When children select a low difficulty level riddle and solve it, they will be awarded 1 point. This type of riddles will include two hints to help and encourage the children. 2. Medium riddles: These riddles are labeled as two stars (**). When children select a medium difficulty level riddle and solve it, they will be awarded 2 points. This type of riddles will include one hint to make it easier for the children. 3. Hard riddles: These riddles are labeled as three stars (***). When children select a hard difficulty level riddle and solve it, they will be awarded 3 points. This type of riddles will include no hints and challenge the children a bit harder. The person asking the riddle can and will read the hints, and he can deliver the hints to the children in any way according to their understanding level. If you want to actually do something about providing excellent education for every child in America , this book is for you. Using insights from cognitive science, educational research, and the social sciences, the authors examine the compelling nature of four "dumb ideas" at the center of current education policy and practice: (1) simplifying knowledge helps students learn more and faster, (2) teaching and learning are a matter of proper transmission of good content, (3) homogenous environments ease learning, and (4) more standardized data and rigorous controls of our schooling will solve all our problems. The authors then present research that consistently shows why smart K - 12 education will not be achieved by current policies and practices, such as high-stakes standardized tests, homogenous grouping, and abbreviated teacher preparation. This lively book offers solutions for changing the harmful disconnect between our goals and the means we employ to get there, including key "smart ideas" and a set of how-to actions that will lead to great schools for every child. This activity book contains more than 50 activities include crossword, word search, Sudoku, maze, logic puzzle, codeword puzzle, jokes, and more.
