Scotland Mar 12 2021 The first comprehensive guide to Scotland since the 19th century, edited by the Director of the Royal Scottish Geographical Society. It is remarkable that in this age of information there is no up-to-date guide to the places of Scotland. That situation is about to be remedied with the publication of *Scotland: An Encyclopedia of Places and Landscape*, edited by Dr David Munro, Director of the Royal Scottish Geographical Society. This authoritative, comprehensive gazetteer will include over 8,000 entries on cities, towns and villages, mountains, lochs and rivers, visitor attractions and monuments throughout the nation. Each entry places its subject in an appropriate historical, geological or environmental context, providing essential information of interest to a wide range of potential users. The book starts with an introductory essay on the Landscapes of Scotland. There is also an extensive glossary of terms (including Gaelic words incorporated into many place names), and a detailed bibliography. Street plans are provided for over 100 main towns and cities, as are maps of each administrative area, spread throughout the book. There is a fully indexed full-colour atlas, providing a wealth of extra cartographic information.

[Affective Landscapes in Literature, Art and Everyday Life](#) Mar 24 2022 Bringing together a diverse group of scholars representing the fields of cultural and literary studies, cultural politics and history, creative writing and photography, this collection examines the

different ways in which human beings respond to, debate and interact with landscape. How do we feel, sense, know, cherish, memorise, imagine, dream, desire or even fear landscape? What are the specific qualities of experience that we can locate in the spaces in and through which we live? While the essays most often begin with the broadly literary - the memoir, the travelogue, the novel, poetry - the contributors approach the topic in diverse and innovative ways. The collection is divided into five sections: 'Peripheral Cultures', dealing with dislocation and imagined landscapes'; 'Memory and Mobility', concerning the road as the scene of trauma and movement; 'Suburbs and Estates', contrasting American and English spaces; 'Literature and Place', foregrounding the fluidity of the fictional and the real and the human and nonhuman; and finally, 'Sensescapes', tracing the sensory response to landscape. Taken together, the essays interrogate important issues about how we live now and might live in the future.

Cycling in the Hebrides Dec 29 2019 This guidebook describes 37 day rides for all abilities, and 22 linking routes for more experienced cycle tourists, allow riders to visit all the essential sights in over 20 islands of the Hebrides and of the Firth of Clyde. Routes range from those suitable for short weekend breaks to a challenging 600-mile tour (includes the 200 mile Hebridean Way / NCR 780 along the length of the Outer Hebrides). Whether you're putting together a fortnight's tour or just enjoying a few day rides from a single base, this guide is packed with useful information to help you make the most of your trip. The Hebridean islands offer a wealth of wonderful scenery: the majestic Cuillin mountains on Skye; the otherworldly palm trees on Bute; the marvellous white shell sands on Tiree and Harris. This guidebook features detailed custom mapping and elevation profiles for all routes, and comprehensive information of ferry and transport routes, accommodation, food and drink, supplies,

cycle spares and repairs. Island hopping in these islands is a magical experience. The guide visits over 20 of them and each has its own interesting history and wildlife. Reasonably fit cyclists can enjoy these routes at their own pace; experienced cycle tourists will eat up the miles.

Outer Hebrides Nov 07 2020 adt's new guide to the Outer Hebrides: The Western Isles of Scotland, from Lewis to Barra, by experienced writer and journalist Mark Rowe is the only full-size guide to focus solely on the islands of Lewis, Harris, St Kilda, North Uist, Benbecula, South Uist, Eriskay, Barra and Vatersay. Masses of background information is included, from geography and geology to art and architecture, with significant coverage of wildlife, too, as well as all the practical details you could need: when to visit, suggested itineraries, public holidays and festivals, local culture, plus accommodation and where to eat and drink. Walkers, bird-watchers, wildlife photographers, beach lovers and genealogists are all catered for, and this is an ideal guide for those who travel simply with curious minds to discover far-flung places of great cultural, historical and wildlife interest. The Outer Hebrides is an archipelago of 15 inhabited islands and more than 50 others that are free of human footprint. Huge variations in landscape are found across the islands, from Lewisian gneiss, which dates back almost three billion years, to rugged Harris with its magnificent sands running down its western flanks and the windswept, undulating flatness and jagged sea lochs of the Uists. This is a land where Gaelic is increasingly spoken and ancient monuments abound, where stunning seabird colonies and birds of prey can be watched, and where the grassy coastal zones known as the machair are transformed into glorious carpets of wildflowers in late spring and summer. Whether visiting the Standing Stones of Callanish, the Uig peninsula, Barra's Castle Bay,

or historic St Kilda, or if you just want to experience the romance of the Sound of Harris, one of the most beautiful ferry journeys in the world, Bradt's Outer Hebrides: The Western Isles of Scotland, from Lewis to Barra has all the information you need.

Landscapes and Landforms of Scotland Jul 28 2022 This book provides an appealing and informative overview of the outstanding landforms and landscapes of Scotland. Scotland is internationally renowned for the diversity of its geology, landforms and landscapes. The rock record spans most of geological time, from the Archaean to the Palaeogene, and represents the outcome of tectonic plate movements, associated geological processes, and sea-level and climate changes. Scotland incorporates primeval gneiss landscapes, the deeply eroded roots of the Caledonian mountain chain, landscapes of extensional tectonics and rifting, and eroded remnants of volcanic complexes that were active when the North Atlantic Ocean opened during the Palaeogene. The present relief reflects uplift and deep weathering during the Cenozoic, strongly modified during successive episodes of Pleistocene glaciation. This striking geodiversity is captured in this book through 29 chapters devoted to the evolution of Scotland's scenery and locations of outstanding geomorphological significance, including ancient palaeosurfaces, landscapes of glacial erosion and deposition, evidence of postglacial landscape modification by landslides, rivers and wind, and coastal geomorphology. Dedicated chapters focus on Ice Age Scotland and the associated landscapes, which range from alpine-type mountains and areas of selective glacial erosion to ice-moulded and drift-covered lowlands, and incorporate accounts of internationally renowned sites such as the 'Parallel Roads' of Glen Roy, the Cairngorm Mountains and the inselbergs of Assynt. Other chapters consider the record of postglacial rock-slope failures, such as the

famous landslides of Trotternish on Skye, and the record of fluvial changes since deglaciation. The sea-level history of Scotland is addressed in terms of its raised and submerged shorelines, while several chapters discuss the contrasting coastal landscapes, which range from the spectacular sea cliffs of Shetland and Orkney to the beaches and dunes of eastern Scotland. The role of geoconservation in preserving Scotland's outstanding geomorphological heritage is outlined in the final chapter. The book offers an up-to-date and richly illustrated reference guide for geomorphologists, other Earth scientists, geographers, conservationists, and all those interested in geology, physical geography, geomorphology, geotourism, geoheritage and environmental protection.

The Unknown Hebrides Jan 22 2022 Featuring two main groups of islands - the islands of the Firth of Lorne and islands of Skye and Ullapool - this book is a spectacular celebration of some of the most beautiful yet overlooked Scottish islands. From the great amphitheatre of the Firth of Lorne to the grandeur of the Cullins as seen from Soay, John MacPherson's photographs capture the intrinsic character of Scotland's forgotten islands, providing a reminder of places long since abandoned by man, and of industry now long faded.

The Hebridean Way Oct 07 2020 Officially launched in 2017, the Hebridean Way offers walkers the opportunity to experience the magic of Scotland's Outer Hebrides in one inspirational journey. The waymarked route stretches 247km (155 miles) from Vatersay to Stornaway, linking ten major islands of the archipelago by means of causeways and two ferry crossings: Vatersay, Barra, Eriskay, South Uist, Benbecula, Grimsay, North Uist, Berneray, Harris and Lewis. Suitable for most walkers with a moderate level of fitness, it can be completed in 8-14 days and is rich in natural, historical and cultural interest. This guidebook presents the Hebridean Way in 10 stages of

16-35km (10-22 miles), plus two additional stages to extend the route to the Butt of Lewis in line with future plans. Detailed route description is accompanied by 1:50,000 OS mapping, stunning photography to whet your appetite and a wealth of information about local points of interest. The introduction offers an overview of the islands' geology, history, plants and wildlife as well as comprehensive practical advice for walking the route, such as when to go, how to get there (and back) and what to take. Accommodation listings can be found in the appendices. The route is a celebration of the diverse landscapes of the Hebrides, from dazzling white shell beaches to wild moorland and flower-strewn machair. It visits Neolithic and Bronze Age remains, ruined forts and castles and monuments commemorating Bonnie Prince Charlie and the Highland Land Struggle. The islands are also a great location to spot seabirds, raptors and a number of migratory species.

Lewis and Harris Jun 26 2022 Northern Scottish landscapes by German photographers Vianca Reinig and Philipp Schmidt German photographers Vianca Reinig (born 1989) and Philipp Schmidt (born 1983) photographed the northernmost isle of the Outer Hebrides in Scotland: Lewis and Harris. With alternating perspectives--sudden cuts between panoramas and details--this publication arranges their photographs in a chronological sequence.

The Outer Hebrides Jan 02 2023 The Outer Hebrides is Malcolm MacGregor's second book of landscape photography in Scotland. Here he has travelled throughout the islands in pursuit of Atlantic light. The photographic journey on the edge of Scotland has taken him from the majestic beaches of North Lewis, via the mountainous tops of Harris to the awe-inspiring cliffs on Mingulay in the south. The photographs in this book cover remote mountains, hills, coastline and deserted islands. Additionally he has photographed churches,

ruined castles, ancient graveyards, fishing vessels, Harris tweed factories and standing stones, bringing a different perspective to the Outer Hebrides. Conscious of the history of the Hebrideans and how their lives have interacted over the years with this extraordinary landscape, the accompanying text weaves the landscape into the life, the history and some of the legends that continue today. It also covers some of the lesser-known aspects and viewpoints of the islands and why they are so special and why perhaps we should 'behold the Hebrides' as a unique destination within the British Isles. The varied moods of a Scottish wilderness captured on film an evocative portrait of an increasingly popular tourist destination contains historical anecdotes and local legends

Skye Sep 29 2022 The Isle of Skye offers a magical combination of wild land and breath-taking natural beauty. Skye's geological history involves some of the most ancient rocks on the planet; a grandstand view as the Highlands of Scotland were formed over 400 million years ago and the development of one of the mightiest volcanoes ever to blow its top.

The Outer Hebrides May 06 2023 The remote archipelago which lies off the north-west coast of Scotland boasts a huge range of contrasting and spectacular land- and seascapes. Lewis is austere, with a featureless peatland core, bounded by dramatic sea cliffs, whilst neighbouring Harris is extraordinarily rugged but fringed with stunning unspoilt beaches. The Uists are characterised by gentle fertile machair lands, and Barra has a more brutal landscape carved from ancient gnarled rock. But these islands have one thing in common: they were all built from the most ancient rocks in Britain - Lewisian gneiss, which reaches back almost to the beginning of geological time. In this book Alan McKirdy explores these islands, together with the volcanic rocks that build the outposts of Rockall, St

Kilda and the Shiants, tracing their extraordinary journey through time and across the globe.

Neo-Romantic Landscapes Aug 05 2020 Neo-Romantic Landscapes offers a reappraisal of the 1940s films of Powell and Pressburger focusing on their use of landscape. Questioning the established notion that the two film-makers, owing to their non-British personal roots, are located as un-British and 'other', Stella Hockenhull draws a correlation between the two media of film and painting to suggest otherwise. Emphasising the spiritual aspects of landscape and nature at a time when the experience and imagery of the war years generated a particular kind of 'affect' arising from the aftermath of destruction, she locates Powell and Pressburger's wartime films in their historical and cultural context, notably Neo-Romanticism. By offering a close analysis of films such as *A Canterbury Tale*, *I Know Where I'm Going!*, *Black Narcissus* and *Gone to Earth* she finds similar aesthetic qualities in a number of British landscape paintings executed contemporaneously. Drawing on press reviews for contemporary spectator response, Neo-Romantic Landscapes offers a redirection of Film Studies, foregrounding the aesthetic pleasures of cinema in excess of narrative plausibility, thus resituating Powell and Pressburger in the British cultural traditions of the visual arts.

Tir A'mhurain May 02 2020 Tir a'Mhurain is a collection of photographs that reflects the impressions gathered by Paul Strand and his wife Hazel during their 3-month visit to the Hebrides in 1945. Juxtaposing people and landscape, Strand's beautifully sequenced photographs depict the perfect complicity he saw between nature and habitation in their wild terrain. Whether it is a view of the rocks and the sea or a grinning shepherd boy; scuddling clouds hanging over seaside house or the wrinkled face of an old lady framed by a knitted

shawl, Strand's images transcend the ephemeral. This extended portrait captures the essence and complexity of a singular place. This is a true masterpiece of photography.

Seasons on Harris Jul 04 2020 The Outer Hebrides of Scotland epitomize the evocative beauty and remoteness of island life. The most dramatic of all the Hebrides is Harris, a tiny island formed from the oldest rocks on earth, a breathtaking landscape of soaring mountains, wild lunarlike moors, and vast Caribbean-hued beaches. This is where local crofters weave the legendary Harris Tweed—a hardy cloth reflecting the strength, durability, and integrity of the life there. In *Seasons on Harris*, David Yeadon, "one of our best travel writers" (The Bloomsbury Review), captures, through elegant words and line drawings, life on Harris—the people, their folkways and humor, and their centuries-old Norse and Celtic traditions of crofting and fishing. Here Gaelic is still spoken in its purest form, music and poetry ceilidh evenings flourish in the local pubs, and Sabbath Sundays are observed with Calvinistic strictness. Yeadon's book makes us care deeply about these proud islanders, their folklore, their history, their challenges, and the imperiled future of their traditional island life and beloved tweed.

Rum Sep 17 2021 This is an account of Rum, one of the Hebrides and the people who contributed to its story. The site of some of the earliest settlements in Scotland, Rum's history extends back to the Mesolithic period. It was also an isolated haven for the early Celtic Church in the figure of Beccan the Solitary, and later formed part of the territories of the Vikings and Clanranalds, and ultimately the Macleans of Coll. Its population were driven out to North America between 1826 and 1828 and the Bulloughs, a family of Lancashire industrialists, bought the island towards the end of the nineteenth century and left a bizarre legacy of Edwardiana in the form of

Kinloch castle and its grand contents.

A Hebridean Notebook Dec 21 2021 The printmaker Norman Ackroyd CBE RA has long been fascinated by the Hebrides, the archipelago lying to the north-west of mainland Scotland. Inhabited since prehistoric times, some of these islands are now deserted, and all are rarely visited. Their ghostly, desolate ambience was the perfect stage for Ackroyd's art; the urge to see these remote islands for himself spurred him into making several journeys to the region. This book brings together a selection of original en plein air watercolour sketches, some produced under arduous conditions of weather and sea, which have provided the basis for many of Ackroyd's most memorable etchings. A gazetteer section at the back contains the artist's thoughts, alongside a more detailed description of the sketches' locations. AUTHOR: Norman Ackroyd was born in Leeds in 1938 and studied at the Royal College of Art in London. He turned to landscape art in the 1980s. Ever since, his etchings of the ruggedly beautiful British coastline have been admired around the world.

SELLING POINTS: * A selection of Norman Ackroyd CBE RA's most compelling sketches of the Hebrides * Features Ackroyd's original en plein air watercolour sketches * Accompanied by an informative gazetteer section, written by the artist himself 40 colour

Love of Country Apr 12 2021 An extraordinary journey deep into the history and landscape of the Hebrides, exploring the islands' turbulent history, the spread of their influence, and how they shaped the nations of Britain, from the award-winning author of *The Plot* Few landscapes are as iconic as the islands off the north-western Scottish coast. On the outer edge of the British Isles and facing the Atlantic Ocean, the Hebrides form part of Europe's boundary. Because of their unique position in the Atlantic archipelago, they have been at the centre of a network of ancient shipping routes which has led to a

remarkable history of cultures colliding and merging. Home to a long and rich Gaelic tradition, for centuries their astonishing geography has attracted saints and sinners, and stimulated artists and writers, inspiring awe and dread as well as deep attachment. Over six years, Madeleine Bunting travelled north-west, returning again and again to the Hebrides, exploring their landscapes, histories and magnetic pull. With great sensitivity and perceptiveness, she delves into the meanings of home and belonging, which in these islands have been fraught with tragedy as well as tenacious resistance. The Hebrides hold a remarkable place in the imaginations of Scotland and England. Bunting considers the extent of the islands' influence beyond their shores, finding that their history of dispossession and migration has been central to the British imperial past. Perhaps more significant still is how their landscapes have been repeatedly used to imagine the British nation. *Love of Country* shows how their history is a backdrop for contemporary debates about the relationship between our nations, how Britain was created, and what Britain has meant - for good and for ill.

Seasons on Harris Jun 02 2020 The Outer Hebrides of Scotland epitomize the evocative beauty and remoteness of island life. The most dramatic of all the Hebrides is Harris, a tiny island formed from the oldest rocks on earth, a breathtaking landscape of soaring mountains, wild lunarlike moors, and vast Caribbean-hued beaches. Sea Room Feb 20 2022 In 1937, Adam Nicolson's father answered a newspaper ad—"Uninhabited islands for sale. Outer Hebrides, 600 acres. . . . Puffins and seals. Apply."—and thus found the Shiantis. With a name meaning "holy or enchanted islands," the Shiantis for millennia were a haven for those seeking solitude, but their rich, sometimes violent history of human habitation includes much more. When he was twenty-one, Nicolson inherited this almost indescribably beautiful property: a landscape, soaked in centuries-old tales of restless ghosts and Bronze Age gold, that cradles the heritage of a once-vibrant world of farmers and fishermen. In *Sea Room*, Nicolson describes and relives his love affair with the three tiny islands and their strange and colorful history in passionate, keenly precise prose—sharing with us the greatest gift an island bestows on its inhabitants: a deep engagement with the natural world.

Mull, Iona and Staffa Nov 19 2021 *Mull, Iona and Staffa* is Malcolm MacGregor's second book of landscape photography in Scotland. Here he has travelled throughout these three islands in pursuit of Hebridean light. Conscious that these islands are not an appendage to the western highlands of Scotland, but rather command their seaborne approaches, he has sought through a photographic journey to reveal their uniqueness and special qualities. His excursions have taken him from Fingal's Cave on Staffa to St. Columba's landing place on Iona. On Mull he has ventured from the high tops around Ben More to the desolate Ardmeanach peninsula. The photographs in this book cover mountains, hills, coastline, rivers and isolated gems such as waterfalls

and frozen hill lochs. Additionally he has photographed churches, castles, ancient graveyards, fishing vessels, celtic crosses, standing stones and remnants of a bygone age bringing a fresh perspective to these renowned islands. The accompanying text weaves the landscape into the life, history and some of the legends that continue today. It also covers some of the lesser known aspects and viewpoints of the islands revealing why visitors and pilgrims return here to encounter unique experiences both visually and of a spiritual nature.

The Hebrides Mar 31 2020 This inspirational guide offers 50 varied hiking and backpacking routes on the Scottish Hebrides islands, set out in a large guidebook to be savoured. The hikes highlight all the very best landscapes and scenery to be found on the spectacular islands of the Hebrides, a wonderland for adventurous walkers to return to time and time again. The hikes are suitable for experienced hikers with good fitness levels and navigational competence. Many of the routes have no waymarkers or signposts, and the terrain is often rough, rugged and pathless. The introduction to each walk clearly sets out the scope and strenuousness of any difficulties involved.

Winds of Change Apr 24 2022 St Kilda is one of the more distant groups of small islands that are scattered around the west and north of Scotland. With stunning scenery, huge seabird colonies and the visible, abandoned remains of past lives, it is a place that draws many island travellers. The histories and myths associated with the archipelago have added intrigue to this remote part of the Western Isles. Many have concentrated on differences rather than similarities in the lifestyles of St Kildans compared to other island communities, whether in recent, historic or prehistoric times. This volume, which interprets archaeological research undertaken on the main island Hirta over the past twenty years, provides another view. Much still survives to be read in the landscape of pre-improvement, medieval

and prehistoric settlement, and this encourages a fresh, integrated focus for island studies.

The Highlands and Western Isles of Scotland, Containing Descriptions of Their Scenery and Antiquities, with an Account of the Political History ... Oct 19 2021

Rum May 14 2021 This title reveals the human story of the island of Rum, both in the tragedy of the clearance and in the interlude of the Bulloch period when the folly at Kinloch was built. It also covers the history of the island stretching back to the mesolithic period and the earliest settlements in Scotland.

A Norse Settlement in the Outer Hebrides Feb 08 2021 The settlement at Bornais in the Western Isles of Scotland is one of the largest rural settlements known from the Norse period in Britain. It spans the period from the fifth to the fifteenth century AD when the Atlantic seaboard was subject to drastic changes. The islands were systematically ravaged by Viking raiders and then colonised by Norse settlers. In the following centuries the islanders were central to the emergence of the Kingdom of Man and the Isles, played a crucial role in the development of the Lordship of the Isles and were finally assimilated into the Kingdom of Scotland. This volume explores the stratigraphic sequence uncovered by the excavation of Bornais mounds 2 and 2A. The excavation of mound 2 revealed a sequence of high status buildings that span the Norse occupation of the settlement. One of these houses, constructed at the end of the eleventh century AD, was a well preserved bow-walled longhouse and the careful excavation and detailed recording of the floor layers has revealed a wealth of finds that provides invaluable insight into the activities taking place in this building. The final house in this sequence is very different in form and use, and clearly indicates the increasing Scottish influence on the region at the beginning of the thirteenth century. The

excavation of mound 2A provides an insight into the less prestigious areas of the settlement and contributes a significant amount of evidence on the settlement economy. The area was initially cultivated before it became a settlement local and throughout its life a focus on agricultural activities, such as grain drying and processing, appears to have been important. In the thirteenth century the mound was occupied by a craftsman who produced composite combs, gaming pieces and simple tools. The evidence presented in this volume makes a major contribution to the understanding of Norse Scotland and the colonisation of the North Atlantic in a period of dramatic transformations.

Love of Country Aug 29 2022 Few landscapes are as striking as that of the Hebrides, the hundreds of small islands that speckle the waters off Scotland's northwest coast. The jagged, rocky cliffs and roiling waves serve as a reminder of the islands' dramatic geological history, inspiring awe and dread in those drawn there. With Britain at their back and facing the Atlantic, the Hebrides were at the center of ancient shipping routes and have a remarkable cultural history as well, as a meeting place for countless cultures that interacted with a long, rich Gaelic tradition. After years of hearing about Scotland as a place deeply interwoven with the story of her family, Madeleine Bunting was driven to see for herself this place so symbolic and full of history. Most people travel in search of the unfamiliar, to leave behind the comfort of what's known to explore some suitably far-flung corner of the globe. From the first pages, it's clear that Madeleine Bunting's *Love of Country* marks a different kind of journey—one where all paths lead to a closer understanding of home, but a home bigger than Bunting's corner of Britain, the drizzly, busy streets of London with their scream of sirens and high-rise developments crowding the sky. Over six years, Bunting returned

again and again to the Hebrides, fascinated by the question of what it means to belong there, a question that on these islands has been fraught with tenacious resistance and sometimes tragedy. With great sensitivity, she takes readers through the Hebrides' history of dispossession and displacement, a history that can be understood only in the context of Britain's imperial past, and she shows how the Hebrides have been repeatedly used to define and imagine Britain. In recent years, the relationship between Britain and Scotland has been subject to its most testing scrutiny, and Bunting's travels became a way to reflect on what might be lost and what new possibilities might lie ahead. For all who have wondered how it might feel to stand face-out at the edge of home, *Love of Country* is a revelatory journey through one of the world's most remote, beautiful landscapes that encourages us to think of the many identities we wear as we walk our paths, and how it is possible to belong to many places while at the same time not wholly belonging to any.

Barra and Vatersay Dec 01 2022 "Capturing the essence of the unique landscape of Barra and Vatersay islands in Scotland's Outer Hebrides. this stunning book is designed with full-page photographs that you can easily extract for framing"--Back cover.

The Hebrides Apr 05 2023 The Hebrides of Scotland – around 500 diverse islands – form the north-western Atlantic fringe of Europe. This book surveys the cultural landscape of this dramatically beautiful, complex and conflicted area, with emphasis on what may be interpreted through aerial photography. Mobile maritime cultures flourished throughout the Hebrides from prehistoric times, including Mesolithic builders of wheelhouses, coracle-borne monastic travelers, Norse in longships and Lords of the Isles in birlinns. A prominent feature of the recent history of the Hebrides has been depopulation. The history and heartbreak of this phenomenon, experienced in

differing degrees in rural areas throughout Europe from the mid-18th century, is clearly shown in aerial photographs and discussed by co-authors Angus and Patricia Macdonald. Today's Hebridean landscapes have been heavily modified by various forms of human land use; current land-management options and controversies are also explored in the context of photographs that draw attention to the various issues involved.

The Hebrides Sep 05 2020 This inspirational guidebook describes 50 varied walking and backpacking routes on the Scottish Hebrides islands, set out in a larger format, and illustrated with a range of stunning photographs. The 50 walks are spread across both well-known and remote islands; from Skye, Mull, Rum, the Uists and Barra, Ulva, Iona, Eigg and Muck and more besides. Most of the walks provide a full day for experienced walkers, with a few multi-day backpacking adventures as well as some shorter routes. The walks also include Hebrides classics, like the Trotternish Ridge, Ben More, Skye and Rum Cuillins, the Paps of Jura and full circuits of smaller islands. Each walk combines clear route description with mapping and spectacular photography, while also advising on the route's facilities, public transport access, length and terrain. The result is a collection of the very best walks with which to uncover the wild and rugged beauty of the Hebrides.

Poacher's Pilgrimage Jun 14 2021 The islands of the Outer Hebrides are home to some of the most remote and spectacular scenery in the world. They host an astonishing range of mysterious structures - stone circles, beehive dwellings, holy wells and 'temples' from the Celtic era. Over a twelve-day pilgrimage, often in appalling conditions, Alastair McIntosh returns to the islands of his childhood and explores the meaning of these places. Traversing moors and mountains, struggling through torrential rivers, he walks from the

most southerly tip of Harris to the northerly Butt of Lewis. The book is a walk through space and time, across a physical landscape and into a spiritual one. As he battled with his own ability to endure some of the toughest terrain in Britain, he met with the healing power of the land and its communities. This is a moving book, a powerful reflection not simply of this extraordinary place and its people met along the way, but of imaginative hope for humankind.

Hebrides Oct 31 2022 Since the publication of *The Blackhouse* in 2011, the books of Peter May's groundbreaking Lewis Trilogy have enthralled millions of readers around the world with powerfully evocative descriptions of the Outer Hebrides. From its peat bogs and heather-coated hills, from its weather-beaten churches and crofters cottages to its cold clear rills choked with rainwater, the islands off the northwest coast of Scotland have been brought to vivid life by this accomplished novelist. Now, Peter May and photographer David Wilson present a photographic record of the countless locations around the Hebridean archipelago that so inspired May when he was bringing the islands of detective Fin McLeod's childhood to the page. From the tiny southern island of Barra to the largest and most northern island of Lewis, travel the storm-whipped North Atlantic scenery with May as he once again strolls the wild and breathtaking countryside that gave birth to his masterful trilogy of novels.

The Hebrides (Collins New Naturalist Library, Book 76) Jul 16 2021 A complete natural history of the Hebrides – an area of great natural beauty, which draws back thousands of visitors year after year to its wonderful scenery and abundant wildlife.

Settlement, Society and Cognition in Human Evolution Feb 29 2020 This volume provides a landscape narrative of early hominin evolution, linking conventional material and geographic aspects of

the early archaeological record with wider and more elusive social, cognitive and symbolic landscapes. It seeks to move beyond a limiting notion of early hominin culture and behaviour as dictated solely by the environment to present the early hominin world as the outcome of a dynamic dialogue between the physical environment and its perception and habitation by active agents. This international group of contributors presents theoretically informed yet empirically based perspectives on hominin and human landscapes.

Exploring Places and Landscapes of Everyday Experience in the Outer Hebridean Iron Age May 26 2022 This thesis explores aspects of everyday experience and the creation of place within the Iron Age island landscapes of the Outer Hebrides. While investigations of place and landscape, as experiential phenomena, are well developed in the context of Neolithic and Bronze Age research such approaches have been largely neglected within British Iron Age studies and in the study of the Outer Hebridean Iron Age more specifically. A hitherto focus upon ritual landscapes partly explains the lack of uptake within British Iron Age contexts more frequently defined by concepts of domesticity. The experience of place and landscape, however, are not only of significance within 'ritual' contexts but play an important role in the shaping of human action in the realm of the everyday. Instead, the principal barrier appears to be methodological - how does one go about investigating everyday experiences within prehistoric landscapes? A major component of this research has therefore been to explore and develop a methodology for this research. Current archaeological practice provides two contrasting methods for the study of landscape experience - one rooted in the analysis of field observations, inspired more directly by phenomenology, and the other via the application of GIS as a means of modeling landscapes from the perspective of human engagement. Despite much shared

theoretical ground there remains little dialogue between practitioners of these respective approaches. It is proposed, however, that both approaches can make valued contributions to our understanding of the past and this thesis aims to contribute to an emerging discourse between what are commonly conceived as contradictory methods of enquiry. By exploring the character and diversity of island landscape settlement locales and the everyday experiences of Iron Age places this research offers an alternative framework for understanding the Iron Age societies of the Outer Hebrides.

Isles at the Edge of the Sea Jan 28 2020 Off the western seaboard of Scotland are hundreds of islands. Beginning on Arran, Jonny Muir sets out to explore these places with a single ambition: to reach the St Kilda archipelago, the islands at the edge of the world. On the way he attempts to find his inner peace on Holy Island, takes part in a punishing foot race across the mountains of Jura, confronts the Inaccessible Pinnacle on Skye and walks the white-sand beach on Berneray. He encounters sharks and whales, discovers gory histories and follows in the footsteps of Boswell and Johnson, but island life is not without its challenges. 'Man-eating' midges live up to their reputation on Rum. An Atlantic storm threatens to rip his tent to shreds on Barra. Wicked weather lashes the Outer Hebrides, leaving his prospects of reaching St Kilda balanced on a knife-edge. An intensely personal account of a journey through some of Britain's most extraordinary landscapes. Complete with twenty five beautiful colour plates.

Coastal Landscapes of the Mesolithic Jan 10 2021 Coastal Landscapes of the Mesolithic: Human Engagement with the Coast from the Atlantic to the Baltic Sea explores the character and significance of coastal landscapes in the Mesolithic – on different scales and with various theoretical perspectives and methodological

approaches. Mesolithic people were strongly connected to the sea, with coastal areas vital for subsistence and communication across the water. This anthology includes case studies from Scandinavia, western Europe and the Baltic area, presented by key international researchers. Topics addressed include large-scale analyses of the archaeological and geological development of coastal areas, the exploration of coastal environments with interdisciplinary methods, the discussion of the character of coastal settlements and of their possible networks, social and economic practices along the coast, as well as perceptions and cosmological aspects of coastal areas. Together, these topics and approaches contribute in an innovative way to the understanding of the complexity of topographically changing coastal areas as both border zones between land and sea and as connecting landscapes. Providing novel insights into the study of the Mesolithic as well as coastal areas and landscapes in general, the book is an important resource for researchers of the Mesolithic and coastal archaeology.
