Early Modern Europe, 1450-1789 Feb 15 2022 Thoroughly updated edition of a best-selling, acclaimed book, placing early modern European history in a global and environmental context.

Illustration and Ornamentation in the Iberian Book World, 1450-1800 Mar 07 2021 "In the early modern Iberian book world, as in the European book world more broadly, most works issuing from the presses contained some form of ornamentation. The nineteen contributions presented here cast light on these visual elements--on the production and ownership of printers' materials, and on the frequency with which these materials were exchanged and shared. A third of all items printed in the early modern Iberian world carried no imprint at all; for these items, woodblocks and engravings can assist scholars seeking to identify their place of origin or their date of publication. As importantly, decoration and illustration in early print can also reveal much about the history of the graphic arts and evolving forms of cultural representation"--

[The Early Modern World, 1450-1750](#) Mar 31 2023 [The Early Modern World, 1450-1750: Seeds of Modernity](#) takes a distinctive approach to global history and enables a holistic view of the world during this period, without prioritizing any one nation or region. It guides students towards an understanding of how different empires, nations, communities and individuals constructed, contested and were touched by major trends and events. Its thematic structure covers politics, technology, economics, the environment and intellectual and religious worldviews. In order to connect global trends and events to human experiences, each chapter is underpinned by a social and cultural history focus, enabling the reader to gain an understanding of the lived human experience and make sense of various perspectives and worldviews. The 'Legacy' feature also discusses connections between early modern history and the contemporary world, looking at how the past is contested or memorialized today. The result is a textbook that helps the 21st-century student gain a rich and nuanced understanding of the global history of the early modern period.

Studying Early Printed Books, 1450-1800 May 28 2020 A comprehensive resource to understanding the hand-press printing of early books [Studying Early Printed Books, 1450 - 1800](#) offers a guide to the fascinating process of how books were printed in the first centuries of the press and shows how the mechanics of making books shapes how we read and understand them. The author offers an insightful overview of how books were made in the hand-press period and then includes an in-depth review of the specific aspects of the printing process. She addresses questions such as: How was paper made? What were different book formats? How did the press work? In addition, the text is filled with illustrative examples that demonstrate how understanding the early processes can be helpful to today's researchers. [Studying Early Printed Books](#) shows the connections between the material form of a book (what it looks like and how it was made), how a book conveys its meaning and how it is used by readers. The author helps readers navigate books by explaining how to tell which parts of a book are the result of early printing practices and which are a result of later changes. The text also offers guidance on: how to approach a book; how to read a catalog record; the difference between using digital facsimiles and books in-hand. This important guide: Reveals how books were made with the advent of the printing press and how they are understood today Offers information on how to use digital reproductions of early printed books as well as how to work in a rare books library Contains a useful glossary and a detailed list of recommended readings Includes a companion website for further research Written for students of book history, materiality of text and history of information, [Studying Early Printed Books](#) explores the many aspects of the early printing process of books and explains how their form is understood today.

[Merchant Networks in the Early Modern World, 1450-1800](#) Dec 28 2022 Merchant organisation was a global phenomenon in the early modern era, and in the growing contacts between peoples and cultures, merchants may be seen as privileged intermediaries. This collection is unique in essaying a truly global coverage of mercantile activities, from the Wangara of the Central Sudan, Mississippi and Huron Indians, to the role of the Jews, the Muslim merchants of Anatolia, to the social structure of the mercantile classes in early modern England. The histories of merchant communities are not their histories alone, but also the histories of assumptions concerning their contexts. From the comparative perspective adopted here, it emerges that in markets where Western European merchants vied for place with competitors from the Near East, South Asia or East Asia, they were very often unsuccessful.

[The Book Worlds of East Asia and Europe, 1450-1850](#) May 09 2021 This volume provides the first comparative survey of the relations between the two most active book worlds in Eurasia between 1450 and 1850. Prominent scholars in book history explore different approaches to publishing, printing, and book culture. They discuss the extent of technology transfer and book distribution between the two regions and show how much book historians of East Asia and Europe can learn from one another by raising new questions, exploring remarkable similarities and differences in these regions' production, distribution, and consumption of books. The chapters in turn show different ways of writing transnational comparative history. Whereas recent problems confronting research on European books can instruct researchers on East Asian book production, so can the privileged role of noncommercial publications in the East Asian textual record highlight for historians of the European book the singular contribution of commercial printing and market demands to the making of the European printed record. Likewise, although production growth was accompanied in both regions by a wider distribution of books, woodblock technology's simplicity and mobility allowed for a shift in China of its production and distribution sites farther down the hierarchy of urban sites than was common in Europe. And, the different demands and consumption practices within these two regions' expanding markets led to different genre preferences and uses as well as to the growth of distinctive female readerships. A substantial introduction pulls the work together and the volume ends with an essay that considers how these historical developments shape the present book worlds of Eurasia. "This splendid volume offers expert new insight into the ways of producing, financing, distributing, and reading printed books in early modern Europe and East Asia. This is comparative history at its best, which leaves us with a better understanding of each context and of the challenges common to book cultures across space and time." —Ann Blair, author of *Too Much to Know: Managing Scholarly Information before the Modern Age* and professor of history, Harvard University "This engrossing account of the history of the book by leading specialists on the European and East Asian publishing worlds takes stock of what we know—and how much we still need to know—about the places that books had in the lives of our early modern forebears. Each chapter is masterful state-of-the-field coverage of its subject, and together they set a new standard for future studies of the book, East and West." —Timothy Brook, author of *The Troubled Empire: China in the Yuan and Ming Dynasties*

[The Long Nineteenth Century, 1750-1914](#) Oct 14 2021 [The Long Nineteenth Century, 1750-1914](#) is a global history textbook with a difference. It is a guide for students to the actions and experiences by which communities and individuals in different parts of the world constructed, contested, and were affected by major trends and events in the global past. The book explores the global history of the 19th century holistically. Its content is framed in chapters that tackle themes rather than geographic regions or chronological subdivisions. Moreover, in order to connect human experiences and perspectives with global trends and events, each chapter – whether it focuses on politics or religion, economics or environment – is underpinned by an approach emphasizes social and cultural history. Through its pages, students critically encounter important global trends and key events from the Industrial Revolution to the Taiping Heavenly Kingdom. The book ends with an epilogue on the First World War that brings all of the themes of the volume together in one place and also provides a segue into the mid-20th century.

Printing and Prophecy Mar 19 2022 **Printing and Prophecy: Prognostication and Media Change 1450-1550** examines prognostic traditions and late medieval prophetic texts in the first century of printing and their effect on the new medium of print. The many prophetic and prognostic works that followed Europe's earliest known printed book---not the Gutenberg Bible, but the Sibyl's Prophecy, printed by Gutenberg two years earlier and known today only from a single page---over the next century were perennial best sellers for many printers, and they provide the modern observer with a unique way to study the history and inner workings of the print medium. The very popularity of these works, often published as affordable booklets, raised fears of social unrest. Printers therefore had to meet customer demand while at the same time channeling readers' reactions along approved paths. Authors were packaged---and packaged themselves---in word and image to respond to the tension, while leading figures of early modern culture such as

Paracelsus, Martin Luther, and Sebastian Brant used printed prophecies for their own purposes in a rapidly changing society. Based on a wide reading of many sources, *Printing and Prophecy* contributes to the study of early modern literature, including how print changed the relationship among authors, readers, and texts. The prophetic and astrological texts the book examines document changes in early modern society that are particularly relevant to German studies and are key texts for understanding the development of science, religion, and popular culture in the early modern period. By combining the methods of cultural studies and book history, this volume brings a new perspective to the study of Gutenberg and later printers.

Early Modern Women's Letter Writing, 1450-1700 Jan 05 2021 This landmark book of essays examines the development of women's letter writing from the late fifteenth to the early eighteenth century. It is the first book to deal comprehensively with women's letter writing during the Late Medieval and Early Modern period and shows that this was a larger and more socially diversified area of female activity than has generally been assumed. The essays, contributed by many of the leading researchers active in the field, illustrate women's engagement in various activities, both literary and political, social and religious.

War In The Early Modern World, 1450-1815 Nov 26 2022 This book presents a collection of essays charting the developments in military practice and warfare across the world in the early modern period. It also considers the nature and role of technological change, and the relationship between military developments and state-building.

War in Europe Jan 17 2022 War in Europe is an overview of war and military development in Europe since 1450, bringing together the work of a renowned historian of modern European and military history in a single authoritative volume. Beginning with the impact of the Reformation and continuing up to the present day, Jeremy Black discusses the following key themes: long-term military developments, notably in the way war is waged and battle conducted the relationship between war and transformations in the European international system the linkage between military requirements and state developments the consequences of these requirements, and of the experience of war, for the nature of society Adopting a clear chronological approach, Black weaves a rich and detailed narrative of the development of war in relation to transformations in the European international system, demonstrating the links between its causes and consequences in the military, political and social spheres. Assimilating decades of important research as well as bringing new perspectives to the topic, War in Europe is a key text for students taking courses in European history, international relations and war studies.

The Russian Empire 1450-1801 Apr 27 2020 Russia's imperial past has shaped modern Russian identity and historical experience. The Russian Empire 1450-1801 surveys the empire's emergence and governance, exploring how the state maintained control of defense, criminal law, taxation, and mobilization of resources, while tolerating local religions, languages, cultures, and institutions.

Literary Forgery in Early Modern Europe, 1450-1800 Aug 31 2020 "The essays gathered in this volume demonstrate that studying early modern European literary forgeries is a fascinating cultural adventure" (Lina Bolzoni author of *The Gallery of Memory*). This comprehensive study of literary and historiographical forgery goes well beyond questions of authorship. It spotlights the imaginative vitality of forgery and its sinister impact on genuine scholarship. This volume demonstrates that early modern forgery was a literary tradition in its own right, with distinctive connections to politics, Greek and Roman classics, religion, philosophy, and modern literature. The early modern explosion in forgery of all kinds—particularly in the fields of literary and archaeological falsification—demonstrates a dramatic shift in attitudes toward historical evidence and in the relation of texts to contemporary society. The authors capture the impact of this evolution within many cultural transformations, including the rise of print, changing tastes and fortunes of the literary marketplace, and the Protestant and Catholic Reformations. The thirteen essays draw on Johns Hopkins University's *Bibliotheca Fictiva*, the world's premier research collection dedicated exclusively to the subject of literary forgery. It consists of several thousand rare books and unique manuscript materials from the early modern period and beyond. O'Connell, Ingrid Rowland, Walter Stephens, Elly Truitt, Kate Tunstall

Reformation Jan 23 2020

The Refashioning of Catholicism, 1450-1700 Oct 02 2020 Unlike the traditional terms Counter-Reformation or Catholic Reform, this book does not see Catholicism from 1450 to 1700 primarily in relationship to the Protestant Reformation but as both shaped by the revolutionary changes of the early modern period and actively refashioning itself in response to these changes: the emergence of the early modern state; economic growth and social dislocation; the expansion of Europe across the seas; the Renaissance; and, to be sure, the Protestant Reformation. Bireley devotes particular attention to new methods of evangelization in the Old World and the New, education at the elementary, secondary and university levels, the new active religious orders of women and men, and the effort to create a spirituality for the Christian living in the world. A final chapter looks at the issues raised by Machiavelli, Galileo and Pascal. Robert Bireley is a leading Jesuit historian and uniquely well placed to reassess this centrally important subject for understanding the dynamics of early modern Europe. This book will be of great value to all those studying the political, social, religious and cultural history of the period.

The Information Revolution in Early Modern Europe Dec 24 2019 This provocative new history of early modern Europe argues that changes in the generation, preservation and circulation of information, chiefly on newly available and affordable paper, constituted an 'information revolution'. In commerce, finance, statecraft, scholarly life, science, and communication, early modern Europeans were compelled to place a new premium on information management. These developments had a profound and transformative impact on European life. The huge expansion in paper records and the accompanying efforts to store, share, organize and taxonomize them are intertwined with many of the essential developments in the early modern period, including the rise of the state, the Print Revolution, the Scientific Revolution, and the Republic of Letters. Engaging with historical questions across many fields of human activity, Paul M. Dover interprets the historical significance of this 'information revolution' for the present day, and suggests thought-provoking parallels with the informational challenges of the digital age.

Europe 1450 to 1789 Apr 19 2022

Early Modern Europe, 1450-1789 Oct 26 2022 "The title of this book, and perhaps also of the course for which you are reading it, is Early Modern Europe. The dates in the title inform you about the chronological span covered (1450-1789), but they do not explain the designation "early modern." That term was developed by historians seeking to refine an intellectual model first devised during this very period, when scholars divided European history into three parts: ancient (to the end of the Roman Empire in the west in the fifth century), medieval (from the fifth century to the fifteenth), and modern (from the fifteenth century to their own time). In this model, the break between the Middle Ages and the modern era was marked by the first voyage of Columbus (1492) and the beginning of the Protestant Reformation (1517), though some scholars, especially those who focused on Italy, set the break somewhat earlier with the Italian Renaissance. This three-part periodization became extremely influential, and as the modern era grew longer and longer, historians began to divide it into "early modern" - from the Renaissance or Columbus to the French Revolution in 1789 - and what we might call "truly modern" - from the French Revolution to whenever they happened to be writing"--

The Early Modern World, 1450-1750 Feb 27 2023 *The Early Modern World, 1450-1750: Seeds of Modernity* takes a distinctive approach to global history and enables a holistic view of the world during this period, without prioritizing any one nation or region. It guides students towards an understanding of how different empires, nations, communities and individuals constructed, contested and were touched by major trends and events. Its thematic structure covers politics, technology, economics, the environment and intellectual and religious worldviews. In order to connect global trends and events to human experiences, each chapter is underpinned by a social and cultural history focus, enabling the reader to gain an understanding of the lived human experience and make sense of various perspectives and worldviews. Europeans Abroad, 1450-1750 Jul 31 2020 David Ringrose looks beyond the traditional history of European expansion—which highlights European conquests, empire building, and hegemony—in order to explore the more human and genuinely cross-cultural dimensions of Europeans abroad before 1750.

The Rise of Modern Diplomacy 1450 - 1919 Mar 26 2020 Though international relations and the rise and fall of European states are widely studied, little is available to students and non-specialists on the origins, development and operation of the diplomatic system through which these relations were conducted and regulated. Similarly neglected are the larger ideas and aspirations of international diplomacy that gradually emerged from its immediate functions. This impressive survey, written by one of our most experienced international historians, and covering the 500 years in which European diplomacy was largely a world to itself, triumphantly fills that gap.

The Iberian World Jun 09 2021 *The Iberian World: 1450-1820* brings together, for the first time in English, the latest research in Iberian studies, providing in-depth analysis of fifteenth- to early nineteenth-century Portugal and Spain, their European possessions, and the African, Asian, and American peoples that were under their rule. Featuring innovative work from leading historians of the Iberian world, the book adopts a strong transnational and comparative approach, and offers the reader an interdisciplinary lens through which to view the interactions, entanglements, and conflicts between the many peoples that were part of it. The volume also analyses the relationships and mutual influences between the wide range of actors, polities, and centres of power within the Iberian monarchies, and draws on recent advances in the field to examine key aspects such as Iberian expansion, imperial ideologies, and the constitution of colonial societies. Divided into four parts and combining a chronological approach with a set of in-depth thematic studies, *The Iberian World* brings together previously disparate scholarly traditions surrounding the history of European empires and raises awareness of the global dimensions of Iberian history. It is essential reading for students and academics of early modern Spain and Portugal.

Reformations May 01 2023 This fast-paced survey of Western civilization's transition from the Middle Ages to modernity brings that tumultuous period vividly to life. Carlos Eire, popular professor and gifted writer, chronicles the two-hundred-year era of the Renaissance and Reformation with particular attention to issues that persist as concerns in the present day. Eire connects the Protestant and Catholic Reformations in new and profound ways, and he demonstrates convincingly that this crucial turning point in history not only affected people long gone, but continues to shape our world and define who we are today. The book focuses on the vast changes that took place in Western civilization between 1450 and 1650, from Gutenberg's printing press and the subsequent revolution in the spread of ideas to the close of the Thirty Years' War. Eire devotes equal attention to the various Protestant traditions and churches as well as to Catholicism, skepticism, and secularism, and he takes into account the expansion of European culture and religion into other lands, particularly the Americas and Asia. He also underscores how changes in religion transformed the Western secular world. A book created with students and nonspecialists in mind, *Reformations* is an inspiring, provocative volume for any reader who is curious about the role of ideas and beliefs in history.

Women in World History Feb 24 2020 *Women in World History* brings together the most recent scholarship in women's and world history in a single volume covering the period from 1450 to the present, enabling readers to understand women's relationship to world developments over the past five hundred years. Women have served the world as unfree people, often forced to migrate as slaves, trafficked sex workers, and indentured laborers working off debts. Diseases have migrated through women's bodies and women themselves have deliberately spread religious belief and fervor as well as ideas. They have been global authors, soldiers, and astronauts encircling the globe and moving far beyond it. They have written classics in political and social thought and crafted literary and artistic works alongside others who were revolutionaries and reform-minded activists. Historical scholarship has shown that there is virtually no part of the world where women's presence is not manifest, whether in archives, oral testimonials, personal papers, the material record, evidence of disease and famine, myth and religious teachings, and myriad other forms of documentation. As these studies mount, the idea of surveying women's

past on a global basis becomes daunting. This book aims to redress this situation and offer a synthetic world history of women in modern times.

Food and Health in Early Modern Europe Apr 07 2021 CHOICE Outstanding Academic Title 2016 Food and Health in Early Modern Europe is both a history of food practices and a history of the medical discourse about that food. It is also an exploration of the interaction between the two: the relationship between evolving foodways and shifting medical advice on what to eat in order to stay healthy. It provides the first in-depth study of printed dietary advice covering the entire early modern period, from the late-15th century to the early-19th; it is also the first to trace the history of European foodways as seen through the prism of this advice. David Gentilcore offers a doctor's-eye view of changing food and dietary fashions: from Portugal to Poland, from Scotland to Sicily, not forgetting the expanding European populations of the New World. In addition to exploring European regimens throughout the period, works of materia medica, botany, agronomy and horticulture are considered, as well as a range of other printed sources, such as travel accounts, cookery books and literary works. The book also includes 30 illustrations, maps and extensive chapter bibliographies with web links included to further aid study. Food and Health in Early Modern Europe is the essential introduction to the relationship between food, health and medicine for history students and scholars alike.

Europe's Reformations, 1450-1650 Sep 12 2021 In this widely praised history, noted scholar James D. Tracy offers a comprehensive, lucid, and masterful exploration of early modern Europe's key turning point. Establishing a new standard for histories of the Reformation, Tracy explores the complex religious, political, and social processes that made change possible, even as he synthesizes new understandings of the profound continuities between medieval Catholic Europe and the multi-confessional sixteenth and seventeenth centuries. This revised edition includes new material on Eastern Europe, on how ordinary people experienced religious change, and on the pluralistic societies that began to emerge. Reformation scholars have in recent decades dismantled brick by brick the idea that the Middle Ages came to an abrupt end in 1517. Martin Luther's Ninety-five Theses fitted into an ongoing debate about how Christians might better understand the Gospel and live its teachings more faithfully. Tracy shows how Reformation-era religious conflicts tilted the balance in church-state relations in favor of the latter, so that the secular power was able to dictate the doctrinal loyalty of its subjects. Religious reform, Catholic as well as Protestant, reinforced the bonds of community, while creating new divisions within towns, villages, neighborhoods, and families. In some areas these tensions were resolved by allowing citizens to profess loyalty both to their separate religious communities and to an overarching body-politic. This compromise, a product of the Reformations, though not willed by the reformers, was the historical foundation of modern, pluralistic society. Richly illustrated and elegantly written, this book belongs in the library of all scholars, students, and general readers interested in the origins, events, and legacy of Europe's Reformation.

The World from 1450 to 1700 Jul 23 2022 In *The World from 1450 to 1700*, historian John Wills takes a fresh look at one of the most fascinating and tumultuous periods in world history. Assuming a global perspective, rather than the traditional Eurocentric view, Wills traces the interwoven changes that led from the world of Columbus, Luther, and the Mughal emperor Babur to the world of Locke, Louis XIV, and the Kangxi emperor. The book's multi-centered approach explores historical events not in isolation but rather in a dynamic nexus of connections ranging from the Italian Renaissance and the Protestant Reformation to the Sikh, Hindu, and Confucian revivals; from the transformation of Japan in 1600 to the forced migrations of millions of African slaves; from the English Civil War and expanding Qing and Muscovite empires in Asia to new forms of scientific knowledge and parliamentary democracy in Europe. It is an interlocking world of change and movement, innovation and conquest, and Wills marshals his extraordinary narrative skill and breadth of learning to bring this period vibrantly to life.

Gems in the Early Modern World Aug 24 2022 This edited collection is an interdisciplinary study of gems in the early modern world. It examines the relations between the art, science, and technology of gems, and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organized into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion, and how they were pulled together in the course of their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem, and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing, and mounting gems, and how these skills were transmitted and articulated by artisans. The common themes of all these chapters are materials, knowledge and global trade. The contributors to this volume focus on the material properties of gems such as their weight and hardness, on the knowledge involved in exchanging them and valuing them, and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.
