This practical, science-based book focuses on helping partners, family, and friends understand breast cancer. It guides them in how to provide the best emotional and practical support when helping someone with breast cancer to cope, recover, and thrive, while maintaining their own physical and psychological health. The authors translate psychological evidence into concrete,

practical advice for caregivers, validated through their first-hand experience. It also suggests ways to help someone with breast cancer make the best decisions in consultation with oncology professionals. The authors draw on well-established psychological principles relevant to social attitudes, how decisions are made, good communication skills, empathy, and how to better understand the ideas and worries experienced by women who have, or may have, breast cancer and those close to them. Each chapter includes 'How you can Help' sections that give specific and concrete suggestions, as well as a chapter summary of the main points along with recommendations and additional resources. It is essential reading for all those who want to help and support a loved one with breast cancer. It is also useful for training healthcare professionals in how to support partners. In the last half-century, high-speed water transportation has developed rapidly. Novel high-performance marine vehicles, such

as the air cushion vehicle (ACV), surface effect ship (SES), high-speed monohull craft (MHC), catamaran (CAT), hydrofoil craft (HYC), wave-piercing craft (WPC) and small water area twin hull craft (SWATH) have all developed as concepts, achieving varying degrees of commercial and military success. Prototype ACV and SES have achieved speeds of 100 knots in at calm con- tions; however, the normal cruising speed for commercial operations has remained around 35–50 knots. This is partly due to increased drag in an average coastal s- way where such craft operate services and partly due to limitations of the propulsion systems for such craft. Water jets and water propellers face limitations due to c- itation at high speed, for example. SWATH are designed for reduced motions in a seaway, but the hull form is not a low drag form suitable for high-speed operation. So that seems to lead to a problem - maintain water contact and either water propulsion systems run out of power or craft motions and

speed loss are a problem in higher seastates. The only way to higher speed would appear to be to disconnect completely from the water surface. You, the reader, might respond with a question about racing hydroplanes, which manage speeds of above 200 kph. Yes, true, but the power-to-weight ratio is extremely high on such racing machines and not economic if translated into a useful commercial vessel. The untold story about how the internet became social, and why this matters for its

future "Whether you're reading this for a nostalgic romp or to understand the dawn of the internet, *The Modem World* will delight you with tales of BBS culture and shed light on how the decisions of the past shape our current networked world."--danah boyd, author of *It's Complicated: The Social Lives of Networked Teens* Fifteen years before the commercialization of the internet, millions of amateurs across North America created more than 100,000 small-scale computer networks. The people who built and maintained these dial-up bulletin board systems (BBSs) in the 1980s laid the groundwork for millions of others who would bring their lives online in the 1990s and beyond. From ham radio operators to HIV/AIDS activists, these modem enthusiasts developed novel forms of community moderation, governance, and commercialization. *The Modem World* tells an alternative origin story for social media, centered not in the office parks of Silicon Valley or the meeting rooms of military

contractors, but rather on the online communities of hobbyists, activists, and entrepreneurs. Over time, countless social media platforms have appropriated the social and technical innovations of the BBS community. How can these untold stories from the internet's past inspire more inclusive visions of its future? Learn how to create beautiful wigs from start to finish. With a few tools and supplies, this step by step guide including photos gives you all the information you need to create your own beautiful custom wigs fast. suffering as a point of entry, a common ground to share with those who think of themselves as excluded from Western beauty norms because of their hair. Originally published in 1966, THE WIG is the story of Lester Jefferson, a young man of great good will, whose repeated attempts to become a part of "The Great Society" are doomed in advance. Aided, thwarted, and confused by numerous, curious companions, Lester conducts his inevitable search for happiness in a series of absurdist misadventures that begin with the transformation of the hair on his head into burnished silken curls. "Charles Wright's Negro world explodes with the crazy laughter of a man past caring. His style, as mean and vicious a weapon as a rusty hacksaw, is the perfect vehicle for his zany pessimism. THE WIG is a brutal, exciting, and necessary book"-Conrad

Knickerbocker for The New York Times. Any singer longing to have a career in opera, particularly in Europe, should be familiar with the European system of classifying voices known as Fach. The Opera Singer's Career Guide: Understanding the European Fach System presents valuable information to help readers learn, understand, and use the Fach system to their professional advantage. More than just soprano, alto, tenor, or bass, students and professionals alike should know the 25 different Fach categories fully defined here, along with the examples of roles, audition arias, and European opera houses and agents provided. Based on careful research and personal experience, singer and teacher Pearl Yeadon McGinnis describes the features, characteristics, and benefits of the Fach system, including voice categorization and classification and using Fach to train the young voice. She provides practical information on maintaining a career in opera, such as the different types, procedures, and

pitfalls of opera auditions; types of opera contracts and contract negotiations; and the value of networking. She explains the different styles of European opera houses and gives an example of life in a state level German opera house, including the various performance spaces, the makeup and responsibilities of an ensemble, and the jobs and functions of opera house personnel. A glossary and several appendixes supply tools for auditioning, such as newly classified roles for Children, Lyric, and Beginner singers; roles for the established Fach categories; lists of opera agents and houses in the German speaking countries; and suggested audition arias by Fach. In addition, practical details are offered about establishing and maintaining residency in Europe, obtaining permission to live and work in Europe, and helpful hints about customs and travel. First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company. By the late 1700s, half the free population of Saint Domingue was black. The French Caribbean

colony offered a high degree of social, economic, and physical mobility to free people of color. Covering the period 1776-1791, this study offers the most comprehensive portrait to date of Saint Domingue's free black elites on the eve of the colony's transformation into the republic of Haiti. Stewart R. King identifies two distinctive groups that shared Saint Domingue's free black upper stratum, one consisting of planters and merchants and the other of members of the army and police forces. With the aid of individual and family case studies, King documents how the two groups used different strategies to pursue the common goal of economic and social advancement. Among other aspects, King looks at the rural or urban bases of these groups' networks, their relationships with whites and free blacks of lesser means, and their attitudes toward the acquisition, use, and sale of land, slaves, and other property. King's main source is the notarial archives of Saint Domingue, whose holdings offer an especially rich glimpse of free

black elite life. Because elites were keenly aware of how a bureaucratic paper trail could help cement their status, the archives divulge a wealth of details on personal and public matters.

Blue Coat or Powdered Wig is a vivid portrayal of race relations far from the European centers of colonial power, where the interactions of free blacks and whites were governed as much by practicalities and shared concerns as by the law.
