion-dollar industry. But, despite all this, it's the sense we often know least about. This hilarious and fact-packed book puts that right. Find out everything you could ever want to know about stinks, whiffs and pongs, from the fruit so pungent it's banned from public transport to the top-secret military programme developing the stinkiest stink bomb. You'll get up close and personal with the world's biggest stinkers, from peeing pandas to toxic-breathed kings. You'll learn how smells have helped to build empires and bring down entire cities, and how super-stinky inventions are still changing our world. •A surprising, scientific and very silly look at your smelliest sense,

packed with pungent facts! • Find out about flowers that smell like rotting flesh, meet professional armpit sniffers, and discover how space smells (like rotten eggs and almonds)! • Written by Clive Gifford, winner of the Blue Peter Award for the Best Book with Facts and the Royal Society Young People's Book Prize. How do we know when it's time to eat? Sometimes, it's because we smell something yummy cooking! Early readers dive nose-first into the world of the smells around them, including bad smells like a garbage dump or good smells like apple pie. Accessible language and strong picture-text correlation introduces readers to all of the things the nose knows! Gavin Pretor-Pinney, author of *The Cloudspotter's Guide* Why doesn't rain fall all at once? Can technology change the track of a hurricane? What's the weather like on other planets? Meteorologists Simon King and Clare Nasir reveal the captivating ways the weather works, from exploring incredible weather phenomenon (how are rainbows formed?), expertly breaking down our knowledge of the elements (could we harness the power of lightning?) to explaining the significance of weather in history (has the weather ever started a war?) and discussing the future of weather (could climate modification save the planet?). In *What Does Rain Smell Like?* Simon and Clare uncover the thrilling science behind a subject that affects us all. They unearth and analyse all aspects of the weather and how it changes our lives

through answering our most curious questions about the world around us. An extraordinary, strange, and startlingly beautiful exploration of smell, the least understood of our five senses The nose on your face is the Buckingham Palace Guard of your body, the maitre d' of all taste, as well as the seducer of your imagination, and memory—and Jude Stewart has charmed them all into a wicked, poetic and illuminating tour of their mysterious domains. —Jack Hitt, author of *Bunch of Amateurs* Overlapping with taste yet larger in scope, smell is the sense that comes closest to pure perception. Smell can collapse space and time, unlocking memories and transporting us to worlds both new and familiar. Yet as clearly as each of us can recognize different smells--the bright tang of citrus, freshly sharpened pencils, parched earth after rain--few of us understand how and why we smell. In *Revelations in Air*, Jude Stewart takes us on a fascinating journey into the weird and wonderful world of smell. Beginning with lessons on the incredible biology and history of how our noses work, Stewart teaches us how to use our noses like experts. Once we're properly equipped and ready to sniff, Stewart explores a range of smells—from lavender, cut grass and hot chocolate to cannabis and old books—using smell as a lens into art, history, science, and more. With an engaging colorful design and exercises for readers to refine their own skills,

Revelations in Air goes beyond science or history or chemistry--it's a doorway into the surprising, pleasurable, and unfamiliar landscape of smell. How to Smell Like God is filled with humorous and gripping true stories to help teens discover what it really means to know God, serve Jesus, and be led by the Holy Spirit. After each story readers are challenged to apply the message to their own lives. If I Smell Like Mints I Was Feeding My Horse... If I Smell Like Manure I Tripped

Autobiographical stories and drawings by the artist and AIDS activist featured in the

new documentary by Chris McKim. For most of his life, David Wojnarowicz considered himself the ultimate outsider and a true invisible man. "I'm a blank spot in a hectic civilization," he writes in this fierce and unforgettable collection of four blistering autobiographical pieces, illustrated with his own arresting ink drawings. Wojnarowicz, who died of AIDS in New York City at the age of thirty-seven, left behind a body of work that was staggering in its variety and originality. Painter, writer, photographer, performance artist, and filmmaker, he made an indelible mark on virtually every stage of the national arts scene. Yet nowhere does his anger, love, or compassion show itself as strongly as in his writing, which earned a Lambda Literary Award and prompted critics to call him the Jack Kerouac of his generation. The horrors of Wojnarowicz's past inform his literature—his years spent as a child prostitute and living homeless on the New York streets, his outspoken, very public battle against the disease that would eventually take his life, and the entrenched government bureaucracy that sat by and did nothing. The world as seen through Wojnarowicz's eyes in these four masterful short works is stark, cruel, and cold—and yet gloriously alive, ennobled by surprising acts of heartrending humanity. Memories That Smell Like Gasoline is a celebration of sorts: of sex, of love, of art, and of having truly lived.

EVER WONDERED . . . Why we burp? What a wotsit is? Whether lemmings really jump off cliffs? Why vomit always contains carrots? And why do farts smell like rotten eggs? No subject is too strange and no trivia too tough for Mitchell Symons, who has the answer to these crazy questions, and many more. Paul writes in 2 Corinthians 2:15, that Christians are the aroma of Christ. How can this generation smell like God? By knowing, loving and trusting Him.²¹ humorous or gripping true stories, each ending with a challenge to apply a biblical truth. It's spiritual aromatherapy for teens! Above all else, guard your heart, for it is the wellspring of life. -- Proverbs 4:23 They Smell like Sheep, Volume 2: Leading with the Heart of a Shepherd is about more than gimmicks and techniques of leadership. It speaks to the character and heart of the leader. After all, heart makes the difference in an effective Sunday-school teacher, youth minister, elder, small-group leader, parent, grandparent, or Christian school teacher. Spiritual sheep, stray sheep, and searching sheep aren't nearly as concerned about the knowledge and skill of the shepherd as they are about his heart. When finding their way -- at weddings, at funerals, during family crises, and in the hospital -- sheep go to a shepherd in whom they discern God's own heart, like King David of old. Jesus said sheep would know their shepherd's voice and be drawn to it.

It is the heart behind the voice that soothes and comforts God's people. How do you measure the influence of a godly shepherd? Without doubt, it's the heart of the shepherd that most powerfully shapes lives and souls in our flocks. If you want your own heart shaped and molded into the likeness of Christ, this book is an excellent place to begin. Be shepherds of God's flock under your care... as God wants you to be. Heeding the call to be a leader is an awesome responsibility. Whether you have been called to serve as a minister or you're teaching an adult Bible study group or you're a teen leading the youth group in song, most assuredly from time to time you question your abilities and look for support and example. Author Lynn Anderson addresses the starting and ending place of true leadership among God's people: the heart of a shepherd. He presents Jesus, the Head Shepherd, as our only reliable model of godly leadership; he guides us through the Scriptures and gives us practical exercises to strengthen our hearts as we do the difficult yet rewarding work of shepherding people of God with love and grace. Enter the book's pages with the confidence that you are being led by someone who has the heart of a shepherd and who sees himself first as a smelly sheep, dearly loved and led by the Good Shepherd. And when the Chief Shepherd appears, you will receive the crown of glory. -- 1 Peter 5:4 What did

nineteenth-century cities smell like? And how did odors matter in the formation of a modern environmental consciousness? Smell Detectives follows the nineteenth-century Americans who used their noses to make sense of the sanitary challenges caused by rapid urban and industrial growth. Melanie Kiechle examines nuisance complaints, medical writings, domestic advice, and myriad discussions of what constituted fresh air, and argues that nineteenth-century city dwellers, anxious about the air they breathed, attempted to create healthier cities by detecting and then mitigating the most menacing odors. Medical theories in the nineteenth century assumed that foul odors caused disease and that overcrowded cities—filled with new and stronger stinks—were synonymous with disease and danger. But the sources of offending odors proved difficult to pinpoint. The creation of city health boards introduced new conflicts between complaining citizens and the officials in charge of the air. Smell Detectives looks at the relationship between the construction of scientific expertise, on the one hand, and “common sense”—the olfactory experiences of common people—on the other. Although the rise of germ theory revolutionized medical knowledge and ultimately undid this form of sensory knowing, Smell Detectives recovers how city residents used their sense of smell and their health

concerns about foul odors to understand, adjust to, and fight against urban environmental changes. Only \$6.99!
