A Legal Analysis of NGOs and European Civil Society Mar 31 2020 Amid widespread awareness and discussion of "the democratic

deficit" and "shrinking civil space," the role of nongovernmental organizations (NGOs) becomes increasingly important. Yet the precise legal status of such bodies is ill-defined. Here, for the first time, is a thorough commentary and analysis of the position of NGOs and European civil society in the European Union (EU) constitutional system, bringing to the fore existing and desirable means of public participation in EU lawmaking. Recognizing that NGOs have historically been designed to meet the ends of civil society, the analysis focuses on the following topics and issues: means in EU law of advocating for the collective interests of civil society; unofficial means of influencing the EU institutions; access to documents and the European Citizens' Initiative as means of exerting pressure on EU legislation; relations between the EU institutions and NGOs, including lobbying activities; bringing actions in the common good before courts and other institutions; the special role of NGOs in environmental protection; complaints to the Commission and the European Ombudsman; EU funding for NGOs; and transboundary philanthropy. Drawing on a broad spectrum of sources of law, including CJEU case law and relevant legal literature, the book offers insightful proposals leading to the democratization of the EU's internal procedures that will allow enhanced cooperation of civil society representatives across national borders. In its thorough examination of legal tools that can respond to the "democratic deficit," this book makes a distinctive contribution to the public debate on the future of the European Union, especially in the context of emerging threats to further integration. It will prove of great value not only to civil activists, academics and policymakers but also to everyone interested in European integration and affordance for social participation.

Distributive Principles of Criminal Law Jun 14 2021 The rules governing who will be punished and how much determine a society's success in two of its most fundamental functions: doing justice and protecting citizens from crime. Drawing from the existing theoretical literature and adding to it recent insights from the social sciences, Paul Robinson describes the nature of the practical challenge in setting rational punishment principles, how past efforts have failed, and the alternatives that have been tried. He ultimately proposes a principle for distributing criminal liability and punishment that will be most likely to do justice and control crime. Paul Robinson is one of the world's leading criminal law experts. He has been writing about criminal liability and punishment issues for three decades, and has published dozens of influential articles in the best scholarly journals. This long-awaited volume is a brilliant synthesis of social science research and legal reasoning that brings together three decades of work in a compelling line of argument that addresses all of the important issues in assessing liability and punishment.
