Green Points: The Definitive Guide Sep 28 2022 A Metric for the Maintenance and Remediation of Information Systems With millions spent on developing information systems, it is important to protect this investment by ensuring these systems are well-maintained. Green Points™ provides a metric for quantifying the value embedded by maintenance and remediation activities, which allows those involved to make more informed management decisions and provide improved support for the systems critical to the success of your business. Green Points: The Definitive Guide includes: • an introduction to green points including background information demonstrating how they can benefit your organisation • an explanation of transactions, weighting coefficients and maintenance life, the key concepts of Green Point Analysis • a description of green point calculation, including a worked example • a list of potential applications of Green Point Analysis describing how it can be used within maintenance projects, portfolios and organisations • data sheets, case studies, frequently asked questions and a glossary of terms See www.greenpts.org for more details.

The Washington Manual Cardiology Subspecialty Consult Nov 30 2022 Concise, portable, and user-friendly, The Washington Manual® Cardiology Subspecialty Consult, Fourth Edition, provides essential information on inpatient and outpatient management of common diseases and disorders. Edited by Drs. Justin S. Sadhu, Mustafa Husaini, and Dominique S. Williams, this edition offers state-of-the-art content on disease pathophysiology, diagnostic tools, and management options, including new biomedical discoveries and novel therapeutics. Ideal for residents, fellows, and practicing physicians who need quick access to current scientific and clinical information in cardiology, the manual is also useful as a first-line resource for internists and other primary care providers.

Recovery and Battle Damage Assessment and Repair Jan 01 2023 This manual, "Recovery and Battle Damage Assessment and Repair," provides the authoritative doctrine guidance on using recovery and repair assets on the battlefield. Practical methods of recovering or repairing equipment (disabled or immobilized) due to hazardous terrain, mechanical failure, or a hostile action are also addressed. Field manual (FM) 4-30.31, "Recovery and Battle Damage Assessment and Repair," is directed toward both the leader and the technician. Tactically, it provides an overview of how recovery and battle damage assessment and repair (BDAR) assets are employed on the battlefield. Technically, it provides principles of resistance and mechanical applications to overcome them. Equipment, rigging techniques, and expedient repairs are summarized as a refresher for recovery-trained military personnel and as general guidance for others.

Cardiovascular Pharmacotherapeutics May 13 2021 Everything practicing physicians and pharmacists need to know about drug therapy for cardiovascular disease. A critically acclaimed classic reference now in its third edition, Cardiovascular Pharmacotherapeutics provides current information regarding the contemporary use of all available cardiovascular medications for adults and children. Strongly emphasizing the scientific rationale behind the use of such therapies in cardiac disease, it discusses new drugs and novel compounds that are under development and may emerge as the cardiac therapies of the future. This edition also addresses special considerations for drug therapy use in the elderly, during pregnancy, and in those with hepatic or renal disease. A generous assortment of tables, figures, and appendices guides

readers in their investigations of each drug group and various disease states. This new third edition presents an in-depth discussion of: All cardiovascular agents currently available The scientific basis behind every pharmacotherapy advance Mechanisms of action of cardiovascular pharmacotherapeutics The latest advances in cardiovascular drug therapy Specific drug treatments, and information on recently approved drugs Molecular biological advances Drugs in development Hands-on discussions of how to utilize specific drugs for treatment of various cardiovascular disorders and for the prevention of disease Also included are 8 appendices that provide practical, hands-on information on using drugs in clinical settings, including relevant pharmacokinetic information, and practical drug prescribing information. All updated with an accompanying website, *Advances in Cardiovascular Pharmacotherapeutics* www.cvpct3.com

Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations Mar 03 2023 Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations contains lectures and papers presented at the Tenth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2020), held in Sapporo, Hokkaido, Japan, April 11–15, 2021. This volume consists of a book of extended abstracts and a USB card containing the full papers of 571 contributions presented at IABMAS 2020, including the T.Y. Lin Lecture, 9 Keynote Lectures, and 561 technical papers from 40 countries. The contributions presented at IABMAS 2020 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of maintenance, safety, management, life-cycle sustainability and technological innovations of bridges. Major topics include: advanced bridge design, construction and maintenance approaches, safety, reliability and risk evaluation, life-cycle management, life-cycle sustainability, standardization, analytical models, bridge management systems, service life prediction, maintenance and management strategies, structural health monitoring, non-destructive testing and field testing, safety, resilience, robustness and redundancy, durability enhancement, repair and rehabilitation, fatigue and corrosion, extreme loads, and application of information and computer technology and artificial intelligence for bridges, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on maintenance, safety, management, life-cycle sustainability and technological innovations of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including engineers, researchers, academics and students from all areas of bridge engineering.

Cotton Belt Locomotives Aug 16 2021 The first and only complete study of the Southwest's most successful railway is back in print! This book documents a proud history with diagrams, maps, and over 300 photographs. Includes a roster of every steam and diesel locomotive owned by the Cotton Belt and its predecessors up to 1977. A must-have for any locomotive enthusiast.
