Little Leonardo's Fascinating World of Paleontology Feb 08 2021 Companion book to the Little Leonardo Fascinating World of series all about paleontologists and dinosaurs with hands-on activities for young readers. Learn fun facts about dinosaurs and the scientists who study them, called paleontologists, with simple hands-on activities for young readers. Did you know that a dinosaur bone is a fossil? Or that the same bones that form your ear form the jaw bones in a Tyrannosaurus Rex? The activities, designed to engage both the readers' hands and minds, include fossilizing a sponge, making origami dinosaur tracks, preserving toy bugs in gummy amber, and more. *Little Leonardo's Fascinating World of Paleontology* acts as a hybrid of Little Leonardo's Fascinating World of books and Little Leonardo's MakerLab books,

which are both part of the Little Leonardo series from Gibbs Smith. Jeff Bond has been working with dinosaurs since 1992. He currently serves as Education Director for the George S. Eccles Dinosaur Park in Ogden, Utah. In his spare time, he designs origami, plays piano, collects model mecha, writes science fiction, and enjoys adventures with his beautiful wife and two rambunctious daughters. Greg Paprocki works full-time as an illustrator and book designer. He has illustrated several Curious George books, as well as previous books in the Little Leonardo series, the BabyLit alphabet book series, the new Count and Find primer series, and *The Big Book of Superheroes* for Gibbs Smith. He lives in Lincoln, Nebraska.

Digging Up Insect Fossils Oct 07 2020

According to fossils that have been found, insects have been living on Earth for more than 400 million years. That means they were around before the dinosaurs and long before humans first walked on Earth. How do scientists know this? They study the different kinds of impressions left in rock from these amazing prehistoric creatures. Readers will view cool photographs of these finds, and learn about the different kinds of insect fossils, how they formed, and what we've learned from them.

Passion in the Bones Oct 19 2021 Fourteen years ago, Elaine Howard stumbled into a rock shop and bought a fateful souvenir- a little dinosaur tooth- that would change her life forever. Elaine's interest in that fossil not only awakened her passion for paleontology but transformed her life from one of negativity and hopelessness to one of excitement and adventure. On the surface, it appeared dinosaurs brought Elaine back to life. In reality, it was her change in mental focus that radically transformed her life for the better. Don't wait to find your life-changing passion by chance. You have the power to take control and initiate your own positive transformation. In *Passion in the Bones*, Elaine provides a step-by-step guide to finding and sustaining a passion that will get the positives flowing—and keep them flowing—in your life.

A Little Bit of Dinosaur Sep 29 2022 Did you know that you have a little bit of dinosaur in you? And it's your mother's fault. She fed you that cheese sandwich, which had a calcium atom that used to be in the bones of a T-rex. This humorous story follows a calcium atom as it journeys from dry bones to your jawbone! Inspired by U.S. environmentalist Aldo Leopoldo, this story follows a little bit of dinosaur, a calcium atom, as it travels over time from a dinosaur to a child. In his 1949 classic, *A Sand*

County Almanac, Leopoldo beautifully discussed how man and nature are interconnected. This amazing circle of life is illustrated with humour and a touch of empathy. Sisters Elleen Hutcheson and Darcy Pattison team up to bring Leopoldo's circle of life to kids. Hutcheson is a high school biology teacher; five of Pattison's picture books have been named NSTA Outstanding Science Trade Books. Each is shaking her finger at their mother wondering why she fed them that cheese sandwich.

Dinosaur Lady Feb 20 2022 This is the story of a woman who dared to dig, explore, and discover. This is the story of Dinosaur Lady. Mary Anning loved scouring the beach near her home in England for shells and fossils. She fearlessly climbed over crumbling cliffs and rocky peaks, searching for new specimens. One day, something caught Mary's eye. Bones. Dinosaur Bones. Mary's discoveries rocked the world of science and helped create a brand-new field of study: paleontology. But many people believed women couldn't be scientists, so Mary wasn't given the credit she deserved. Nevertheless, Mary kept looking and learning more, making discoveries that reshaped scientific beliefs about the natural world. Dinosaur Lady is a beautiful and brilliant picture book that will enlighten children about the discovery of the dinosaurs and the importance of female scientists. It also includes a timeline of Mary Anning's life and lots of fantastic fossil facts!
