Climate Neutral and Resilient Farming Systems Aug 01 2020 This book presents evidence-based research on climate-neutral and resilient farming systems and further to provide innovative and practical solutions for reducing greenhouse gas emissions and mitigating the impact of climate change. Intensive farming systems are a significant source of greenhouse gas emissions, thereby contributing to global warming and the acceleration of climate change. As paddy rice farming is one of the largest contributors, and most environmentally damaging farming systems, this will be a particular focus of the book. The mitigation of greenhouse gas emissions needs to be urgently addressed to achieve the 2 degrees Celsius target adopted by COP21 and the 2015 Paris Agreement, but this is not possible if local and national level innovations are not accompanied by international level cooperation, mutual learning and sharing of knowledge and technologies. This book, therefore, brings together international collaborative research on climate-neutral and resilient farming systems compiled by leading scientists and experts from Europe, Asia and Africa. The chapters

present evidence-based research and innovative solutions that can be applied or upscaled in different farming systems and regions across the world. Chapters present models and technologies that can be used for practical implementation at the systemic level and advance state of the art knowledge on carbon neutral farming. Combining theory and practice, this interdisciplinary book provides guidance which can inform and increase cooperation between researchers from various countries on climate-neutral and resilient farming systems. Most importantly, the volume provides recommendations which can be put into practice by those working in the agricultural industry, especially in developing countries, where they are attempting to promote climate-neutral and resilient farming systems. The book will be of great interest to students and academics of sustainable agriculture, food security, climate mitigation and sustainable development, in addition to policymakers and practitioners working in these areas.

Empire of the Sikhs Mar 27 2020 Ranjit Singh has been largely written out of accounts of India's past by British historians, yet he was one of the most powerful and charismatic figures in Indian history. He unified the warring chiefdoms of the Punjab into an extraordinary northern empire, built up a formidable army, kept the British in check to the south of his realm, and closed the Khyber Pass through which plunderers had poured into India for centuries. His consummate humanity was unique among empire-builders. He gave employment to defeated foes, honored faiths other than his own, and included Hindus and Muslims among his ministers. A colorful character, he was inspired by the principles of peaceful coexistence uniquely articulated by the Sikh Gurus, firm in upholding the rights of others, and unabashed in exercising his own. The authors of this first full-length biography in English make use of a variety of eyewitness accounts, from reports by Maratha spies at the Lahore Durbar to British parliamentary papers and travel accounts. The story ends with the controversial Anglo-Sikh Wars following Ranjit's death, which saw the fall of his empire in the hands of his successors whose internecine conflict was exploited by the British. Coinciding with the 300th anniversary of the consecration of the Sikh holy scriptures, this book honors a vital figure in Sikh history.

Hanging Of Bhagat Singh Vol V, Bhagat Singh's Jail Note Book Jun 22 2022 Shaheed Bhagat Singh's 'Jail Notebook' opens a window into his exploration of ideas of distinguished thinkers and philosophers. Well-known among his comrades as an avid and voracious reader, Bhagat Singh managed to procure during his imprisonment in jail a large number of selected books by prominent authors of his choice. The excerpts, notes and quotes from those books which he wrote down in his jail notebook reflected not only the seriousness with which he studied the books but also his intellectual sophistication and social and political concerns. However, the perfunctory reference to the sources or books from which these notes and quotes were taken left a rather perplexing question mark with regard to the authentic source i.e. from exactly which editions of which books by which particular authors were

these taken. As a result, fantastic claims and wild speculations came to be made by admiring scholars as to the number of books and the kind of original works of great thinkers that Bhagat Singh was able to study in the jail. As a sequel to that the present work Bhagat Singh's 'Jail Note Book', Its Context and Relevance by Harish Jain represents an exceptionally tenacious and laborious search and research into the specific and authentic sources of the particular notes and quotes entered in the Jail Notebook. The story of the author's exploration for over a decade, searching and identifying books by following astute guesses and hunches, and rummaging through many likely or probable books accessible at that time, many of which were not easily available now, makes a fascinating reading. Contextualising the importance and reach of the ideas of the various authors in those times helps one to understand why they might have appeared significant to Bhagat Singh. Besides discussing the ideas central to the books he read attempt has been made here to explain the import of the quotes he chose to copy. A unique work of its kind, this study is both enriching and a pleasure to read.
