Down to Earth Sociology: 15th Edition Sep 01 2022 The most popular book of readings for the Introductory Sociology college market is brought up to date with this fourteenth edition, which includes 30 percent new articles addressing current issues of contemporary sociology. With more than 225,000 copies of previous editions sold, this widely used reader, which supplements traditional sociology texts, has been revised to include stimulating new material for the introductory course as well as classic articles that all sociology students should have. As in the former editions, the focus here is on participant observation—giving students a sense of “being there” as some of the field's top practitioners conduct and report on their investigations. Articles examine diverse topics, ranging from the sociology of gender, power, politics, sports, religion, and wealth to the contemporary crises of violent crime, poverty, internet dating, and cosmetic surgery. In addition, a convenient chart correlates each article in Down to Earth Sociology to related chapters in each of the thirty-eight most widely used introductory textbooks.

California Government and Politics Today Oct 02 2022 For courses in California government A practical, contemporary overview of California politics California Government and Politics Today explains California's ever-changing political situation in the context of social and economic trends. Chemistry Oct 22 2021 "Publishing the fifteenth edition of this text bespeaks an exceptionally long record of successful textbook writing. We are appreciative of the loyalty and support the book has received over the years, and we are mindful of our obligation to justify each new edition. We begin our approach to each new edition with an intensive author retreat in which we ask ourselves the deep questions that we must answer before we can move forward. What justifies yet another edition? What is changing in the world not only of chemistry, but with respect to science education and the qualities of the students we serve? How can we help your students not only learn the principles of chemistry, but also become critical thinkers who can think more like chemists? The answers lie only partly in the changing face of chemistry itself. The introduction of many new technologies has changed the landscape in the teaching of sciences at all levels. The use of online resources in accessing information and presenting learning materials has markedly changed the role of the textbook as one element among many tools for student learning. Our challenge as authors is to maintain the text as the primary source of chemical knowledge and practice, while at the same time integrating it with the new avenues for learning made possible by technology. This book incorporates a number of technologies to improve pedagogy, including use of computer-based classroom tools, such as Mastering Chemistry, which is continually evolving to provide more effective means of testing and evaluating student performance, while giving the student immediate and helpful feedback. Video feedback for a select number of Exam Prep questions is also available in Mastering Chemistry, which is new to this edition"--
