Help is here! Samsung  
released its newest piece of  
technology in the form of the  
Gear S2 line of Smart watches.  
The line was released to the  
public in October of 2015. The  
reviews to date launch the  
device for its polish,  
compatibility and innovation.  
The new Smart Watch comes  
equipped with a number of new  
features as well as features  
that are similar to smart  
watches previously released by  
other companies. The features  
included in the S2 design  
include a barometer, ambient  
light sensor, Wi-Fi, NFC and  
Bluetooth connection  
capabilities, a one point two  
inch circular display, a dual-  
core 1GHz processor, storage

of approximately five hundred and twelve megabytes and a Tizen operating system platform. Other features on the smart S2 watch include contacts, music player, maps, navigation, S Voice, email, notifications, messages and S Health apps. The purpose of this article is to highlight the facts and features of the new Smart Watch by Samsung. As with any specialized field, pocket watch collecting has its own terminology, and it is not always easy for the novice collector to understand what the "experts" are talking about. What does it mean to say that a watch has "jewels" or that it is "adjusted"? What is a "hunter case" watch? What's the difference between a railroad "grade" watch and a railroad "approved" watch? What is a

"lever set" watch? Isn't "rolled gold" a brand of pretzel? Etc., etc., etc. This booklet is full of all the things I wish somebody had told me when I first started collecting, and which I have shared with many new collectors over the years. Keep in mind that I have tried to keep things as simple and basic as possible for quick and easy comprehension, which necessarily means that this is not a scholarly treatise. But hopefully this will give you enough information to get you started and also give you a clue what those "other" books are talking about. This handbook addresses every aspect of a watchstander's duties at sea and in port. This revised edition offers new material on the rules of the road, weather, engineering, and more.
