Dark Horse is pleased to be releasing Mass Effect: Discovery, the canonical comic continuation! A young Turian military recruit goes undercover in order to infiltrate the mysterious Andromeda Initiative--and ultimately retrieve a scientist who's made a potentially devastating discovery. Tying in to the highly anticipated release of Mass Effect: Andromeda, writer Jeremy Barlow and artist Gabriel Guzman team up to create the next exciting chapter of the Mass Effect comics series! K. C. Alexander begins their SINless duology with a novel hailed by New York Times bestselling author Chuck Wendig as "sci-fi that's slick, sharp and snarky..." A filthy city, overpopulated and underregulated, with even less mercy than a rusted pipe to the eye. For the saints that run it, it's called home. Anybody with the right cred can score an upgrade, it's just a matter of who, what and how much. Good tech, bad tech, big tech, micro tech, it's all out for grabs. For mercs like Riko, installs give an edge every street fight, every corp raid, and every job demands. She and her team have earned their cred, carved out a patch of hell and live it up. That's where Riko lives. Or she did. Until she wakes up in a laboratory, memory shot, body wrecked and tech on the blink. Maybe she slammed too many party favors in some lowlife bar. Maybe she made some bad choices to get there. None of that explains why she finds her girlfriend in the same facility—body going necro and tech on a killing streak. Caught between horror in front and bullets behind, she's got no choice but to get out alone. And that's only the beginning. Now Riko's dealing with friends on the take,

corporations on her ass, and enough rage to burn a soulless city to the ground if that's what it takes. She's fighting a war to tear off the scabs of a conspiracy that'll consume anybody that gets near it—chrome and steel, sinner and saint. Just like it's consumed her girlfriend. But rage is a hell of a drug, and she's going to do more than just fight. She's going to slaughter... Praise for NECROTECH: "NECROTECH crushes everything in its path. Brutal, unapologetic, sexy cyberpunk, it is a steel-fisted punch in the mouth." — Scott Sigler, #1 New York Times bestselling author of the Generations trilogy "Vulgar, vicious, and very very good! Alexander pulls no punches in this intense debut." — Jason M. Hough, New York Times bestselling author of Zero World "NECROTECH bleeds with raw & unapologetic badassery. Riko is the cyberpunk heroine I've been waiting for, struggling with the truth that the tech we embrace to solve our problems just creates new ones, and no one has a chipset to fix humanity's bugs. K. C. Alexander dials up the attitude, anguish, and adrenaline in this explosive debut, and I'm looking forward to Riko's next run." — Kevin Hearne, New York Times bestselling author of The Iron Druid Chronicles "Necrotech is a speed freak rush down mean streets of the digital, the modified, and the just plain crazy. It's like razors for your brain." — Richard Kadrey, author of the Sandman Slim series "One of the most interesting women protagonists I've read in a long time." — Stephen Blackmoore, author of the award-nominated noir urban fantasy Dead Things "Scalding and brutal as a radiation shower, punishing as a street fight, and as sharp as a blade to the jugular, NECROTECH and its badass heroine, Riko, will grab your heart in a diamond steel fist and squeeze it to a pulp." — Lila Bowen, author of Wake of Vultures Picking up where the bestselling videogames left off, the Mass Effect novels take readers into the far reaches of outer space. From the prequel novel, Revelation, to the series capstone, Deception, these original adventures weave together a science fiction epic as they follow Starship Alliance commander David Anderson and his young protégée, scientist Kahlee Sanders, in their battle to save humanity. Packaged together for the first time, this exhilarating eBook bundle includes: REVELATION ASCENSION RETRIBUTION DECEPTION Since discovering a cache of Prothean technology on Mars in 2148, humanity has spread to the stars. Now, on the edge of colonized space, ship commander and Alliance war hero David Anderson investigates the remains of a top secret military research station. Who attacked this post and for what purpose? And where is Kahlee Sanders, the young scientist who mysteriously vanished from the base hours before her colleagues were slaughtered? Sanders is now the prime suspect, but finding her creates more problems than it solves. Partnered with a rogue alien agent he can't trust and pursued by an assassin he can't escape, Anderson battles impossible odds on uncharted worlds to uncover a sinister conspiracy—one he won't live to tell about. Or so the enemy thinks. Expanded with never before seen works of art, this new edition delves deeper than ever into the sci-fi saga that changed video games forever.
