*Effective Educational Leadership* Feb 29 2020 `Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate? - Tim Brighouse, *Times Educational Supplement* `its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s. Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs. I would use this book with graduate students and practitioners seeking to develop a

perspective about contemporary educational leadership. Its greatest contribution is its exploration of the links between effective leadership and effective education. The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades. There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration?

- Journal of Educational Administration `Leadership is the theme of this decade. This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform.... A great and timely collection? - Michael Fullan, Dean, OISE/University of Toronto `This book makes an excellent contribution to the current debate on Educational Leadership. It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels. Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality. The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader, and to the professional provider of CPD in leadership, offering a wealth of information that can be practically adopted and adapted for a range of courses? - Stephen Merrill, Journal of Inservice Education

Educational management and administration studies focus on leadership as a key determinant of effective educational institutions; and currently, much leadership preparation is characterized by a rational skills-focused approach. Placing current thinking in leadership studies in its organizational and historical context, this book explores its implications for leadership preparation, leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice. It draws on

literature and research from both the private and public sectors. It is deliberately international in its content and focus, and examines a range of practice both within and outside education. Each chapter has a short introduction by the editors setting it in context. This book is for providers and students in higher educational institutions; for postgraduate level courses in educational management; and for leadership development provision for Headteachers induction programmes, NPQH and LPSH. It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools, colleges and other educational organizations.

**Handbook of Research on Educational Leadership for Equity and Diversity** Feb 08 2021 The rapid growth of diversity within U.S. schooling and the heightened attention to the lack of equity in student achievement, school completion, and postsecondary attendance has made equity and diversity two of the principle issues in education, educational leadership, and educational leadership research. The Handbook of Research on Educational Leadership for Equity and Diversity is the first research-based handbook that comprehensively addresses the broad diversity in U.S. schools by race, ethnicity, culture, language, gender, disability, sexual identity, and class. The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools, yet at the same time candidly critiques the destructive deficit thinking, biases, and prejudices that undermine school success for many groups of students. Well-known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders. Each chapter reviews theoretical and empirical evidence of these inequities and provides research-based recommendations for practice and for future research. Celebrating the broad diversity

in U.S. schools, the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity, and provides evidence-based practices to promote student success for all children.

Educational Leadership Jan 22 2022 This book explores the limits to rational management. The authors develop the idea of organizational irony as a central concept for analyzing and explaining management activity in a managerialist environment. Drawing on international research as well as their own extensive experience in educational organizations, the authors show that effectiveness is not necessarily the result of over-rationalistic approaches to educational management. Focusing on school leadership and management, authors Eric Hoyle and Mike Wallace suggest that major reforms have had limited success because the changes introduced have diverted school staff from their core task of promoting student learning. The result is dissatisfaction, frustration, and stress. The authors use the ironic perspective to show how practitioners respond by mediating the reforms.

The authors examine how successful women in education lead and offer suggestions and ideas for developing and honing these exemplary leadership practices. *Women and Educational Leadership* shows how the qualities that characterize women's approaches to leadership differ from traditional approaches?whether the traditional leader is a woman or a man. The authors reveal that women leaders are more collaborative by nature and demonstrate a commitment to social justice. They tend to bring an instructional focus to leadership, include spiritual dimensions in their work, and strive for balance between the personal and professional. This important book offers a new model of leadership that shifts away from the traditional heroic notion of leadership to the collective account of leadership that focuses on leadership for a specific purpose—like social justice. Educational Leadership and Pierre Bourdieu Aug 05 2020 Pierre Bourdieu was one of the most important thinkers of the twentieth century. He argued for, and practiced, rigorous and reflexive scholarship, interrogating the inequities and injustices of modern societies. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offered a powerful critique and method of analysis of the history of schooling, and of contemporary educational policies and trends. Though frequently used in educational research, Bourdieu's work has had much less take up in Educational Leadership, Management and Administration. Educational Leadership and Pierre Bourdieu argues that ELMA scholars have much to gain by engaging more thoroughly with his work. The book explains each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus and capitals offer a way through which to understand the

interaction of structure and agency, and the limits on the freedom of an individual – in this case an educational leader – to act. Educational Leadership and Pierre Bourdieu offers an analysis of dominant trends in ELMA research, examining the kinds of questions asked, projects undertaken and methods used. It provides alternative questions and methods based on a Bourdieusian approach, further readings and a range of exemplars of the application of these tools. The book will be of interest to those whose primary focus is the utility of Bourdieu's social theory.

*Systems Thinking for School Leaders* May 02 2020 This book presents a new approach to school leadership – Holistic School Leadership, whereby school leaders lead schools through systems-thinking concepts and procedures. Facing growing complexity, change and diversity, school leaders need to regularly apply the systems view and perform at the systems level. This book proposes a holistic approach, providing school leaders with systemic principles of action for excellence in education. “What a wonderful book – once I started it, I couldn't put it down. The book masterfully makes a systems leadership perspective accessible and grounded in the reality of the daily life of educators. Holistic School Leadership is a “must read” for anyone who has the responsibility for making schools better places, from professors to emerging teacher leaders.” Karen Seashore (Louis), Regents Professor of Organizational Leadership, Policy and Development, University of Minnesota “Shaked and Schechter have constructed a much needed bridge to the future of educational leadership, a future of systemic thinking and positivity.” Joseph Murphy, Professor of Education and Public Policy, Peabody College of Education, Vanderbilt University “Shaked and Schechter offer a comprehensive yet concise account of the meaning of systems thinking. The authors

systematically develop their Holistic School Leadership approach with compelling examples, carefully attending to the perennial challenge of implementation. Important reading for scholars and practitioners of school leadership and management!" James P. Spillane, Olin Professor in Learning and Organizational Change, Northwestern University "This is the most important book on systems thinking since Senge's (1990) seminal work on learning organizations. Shaked and Schechter demonstrate the critical and practical utility of systems thinking for school leaders—a must read for all reflective practitioners." Wayne K. Hoy, Professor Emeritus, The Ohio State University. "Holistic School Leadership provides an innovative and exciting look into a new perspective on educational leadership that holds tremendous potential in reshaping educational research, policy, and practice. The idea of interdependence alone makes this powerful new book required reading for anyone concerned with the future of education and educational leadership in particular. Give yourself, your colleagues, your students, and your system the gift of the wisdom in this book." Alan J. Daly, Chair and Professor, Department of Education Studies, University of California, San Diego "In this informative book, Shaked and Schechter offer a fresh application of systems thinking to schools and to the work of school leaders. This book is a useful addition to the bookshelves of both those who prepare and those who support school leaders." Megan Tschannen-Moran, Professor of Educational Leadership, College of William and Mary

The Power of Responsive Educational Leadership Mar 12 2021

The Power of Responsive Educational Leadership examines how educational leaders might respond to global challenges such as the environment, technology, inequity, the health crisis, and the stability of democracy. It draws on models of educational leadership and development projects from around the world to explore how leaders might use the curriculum and teaching to help move their communities, regions, and countries in positive directions. The Power of Responsive Educational Leadership: Offers a comprehensive exploration of the multifaceted nature of leadership for learning Charts the key thinking and practices that engage with the principles of leadership for learning and the implications these have Provides a variety of fresh perspectives on the connections between education, schooling, and leadership Includes a range of internationally diverse case studies and vignettes This comprehensive guide invites readers to engage in thinking about new directions for education today. **Reliable School Leadership** Oct 07 2020 Trapped between an

encroaching tide of privatization and a rocky theoretical shore, educational leadership in America's public schools is ardently researched and professionally practiced, but frequently besmirched and poorly understood. Despite the intentions of public educators to engage all students with the original power of education, disconnections caused by mandates, ideologies, and theoretical fuzziness render educational leadership unreliable. The capacities necessary for school leadership to function reliably on behalf of all students are well within the grasp of present-day public educators. But, the action or agency sufficient to enacting educational leadership reliably is on hold. Educational leadership throughout US public schools is submarined when disconnections and ideological misdirection impede the primary purpose and the moral obligation of public education. To fulfill the promises of public education and restore the intentions of educational leadership requires that educators, policymakers, and proponents of US public education reimagine the interconnections that yield the primary purpose and moral obligation of public education. Functional educational leadership is examined throughout this book as the agency necessary and sufficient for public education to discard the forces and factors that impose unreliability.

Educational Leadership for Social Justice and Improving High-

Needs Schools Jul 04 2020 To commemorate the 10-year anniversary of the International School Leadership Development Network (ISLDN), this book is a compilation of the work conducted by network scholars. This volume is the first comprehensive overview of the studies conducted by ISLDN members engaged in examining how social justice leaders and leaders of high-needs schools address the social conditions, learning experiences, and performance of their students. Other international school leadership research consortia have emerged in the 21st century; however, the ISLDN is the second longest operating project, after the International Successful School Principalship Project (ISSPP). Since its creation in 2010, ISLDN scholars have delivered papers at a variety of international conferences and shared findings in research publications, including books and special issues of journals. Until now, ISLDN research findings have been disseminated separately for the project's two strands: (a) social justice leadership and (b) leadership in underperforming high-needs schools. Therefore, the purpose of the book is to document the history and evolution of the ISLDN and to provide descriptions and reflections of the project's research findings, methodologies, and collaborative processes across the two strands. This volume captures studies of school leaders from 19 countries representing six continents - Africa, Asia, Australia and Oceania, Europe, North America, and South America. The authors examine important external and internal contextual factors influencing schools in different cultural settings and provide insights about the values and practices of social justice leaders working in high-needs school settings. Numerous practical strategies are provided for school leaders working in schools with similar conditions. The concluding chapter by the co-editors synthesizes the structural factors, personal beliefs and values, and contextualized change

management strategies that shape school leaders' actions aimed at ensuring the best learning outcomes for their students. Besides capturing the range of findings emerging from various ISLDN studies conducted over the past decade, several chapters critically examine the project's current contributions to the field. Authors suggest broadening the dissemination of our findings to increase the visibility of the project, expanding the research methods beyond qualitative interviews, incorporating studies from non-Anglophone countries, and augmenting the scope of our analyses and research focus. These researchers' journeys also reveal the obstacles to and benefits of engaging in these types of international collaborative research ventures.

The Art of Educational Leadership Mar 04 2023 "English successfully challenges the established educational community to rethink the current state of research on school leadership in the social sciences...The inclusion of theory, discourse, and stories of recognized leaders followed by chapter learning extensions that include key concepts, movie recommendations, and prompted reflective journaling makes this book a most valuable resource for the educational leadership community." —H.J. Bultinck, CHOICE "The Art of Educational Leadership provides one of the most complete examinations of leadership that I have encountered. I admire the way it urges students to think and reflect. The format allows individual learners to focus on those materials that best fit their learning style while the numerous presentations of a single topic through the different modalities strengthens the learning. This text is a fresh, new look at leadership..." —Louise L MacKay, East Tennessee State University "Fenwick W. English returns to themes of leadership he explored in more than 20 earlier books and dozens of presentation to educator audiences. He favors "re-centering educational leadership in the humanities," rather than acting on

the recommendation of the business literature, and he emphasizes the use of films as a way to humanize leadership concepts." —THE SCHOOL ADMINISTRATOR "Excellent cogent analysis of key concepts of leadership are presented in a reader friendly style." —Saul B. Grossman, Temple University

Moves beyond established notions of leadership to recognize that effective leading is about drama and performance—artistry! The Art of Educational Leadership: Balancing Performance and Accountability stresses the human side of leadership. No other text on this topic demonstrates so ably the importance of artistry in leadership in a field that has been lopsidedly dominated by concepts informed by science. Presenting the idea that leadership is an art, this book: Exemplifies a balance between the science and the art of educational leadership: The real improvement of practice is rooted in the art of application, which is about context and represents the key to leadership practice. Connects content material to self-discovery: Exercises at the end of each chapter include creating a personal, reflective journal to engage the reader in and reflect upon theories and practices presented in the book. Films are suggested for viewing to illustrate the interaction between context, culture, decisions, and outcomes. Portrays multicultural leadership in action: Biography boxes throughout the book share how multicultural educational and political leaders who have been recognized as "expert" practitioners learned the art of leadership in the public arena. This is the first book in educational leadership to sketch out a balance between the science and the art of the field. The text illustrates how performance and practice represent the art, while the delineation of the skills and conceptual models represent the science.

Dilemmas in Educational Leadership Oct 31 2022 In this book, educational consultant and group coach Donna Reid argues that popular vehicles for improving school cultures and student achievement, such as professional learning communities and critical friends groups, too often fail because the participants are unaware or unwilling to make the required changes for successful collaboration and change. To assist facilitators and group leaders, the author presents narrative cases that examine the experiences of teacher leaders, principals, consultants, and parents as they negotiate the difficulties of reluctant team members, hostile colleagues, maintaining group interest, sharing responsibility, using technology, and cultural competency. Each case includes questions for reflection that can be used individually or in small groups to improve facilitation skills. **Book Features:** Addresses the roles of the facilitator and participants. Focuses on the complex contexts in which

educators must work. Illustrates a range of challenges with possible ways to manage them. Offers strategies for building sustainable relationships, such as how to include new colleagues and work with difficult people. Discusses common tensions, such as sharing responsibility, respecting confidentiality, and developing cultural competence. “With its engaging and informative mix of case descriptions, discussions following the cases, and questions for the reader, this book is a welcome change from other books on facilitation and coaching. As I read, I imagined that someone had been looking over my shoulder as I coached my first CFG, and as I have supported others doing the same over the years. A must-read for all those engaging in their first few years of facilitating collaborative teacher teams!”

—Gene Thompson-Grove, educational consultant and founding board member, School Reform Initiative “This book is a must-read for anyone in the practice of collaborative coaching and facilitation. By tapping into the power of story, the author provides a reflective space that allows the reader to consider coaching moves, as well as experience and reflect on common potential pitfalls in coaching or facilitating a group.” —P. Tim Martindell, president, Texas Council of Teachers of English Language Arts, Coordinator Secondary ELA, Fort Bend Independent School District

*Educational Leadership and Music* Jun 26 2022 In this book we considered new territory for educational leadership by looking to music for lessons and inspiration that may inform the next generation of schools leaders. Each chapter focuses on an artist or group whose work serves to refine, extend, and challenge our thinking in regards to educational leadership. You will find a vast array of musical forms of expression analyzed and described by an equally diverse collection of educational leadership scholars and practitioners. There may be some who

question the academic appropriateness or relevance of a text such as this one. Our response is that part of our ongoing mission should be to break ourselves out of academic silos and forge meaningful connections between seemingly disparate disciplines. Furthermore, educational leadership stands to gain more by drawing from the arts and specifically musical influences. Finally, music is an obvious part of most of our lives; why not explore the ways in which it impacts us on an academic level and not just a personal level? In sum, we ask that as you read the chapters of this book, you reflect on your own musical tastes and favorite artists.

The Leader in Me Mar 31 2020 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's

based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

**Finding Your Leadership Style** Feb 20 2022 Glanz utilizes three basic quality types -- the Dynamics, the Adaptives, and the Creatives -- with three basic emotional types -- the Aggressives, the Assertives, and the Supportives -- to establish seven types of leadership styles. His work aims to answer the question "what type am I?" and find the most important virtue necessary to incorporate that leadership style into high-quality educational supervision.

**Educational Leadership** Sep 05 2020 The second edition of Educational Leadership: Together Creating Ethical Learning Environments is a groundbreaking work at the forefront of current research into the ethical challenges inherent to leadership. edge research, theory and best practice on learning, teaching and leadership to assist leaders and teachers to better understand contemporary educational challenges and respond to them wisely, creatively and effectively. This book is indispensable for all system and educational professionals engaged in policy-making, leadership development, leading learning in schools and those in academe responsible for programs aimed at the improvement of learning, teaching and leadership.

*Educational Leadership* Mar 24 2022 `A highly recommendable and powerful work...I have found this book to be both a revelatory mirror on past events and an inviting window to future prospects. I am certain that it will be of equal or greater value to all those involved and interested in the tangled complexities, and inherent rewards, of educational leadership, particularly within international or cross-cultural contexts' - Daniel H. Jarvis, *International Review of Education* `Clive Dimmock and Allan Walker's books is a valuable addition to the overcrowded literature on leadership. This is a useful and important book because citizenship, globalization and the tensions with nationality should be the concern of all who lead any school; even monofaith, monoethic and monolingual schools' - Tim Brighouse, *TES Friday* 'The authors offer a rigorous and systematic analysis based on careful definition, illustration and discussion which demonstrates the importance of understanding culture, leadership and their interaction in different contexts: in doing so they provide a powerful antidote to the simplistic export of ideas and lay foundations for a more sophisticated conceptual framework for the study of educational leadership' - John West-Burnham, *International Leadership Centre, University of Hull* This key text in educational leadership focuses on the significance of the context and culture of schools. The book addresses the growing recognition of

cultural differences between societies and the resultant differences in schooling. It also deals with vital issues relating to multicultural education and the leadership of multicultural schools. Drawing on their first-hand experience, the authors explore the differences evident in classroom teaching and learning, as well as organizational, leadership and management aspects of schools. They show how such differences can make over-reliance on Anglo-American approaches misleading, ineffective and restrictive. Key features of the book include: - a methodology to support the emerging field of international and comparative educational leadership and management - in-depth comparative analysis of Anglo-American and Asian schooling and educational management - the leadership of multi-cultural schools This book is essential reading for professionals and students of educational leadership and management, as well as administrators.

*Educational Leadership and Organizational Management* Jun 02 2020 This book is intended for students, leaders and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field. It is a book written for both scholars and practitioners. The general public will also appreciate the accessible language in the book. There are two goals in the experiential learning process. One is to learn the specifics of a particular subject matter, in this case, educational leadership and organizational management. The other is to learn about one's own strengths and weaknesses as a learner. This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills, and the knowledge and attitudes required to solve real world problems in the workplace. For decades, students have focused their studies of educational

leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace. A profound and significant lesson learned in history is that we must follow the principle of integrating theory with practice (unity of theory with practice). Then, we can follow the policy of walking on two legs, an analogy made by the late Chinese chairman, Mao Ze Dong.

*Anti-Racist Educational Leadership and Policy* Jan 28 2020

*Anti-Racist Educational Leadership and Policy* helps educational leaders better comprehend the racial implications and challenges of the current educational policy landscape. Each chapter unpacks a policy issue such as school choice, school closures, standardized testing, discipline, and school funding, and analyzes it through the racialized and market-driven lenses of the current leadership context. Latino Educational Leadership Apr 24 2022 Latino Educational Leadership acknowledges the unique preparation and support for both Latinx educational leaders and Latino communities needed throughout the education and policy pipeline. While leadership in communities exists for educational purposes, this effort focuses on the institutional aspect of Latino Educational Leadership across K-12 schools and university settings. The purpose of this book is to create a greater collaborative focus on Latino Educational Leadership by inviting scholarly contributions and insights from both established and up-and-

coming scholars. Latino Educational Leadership also advocates for the preparation of all leaders as well as the preparation of Latinx educational leaders, to serve Latino communities. Our impetus on Latino Educational Leadership primarily stems from the changing demographics of our country. As of Fall 2017, Latinx student enrollment in K-12 schools reached an all-time high, with Latinxs comprising 26.8% of the nation's public school enrollment. Postsecondary level Latinx student enrollment has also improved; rising from 25% in 2005 to 37% in 2015. Given this growth, particularly at the K-12 level, there has been an increasing urgency to prepare and support more Latinx educational leaders. Their rich cultural and linguistic connections to communities help them more readily understand and meet the needs of Latino students and families. Aside from enrollment growth, Latinxs have made record strides in postsecondary attainment; between 2003-04 and 2013-14, bachelor's degrees more than doubled from 94,644 to 202,412, master's degrees conferred rose from 29,806 to 55,965, and doctoral degrees rose from 5,795 to 10,665. Despite such promising gains, concern has not waned over how to best address the challenges this diverse student population continues to face in accessing, persisting, and matriculating across the P-20 Pipeline. There is still work to be done, as only 11% of all bachelor's degrees, 9% of all master's degrees, and 7% of all doctoral degrees were awarded to Latinxs in 2013-14. In particular, there is increasing urgency to address how higher education institutions can better prepare, develop, and retain Latinx leaders and scholars, who will serve and meet the needs of Latinx college students to ensure their academic success. Thus, the purpose of this book is to advance the knowledge related to serving Latino communities and preparing Latinx leaders.

*Black Educational Leadership* May 14 2021 This book explores Black educational leadership and the development of anti-racist, purpose-driven leadership identities. Recognizing that schools within the United States maintain racial disparities, the authors highlight Black leaders who transform school systems. With a focus on 13 leaders, this volume demonstrates how US schools exclude African American students and the impacts such exclusions have on Black school leaders. It clarifies parallel racism along the pathway to becoming teachers and school leaders, framing an educational pipeline designed to silence and mold educators into perpetrators of educational disparities. This book is designed for district administrators as well as faculty and students in Race and Ethnicity in Education, Urban Education, and Educational Leadership.

**Future Alternatives for Educational Leadership** Dec 29 2019 This book offers provocations for what's now and what's next in educational leadership, simultaneously bringing the field both back to its basics—of equity, democracy, humanity, and education for all—and forward to productive, innovative, and necessary possibilities. Written during the pandemic reality of 2020, this collection shares the global voices and expertise of prominent and emerging leaders, scholars, and practitioners in education from the UK, the United States, South America, Canada, Europe, Australia, and the Middle East. The authors engage with the complexities and uncertainties of leading in education. They examine research, reflections, and real stories from which school leaders, education system leaders, policymakers, and researchers in the field of educational leadership, can learn, and in which they will find honesty, authority, and inspiration to guide the future of the field. The new perspectives and hopeful alternatives presented in this outstanding book are essential to researchers, school leaders, and

policymakers, and are key to advancing education into positive and democratic futures.
