Advances on P2P, Parallel, Grid, Cloud and Internet Computing Mar 16 2022

This book presents the latest research findings, innovative research results, methods and development techniques related to P2P, grid, cloud and Internet computing from both theoretical and practical perspectives. It also reveals the synergies among such large-scale computing paradigms. P2P, grid, cloud and Internet computing technologies have rapidly become established as breakthrough paradigms for solving complex problems by enabling aggregation and sharing of an increasing variety of distributed computational resources at large scale. Grid computing originated as a paradigm for high-performance computing, as an alternative to expensive supercomputers through different forms of large-scale distributed computing. P2P computing emerged as a new paradigm after client-server and web-based computing and has proved useful in the development of social networking, B2B (business to business), B2C (business to consumer), B2G (business to government), and B2E (business to employee). Cloud computing has been defined as a "computing paradigm where the boundaries of computing are determined by economic rationale rather than technical limits," and it has fast become a computing paradigm with applicability and adoption in all application domains and which provides utility computing at a large scale. Lastly, Internet computing is the basis of any large-scale distributed computing paradigms; it has developed into a vast area of flourishing fields with enormous impact on today's information

societies, and serving as a universal platform comprising a large variety of computing forms such as grid, P2P, cloud and mobile computing.

Corporate Governance and Effectiveness Aug 29 2020 The book looks at the corporate management system and how it affects company performance. The main theme revolves around the notion that when a company values its workers and their satisfaction, that company can achieve success. The book is unique in its quantitative perspective and analysis and examines whether a corporate management system can be regarded as a source of a firm's competitive advantage by creating a sustainable competitive advantage and firm performance. The book examines how, in the context of Japanese multinational corporations (MNCs), corporate management can be part of an MNC's strategy in enhancing its capabilities, both in the home and abroad, in Japan and in Thailand. Also, it analyses the reason for the demise of two major Indian companies, Dunlop and Hindustan Motors in terms of their unsympathetic management systems.

On a Global Mission: The Automobiles of General Motors International Volume

3 Oct 23 2022 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. The Economic and Business Consequences of the EMU Dec 21 2019 The Economic and Business Consequences of the EMU A Challenge for Governments, Financial Institutions and Firms Hubert Ooghe Conference Chairman, Vlerick Leuven Gent Management School alld Ghent University EMU finally got under way on 1 st January 1999. Since then 11 European countries share a common currency, the Euro, and pursue a common monetary policy managed by the European Central Bank (ECB). After forty years of economic integration, Euroland has the wherewithal with which to enter the 21 st century. However monetary union has implications for nearly all areas of economic activity and decision-making. Throughout the academic world researchers are fully occupied with the theoretical analysis of the impact of the Euro and the effects of incorporating the new operational framework into their economic models. Businesses and government departments are concerned primarily with the practical implementation of the single currency. For all those who play a part in the economy, it is a question of making the most of the macro and micro economic opportunities offered by the Euro and minimising any threats.

On 17th and 18th March 2000, after the EMU and Euro were in operation for one year, an international conference was held in Ghent (Belgium) on the economic consequences of the introduction of the EMU and the Euro for governments, financial institutions and firms.

Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe Feb 15 2022 This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s:• The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s.• The upgrading of the automotive industry in East-Central Europe through FDI• The position of ECE in the automotive industry research and development (R&D)• The effects of the 2008-2009 economic crisis in the automotive industry of ECE.• The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s.• The effects of FDI on domestic firms in the form of linkages between foreign-owned and domestic firms and spillovers from foreign-owned to domestic firms.

The Automotive Industry and European Integration Aug 21 2022 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Motor-Klassiker Feb 21 2020 Automobile sind mehr als reine Gebrauchsgegenstände für die Fortbewegung von einem Ort zum anderen. Zahlreiche Fahrzeuge erlangten Kultstatus, sind das Ziel automobiler Sehnsüchte oder schrieben Technikgeschichte. Dabei wird oft vergessen, dass ein Auto nicht nur wohlgeformtes Blech auf vier Rädern ist, sondern dass in ihm auch ein feuriges Herz in Form eines Motors schlägt. Und kaum eine andere Erfindung hat das 20. Jahrhundert derart beeinflusst wie der Verbrennungsmotor. Dieses Buch ist eine Hommage an den Verbrennungsmotor und das Automobil. Es stellt mehr als 80 Motorenklassiker und die dazugehörigen Fahrzeuge vor. Dabei geht es aber nicht nur um Fahrzeuglegenden, die große Erfolge im Rennsport feierten, sondern auch um Autos und Motoren, die besondere Geschichten erzählen.

Automotive FDI in Emerging Europe Apr 17 2022 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual

passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
