**Apricots** Oct 09 2021 Lieutenant Robert Forrest joined the Marines because his father was a Marine. His whole life he felt the pull of patriotism rooted in his Marine Corps upbringing. But after the Vietnam war, he doubts the Country he's sworn to serve. The collapse of the Republic of Vietnam in 1975 confirmed defeat of the U.S. - and the wasted sacrifice of 58,000 American lives. Getting killed for a lost cause in an unnecessary War is Forrest's greatest fear. In 1983, eight years after Saigon fell, Lieutenant Robert Forrest leads a Marine platoon bound for Beirut. Along the way, the Marines invade Grenada and then move on to Beirut. Can Forrest reconcile his service with his doubts? Will the Marines all make it out alive? Or will Forrest's worst fears be realized? Set against the backdrop of a post-Vietnam world, Apricots tells the harrowing story of one Lieutenant and his platoon as they fight in Grenada, the last Combat of the Cold War, and then move onto Beirut to fight the first battles in the War on Terror.

**Verdura** Jun 17 2022 "A wonderful cookbook with the very best authentic Italian recipes . . . Flick through it and you can feel immediately transported to a table under an olive tree" (The Sunday Tribune). Named One of the Top 100 Cookbooks of the Last 25 Years by Cooking Light! Verdura has become a classic that readers turn to as their vegetable cooking bible—with irresistible recipes representing the best of the Italian approach to vegetable preparation, an earthy yet spirited technique that celebrates fresh ingredients simply treated. Contending that eating well-prepared vegetables helps us to appreciate life's natural cycles, Viana La Place presents recipes for antipastos, salads, soups, sandwiches, pasta, risottos, pizzas, and much more. The vegetables she explores run from the familiar—artichokes, aubergines, radicchio—to the more exotic, such as chayote, cardoons, and brocciflower. (Sauté her cauliflower-broccoli hybrid in garlic and oil—then top it with pungent provolone!) Other recipes, such as Soup of Dried Broad Beans with Fresh Fennel; Fettucine with Peas, Spring Onions, and Mint; Grilled Bread with Raw Mushroom Salad; and Baked Red Pepper Frittata; give further evidence of the author's original yet thoughtful way with the earth's bounty. Desserts are also included, among them Watermelon with Bittersweet Chocolate Shavings; Grilled Figs with Honey and Walnuts; and Lemon Granita and Brioches. With a vegetable and herb guide and an ingredient glossary, Verdura provides comprehensive information while exciting the palate.

**Edible Wild Mushrooms of North America** Mar 02 2021 Unusual shapes and colors make many mushrooms alluring to the eye, while the exotic flavors and textures of edible mushrooms are a gourmet delicacy for the palate. Yet many people never venture beyond the supermarket offerings, fearing that all other mushrooms are poisonous. With amateur mushroom hunters especially in mind, David Fischer and Alan Bessette have prepared *Edible Wild Mushrooms of North America*. This field guide presents more than 100 species of the most delicious mushrooms, along with detailed information on how to find, gather, store, and prepare them for the table. More than 70 savory recipes, ranging from soups and salads to casseroles, canapes, quiches, and even a dessert, are included. Throughout, the authors constantly emphasize the need for correct identification of species for safe eating. Each species is described in detailed, nontechnical language, accompanied by a list of key identifying characteristics that reliably rule out all but the target species. Superb color photographs also aid in identification. Poisonous "lookalikes" are described and illustrated, and the authors also assess the risks of allergic or idiosyncratic reactions to edible species and the possibilities of chemical or bacterial contamination.

[Pasta E Verdura](#) Apr 27 2023 Simple Sauces. Delightful Dishes. A Fresh and Delicious Approach to Vegetable and Pasta Cookery. Pasta e Verdura--"noodles and vegetables"--offers 140 easy and elegant recipes inspired by the healthy, delicious pasta dishes of Italy. Some quick, many low-fat, and more than a few dairy-free, these lively vegetable sauces will transform the way home cooks--and pasta eaters enjoy their favorite food. From A to Z, Jack Bishop pairs these simple and elegant vegetable sauces--Asparagus with Mushrooms and Caramelized Shallots, Leek with White Wine and Parmesan, Stewed Eggplant with Tomatoes and Olives--with the perfect pasta for each sauce. Accompanying the recipes are tips on buying, storing, and preparing each vegetable, as well as Bishop's lively words of wisdom. He also dispels common myths (such as the need for oil in the water or the superiority of store--bought pasta) and suggests a pasta pantry for spur-of-the-moment meals. Pasta e Verdura is a welcome look at cooking and saucing pasta, and is just what busy cooks need to quickly create wholesome, healthy, tasty meals.

**Circle Gardening** Sep 08 2021 As more people become concerned with food safety as well as the environment, vegetable gardening offers an opportunity to grow produce at home. Not everyone has the time, money, or energy to take on the challenge of starting a vegetable garden, however. In *Circle Gardening*, Kenneth E. Spaeth Jr., a soil and ecosystem specialist, provides a fresh approach and thorough guide to vegetable gardening for all gardeners, experienced and beginner alike. Through years of experimentation, Spaeth has found circle gardening, an ancient method "as old as agriculture," to be not only an efficient but also an aesthetically pleasing way to grow plants. By arranging them in a concentrated circle rather than in rows, gardeners are able to conserve compost, fertilizer, and water. Depending on the number of vegetables planted, this design can save time and be less physically demanding. The rationale for planting your veggies in a circle is scientific, too--many plants clump together in nature and thrive in groups, and so planting in circles actually mimics natural plant distribution. There are other questions that befuddle expert and beginner gardeners, too: What is the difference between organic and conventional gardening? Are there significant pros and cons to each? What makes up the soil in a garden? Spaeth provides clear answers to these complex questions. The book also includes quick vegetable guides in the back along with information on composting, calculating fertilizer rates, and gauging soil health.

**Taming the Wild Mushroom** May 16 2022 Many mushroom hunters prefer to do their foraging in the marketplace, where all the mushrooms are clearly labeled and safely edible. With this fact in mind, Arleen and Alan Bessette have written Taming the Wild Mushroom, one of the first cooking guides devoted exclusively to choosing and preparing the mushroom species now available in many grocery stores, supermarkets, and natural and whole foods markets. A dozen wild and cultivated species are covered in the book, including White Button, King Bolete, Oyster, Chanterelle, Morel, Paddy Straw, Wood Ear, Shiitake, Enokitake, White Matsutake, Black Truffle, and Wine-cap Stropharia. Easy-to-understand descriptions and excellent color photographs of each species help market foragers choose mushrooms in peak condition. Fifty-seven original, species-specific recipes, from appetizers, soups, and salads to meat and vegetarian entrees to sauces and accompaniments, offer dozens of ways to savor the familiar and exotic flavors of these mushrooms. A mouth-watering photograph accompanies each recipe.

*Evaluation of Quality of Fruits and Vegetables* Aug 27 2020 Acceptance or rejection of any edible commodity, whether it is raw or processed, is usually conditioned by sensory stimuli. The impact of these stimuli on the decision-making process is broadly termed sensory evaluation. Advances in sensory evaluation research have been slow in the past because of the human factor-the necessity to use highly trained sensory panels to conduct this research. High technology in instrumentation and new understandings of sensory evaluations are now combining to make possible quantum jumps forward in sensory evaluation research. It is widely recognized that the sensory aspects of fruits and vegetables are affected by many factors, among them environment, variety, cultural practices, and handling practices. However, if one attempts to find a general reference or compilation of findings regarding this subject area there seems to be few, if any, available. A survey of the literature does suggest that in the past few years research into specific factors which influence the sensory aspects of fruits and vegetables has increased significantly. This increased interest in sensory research and the renewed national awareness of the value of research into pre and postharvest quality of fruits and vegetables prompted the Flavor Subdivision, Agricultural and Food Chemistry Division, American Chemical Society to sponsor a symposium entitled "Sensory Evaluation of Fruits and Vegetables: Effect of Environment, Cultural Practices and Variety" during the 1982 meeting in Kansas City, Missouri.
