The paper discussed the use of foreign exchange swaps by central banks. Such use has aimed at affecting domestic liquidity, managing foreign exchange reserves, and stimulating domestic financial markets. It discusses these different uses and present evidence for a selected group of countries. The paper cautions about the use of foreign exchange swaps to defend a particular exchange rate at a time when foreign exchange reserves are under pressure. It notes, finally, that use of foreign exchange swaps by central banks has been losing importance. Contents.

Distinguishing between "aid" and "help" in development aid and finance, the authors discuss aid in the context of other North- South flows such as trade or debt service, and describe the role and evolution of aid during the Cold War. They address issues such as food aid, the EU's Lome cooperation, Japan's emergence as the largest donor and its specific aid philosophy, the often- neglected question of North-South aid, and the role of NGOs. New trends analyzed include political conditionality, the UNDP's proposal to reorient aid towards human development, and the question of aid diversion to the former communist countries. The authors conclude by proposing a series of reforms for development aid and finance. CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language. This book provides an in-depth analysis of what happens when intermediate level learners of a foreign language use a bilingual dictionary when writing. Dictionaries are frequently promoted to people learning a foreign language. Nevertheless, teachers often talk about their students' inability to use dictionaries properly, especially when they write, and this can be problematic. This book paints a comprehensive picture of the differences a dictionary makes and brings out the implications for language learning, teaching, and testing practices. It draws on research in which participants in three studies took writing tests in two test conditions – with and without a dictionary. They were also asked what they thought about the two test types. Their performances and opinions were analyzed in a variety of ways. Conclusions from the data highlight some of the practical issues to be kept in mind if we want to help foreign language learners to use bilingual dictionaries effectively when writing. In 2007 the International Association of Constitutional Law established an Interest Group on 'The Use of Foreign Precedents by Constitutional Judges' to conduct a survey of the use of foreign precedents by Supreme and Constitutional Courts in deciding constitutional cases. Its purpose was to determine - through empirical analysis employing both quantitative and qualitative indicators - the extent to which foreign case law is cited. The survey aimed to test the reliability of studies describing and reporting instances of transjudicial communication between Courts. The research also provides useful insights into the extent to which a progressive constitutional convergence may be taking place between common law and civil law traditions. The present work includes studies by scholars from African, American, Asian, European, Latin American and Oceania countries, representing jurisdictions belonging to both common law and civil law traditions, and countries employing both centralised and decentralised systems of judicial review. The results, published here for the first time, give us the best evidence yet of the existence and limits of a transnational constitutional communication between courts. These Congressional hearings were to examine the Internal Revenue Service and the Treasury Department response to evidence of improper use of foreign addresses -including nominee accounts in tax haven countries- to evade taxes on U.S. source income. In his introductory remarks the subcommittee chairman, Congressman Benjamin S. Rosenthal of New York, said: "Each year many billions of dollars in interest, dividends, and other income payments are made by U. S. corporations, financial institutions, and other entities to foreign addresses. IRS internal audit studies in the subcommittee's possession indicate that a significant portion of this income is being sent to U. S. taxpayers and others subject to U. S. taxation who are improperly using foreign addresses to conceal income and thwart proper tax collections."
