Wired for Story Nov 24 2022 This guide reveals how writers can utilize cognitive storytelling strategies to craft stories that ignite readers' brains and captivate them through each plot element. Imagine knowing what the brain craves from every tale it encounters, what fuels the success of any great story, and what keeps readers transfixed. Wired for Story reveals these cognitive secrets—and it's a game-changer for anyone who has ever set pen to paper. The vast majority of writing advice focuses on "writing well" as if it were the same as telling a great story. This is exactly where many aspiring writers fail—they strive for beautiful metaphors, authentic dialogue, and interesting characters, losing sight of the one thing that every engaging story must do: ignite the brain's hardwired desire to learn what happens next. When writers tap into the evolutionary purpose of story and electrify our curiosity, it triggers a delicious dopamine rush that tells us to pay attention. Without it, even the most perfect prose won't hold anyone's interest. Backed by recent breakthroughs in neuroscience as well as examples from novels, screenplays, and short stories, Wired for Story offers a revolutionary look at story as the brain experiences it. Each chapter zeroes in on an aspect of the brain, its corresponding revelation about story, and the way to apply it to your storytelling right now.

From Testimony to Story Dec 25 2022 The stories of Holocaust survivors and others who were persecuted by the Nazis are an invaluable resource for understanding what effect persecution had on victims and how they dealt with this experience over time. In recent decades, researchers in many countries began videotaping contemporary witnesses as they told their stories, allowing their voices to be heard, when personal encounters are no longer possible. In the interviews, biographical narratives and personal memories are used to document the mass crimes committed by the Nazis and also to illuminate how survivors processed these memories in their lifetime. This multi-faceted historical source poses special challenges to educational work. This volume reflects international developments, trends and debates about the videotaped contemporary witness interviews and their digital archives. Different interview collections and educational approaches from Israel, the Czech Republic, Poland and Germany are presented. These essays document the exchange that took place between education experts from these four countries as part of the series Entdecken und Verstehen. Bildungsarbeit mit Zeugnissen von Opfern des

Nationalsozialismus ("Discovering and Understanding: Educational Work with Testimonials from Victims of National Socialism") that was initiated and organized by the Foundation EVZ in 2010 and 2011.

The Story Grid Oct 31 2020 WHAT IS THE STORY GRID? The Story Grid is a tool developed by editor Shawn Coyne to analyze stories and provide helpful editorial comments. It's like a CT Scan that takes a photo of the global story and tells the editor or writer what is working, what is not, and what must be done to make what works better and fix what's not. The Story Grid breaks down the component parts of stories to identify the problems. And finding the problems in a story is almost as difficult as the writing of the story itself (maybe even more difficult). The Story Grid is a tool with many applications: 1. It will tell a writer if a Story works? or doesn't work. 2. It pinpoints story problems but does not emotionally abuse the writer, revealing exactly where a Story (not the person creating the Story) the Story) has failed. 3. It will tell the writer the specific work necessary to fix that Story's problems. 4. It is a tool to re-envision and resuscitate a seemingly irredeemable pile of paper stuck in an attic drawer. 5. It is a tool that can inspire an original creation.
