Do exorcisms involve swearing and spinning heads? Are the Amish allowed to drive cars and use computers? Ron Hubbard's stories told as sermons during a Scientology service. From the Amish to Voodoo, the beliefs and practices explored in this book may be unorthodox—and often dangerous—but they are always fascinating. While some of them are dying out, and others are gaining popularity with a modern audience, all offer insight into the future of religion in the United States—and remind that fact is often stranger than fiction. Carole Hillenbrand, long acknowledged as a preeminent authority on Islam, has now written a superb introduction to this great world religion, a book that promises to be the most lucid, nuanced text of its kind on the market. Beginning with the life of Muhammad, Hillenbrand firmly establishes in historical and global context the beliefs and ideals of Muslims and the branches and movements within the faith. Rather than portraying Islam as a monolithic entity, Hillenbrand emphasizes its diversity and variety. Featured chapters include, but are not limited to: Law, Diversity, Sufism, Jihad, and Women. Finally, a concluding chapter on Islam in the globalized twenty-first century is bound to appeal to instructors and students alike. In a time when academic theology often neglects the lived practices of the Christian community, this volume seeks to bring balance to the situation by showing the dynamic link between the task of theology and the practices of the Christian life. The work of thirteen first-rate theologians from several cultural and Christian perspectives, these informed and informative essays explore the relationship between Christian theology and practice in the daily lives of believers, in the ministry of Christian communities, and as a needed focus within Christian education. Gregory Jones, Serene Jones, Amy Plantinga Pauw, Christine Pohl, Kathryn Tanner, Miroslav Volf, Tammy Williams "'The world today is as furiously religious as it ever was.' This quote from Peter Berger now appears to be undisputed in the contemporary social and cultural sciences. A look around the globe reveals that modernization does not necessarily lead to a decline of religion, neither in society nor in the minds of individuals. Moreover, the multifaceted and divergent responses to modernization processes have significantly contributed to a critical reflection on the notion of a singular modernity, and as a result it has been suggested to speak of multiple, vernacular, alternative, or "other" modernities. Southeast Asia in particular presents a rich field of inquiry into the dynamics of these "modernities" that have produced and shaped a wide variety of religious phenomena. With case studies from Indonesia, Malaysia, Thailand, Myanmar, and Vietnam, these contributions reveal contemporary religious practices in Southeast Asia as thoroughly modern manifestations of uncertainties, moral disquiet and unequal rewards in the contemporary moment."--Publisher's description. What does religion mean to the individual? How are people religious and what do their beliefs, practices and identities mean to them? The individual's place within studies of religion has tended to be overlooked recently in favour of macro analyses. Religion and the Individual draws together authors from around the world to explore belief, practice and identity. Using original case studies and other work firmly placed in the empirical, contributors discuss what religious belief means to the individual. They examine how people embody what religion means to them through practice, considering the different meanings that people attach to religion and the social expressions of their personal understandings and the ways in which religion shapes how people see themselves in relation to others. This work is cross-cultural, with contributions from Asia, Europe and North America. This book covers such topics as what Wicca really embodies, the ethics of a Witch, how to get started, mysteries and rituals, spellcraft and spells, the physically challenged Witch, and much more. Prepared by the Federal Bureau of Prisons as a guide for prison chaplains, this detailed summary of various religious practices and requirements provides a useful consistent reference work for many other purposes. This two-volume reference is the first international survey of shamanistic beliefs from prehistory to the present day. In nearly 200 detailed, readable entries, leading ethnographers, psychologists, archaeologists, historians, and scholars of religion and folk literature explain the general principles of shamanism as well as the details of widely varied practices. What is it like to be a shaman? Entries describe, region by region, the traits, such as sicknesses and dreams, that mark a person as a shaman, as well as the training undertaken by initiates. They detail the costumes, music, rituals, artifacts, and drugs that shamans use to achieve altered states of consciousness, communicate with spirits, travel in the spirit world, and retrieve souls. Unlike most Western books on shamanism, which focus narrowly on the individual's experience of healing and trance, Shamanism also examines the function of shamanism in society from social, political, and historical perspectives and identifies the ancient, continuous thread that connects shamanistic beliefs and rituals across cultures and millennia. Nearly 200 entries on shamanic belief systems, practices, rituals, and related phenomena 152 contributors including international experts and pioneering researchers in the field 100 photos, charts, and tables Multicultural bibliography of significant materials from the fields of history, ethnography, and anthropology This Is The First Full-Length Systematic Study Of Santal Religion As Manifested In Its Beliefs And Practices.
