Listening for Well-being Nov 23 2022 Arun's insights...provide a unique perspective on collaborative solutions to address humanity's greatest challenges. -Ratan Tata Walls have risen between nations and people of different faiths and cultures. There is increasing violence against people whom we do not approve-physical in the real world and verbal online. We are unwilling to give people the dignity that they deserve when they are different. We are losing our ability to listen to people who are not like us even within the boundaries of our nations. The idea of democracy is in peril. Meanwhile, global problems-climate change, depletion of shared resources, persistent poverty and increasing inequalities-cry out for more urgent solutions. Listening is a simple idea. Everyone-rich or poor, powerful or weak, educated or uneducated-can listen to each other. In Listening for Well-Being, Arun Maira shows us ways to use the power of listening. He analyses the causes for the decline in

listening and proposes solutions to increase its depth in private and public discourse. Drawing from his extensive experience as a leading strategist, Maira emphasizes that by listening deeply, especially to people who are not like us, we can create a more inclusive, just, harmonious and sustainable world for everyone.

Cities for People, Not for Profit Sep 09 2021 The worldwide financial crisis has sent shock-waves of accelerated economic restructuring, regulatory reorganization and sociopolitical conflict through cities around the world. It has also given new impetus to the struggles of urban social movements emphasizing the injustice, destructiveness and unsustainability of capitalist forms of urbanization. This book contributes analyses intended to be useful for efforts to roll back contemporary profit-based forms of urbanization, and to promote alternative, radically democratic and sustainable forms of urbanism. The contributors provide cutting-edge analyses of contemporary urban restructuring, including the issues of neoliberalization, gentrification, colonization, "creative" cities, architecture and political power, sub-prime mortgage foreclosures and the ongoing struggles of "right to the city" movements. At the same time, the book explores the diverse interpretive frameworks – critical and otherwise – that are currently being used in academic discourse, in political struggles, and in everyday life to decipher contemporary urban transformations and contestations. The slogan, "cities for people, not for profit," sets into stark relief what the contributors view as a central political question involved in efforts, at once theoretical and practical, to address the global urban crises of our time. Drawing upon European and North American scholarship in sociology, politics, geography, urban planning and urban design, the book provides useful insights and perspectives for citizens, activists and intellectuals interested in exploring alternatives to contemporary forms of capitalist urbanization.

The People Are Not an Image Dec 24 2022 A major intervention in media

studies theorizes the politics and aesthetics of internet video The wave of uprisings and revolutions that swept the Middle East and North Africa between 2010 and 2012 were most vividly transmitted throughout the world not by television or even social media, but in short videos produced by the participants themselves and circulated anonymously on the internet. In *The People Are Not An Image*, Snowden explores this radical shift in revolutionary self-representation, showing that the political consequences of these videos cannot be located without reference to their aesthetic form. Looking at videos from Tunisia, Bahrain, Syria, Libya, and Egypt, Snowden attends closely to the circumstances of both their production and circulation, drawing on a wide range of historical and theoretical material, to discover what they can tell us about the potential for revolution in our time and the possibilities of video as a genuinely decentralized and vernacular medium.

People, Not Psychiatry May 05 2021 Originally published in 1973, this book is about people and psychiatry. About people who rejected psychiatry as it was generally practised at the time, people who sought for and found alternative ways of caring for and healing one another. The author, who had been active in radical alternatives to psychiatry for some time, offers us a programme based not on drugs, repression and a 'questionable' expertise, but on human caring, greater awareness of the body, deeper communication between persons and a willingness to let the emotions flow. It is a challenging alternative which came at a time when the viability of scientific, theoretical and chemical approaches to distress were being questioned at all levels of society. This alternative includes the new direct methods of healing (making whole) such as Encounter, Gestalt, Bioenergetics, Psychofantasy – methods that do not do things to people but allow them to feel their way into change through experiment, flow and choice. The main focus of the book is *People, not Psychiatry (PNP)*, the network set up by the author in 1969. PNP is open to all, and people in it help one another in times of stress and crisis, if they are asked to and when they are needed. One of the main assets of these networks is that they are an alternative and they are there. The book tells the story of PNP's birth and growth. It is a personal story, a moving story, a story about people. In addition, the book contains some lively theoretical discussion, both simple and clear, in the course of which the author tentatively offers his own theory of neurosis – that many people become victims of the primitive logic patterns laid down in infancy, patterns that become reinforced through fear and habit and have to be dissolved or replaced if we are to enjoy a full, healthy, free-flowing life. The book is directed at doctors, patients, consultants, nurses, psychologists, social workers, therapists, in fact anyone involved in any way in the field of psychiatry. It is also offered to all those whom psychiatry touches, that it to say – everyone.

Ending Ageism, or How Not to Shoot Old People May 25 2020 When the term “ageism” was coined in 1969, many problems of exclusion seemed resolved by government programs like Social Security and Medicare. As people live longer lives, today’s great demotions of older people cut deeper into their self-worth and human relations, beyond the reach of law or public policy. In *Ending Ageism, or How Not to Shoot Old People*, award-winning writer and cultural critic Margaret Morganroth Gullette confronts the offenders: the ways people aging past midlife are portrayed in the media, by adult offspring; the esthetics and politics of representation in photography, film, and theater; and the incitement to commit suicide for those with early signs of “dementia.” In this original and important book, Gullette presents evidence of pervasive age-related assaults in contemporary societies and their chronic affects. The sudden onset of age-related shaming can occur anywhere—the shove in the street, the cold shoulder at the party, the deaf ear at the meeting, the shut-out by the personnel office or the obtuseness of a government. Turning intimate suffering into public grievances, *Ending Ageism, Or How Not to Shoot Old People* effectively and beautifully argues that overcoming ageism is the next imperative social movement of our time. About the cover image: This elegant, dignified figure--Leda Machado, a Cuban old enough to have seen the Revolution--once the center of a vast photo mural, is now a fragment on a ruined wall. Ageism tears down the structures that all humans need to age well; to end it, a symbol of resilience offers us all brisk blue-sky energy. “Leda Antonia Machado” from “Wrinkles of the City, 2012.” Piotr Trybalski / Trybalski.com. Property for People, Not for Profit Mar 23 2020 The issue of private property and the rights it confers remain almost undiscussed in critiques of globalization and free market economics. Yet property lies at the heart of an economic system geared to profit maximization. The authors describe the historically specific and self-consciously explicit manner in which it emerged. They trace this history from earliest historical times and show how, in the hands of Thomas Hobbes and John Locke in particular, the notion of private property took on its absolutist nature and most extreme form - a form which neoliberal economics is now imposing on humanity worldwide through the pressures of globalization. They argue that avoiding the destruction of people’s ways of living and of Nature requires reshaping our notions of private property. They look at practical ways for social and ecumenical movements to press for alternatives.

Not To People Like Us Apr 04 2021 This important book brings the ignored population of abused upper-income women to light, revealing for the first time the depth and severity of "upscale abuse" How is it possible for a highly educated woman with a career and resources of her own to stay in a marriage with an abusive husband? How can a man be considered a pillar of his community, run a successful business and regularly give his wife a black eye? That we can even ask these startling questions proves how convinced we are that domestic abuse is restricted to the lower classes. In "Not to People Like Us" psychotherapist Susan Weitzman dramatically challenges this assumption. It is the first book to explore a previously overlooked population of emotionally and physically battered wives-the upper-educated and upper-income women, who rarely report abuse and remain trapped by their own silence. Weitzman draws on an in-depth study to document the shocking nature and incidence of abuse among the wives of professors, physicians and CEOs-many of them professionals and executives themselves. With keen insight and profound sensitivity, she reveals the unique path taken by the upscale wife-the early warning signs, the dilemmas and decisions, the dangerous desire to cover up and maintain appearances. The first book to condemn the legal and social service system for failing to recognize domestic violence among upper-income families, "Not to People Like Us" offers crucial information to help women find their way out of abusive relationships and toward safety and independence.

White Fragility Mar 03 2021 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people'" (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Corporations Are Not People Oct 30 2020 A revised and updated edition of the definitive guide to overturning *Citizens United*. Since the Supreme Court's *Citizens United* ruling that the rights of things—money and corporations—matter more than the rights of people, America has faced a crisis of democracy. In this timely and thoroughly updated second edition, Jeff Clements describes the strange history of this bizarre ruling, its ongoing destructive effects, and the growing movement to reverse it. He includes a new chapter, “Do Something!,” showing how—state by state and community by community—Americans are using creative strategies and tools to renew democracy and curb unbalanced corporate power. Since the first edition, sixteen states, one-hundred-sixty members of Congress, and five hundred cities and towns have called for a

constitutional amendment to overturn Citizens United, and the list is growing. This is a fight we can win! “ More relevant than ever, this updated edition of Corporations Are Not People chronicles the remarkably vibrant, nationwide grassroots movement to ‘ get money out and voters in. ’ ” —Katrina vanden Heuvel, Editor and Publisher, The Nation

Humans Need Not Apply May 17 2022 An “intriguing, insightful” look at how algorithms and robots could lead to social unrest—and how to avoid it (*The Economist*, Books of the Year). After decades of effort, researchers are finally cracking the code on artificial intelligence. Society stands on the cusp of unprecedented change, driven by advances in robotics, machine learning, and perception powering systems that rival or exceed human capabilities. Driverless cars, robotic helpers, and intelligent agents that promote our interests have the potential to usher in a new age of affluence and leisure—but as AI expert and Silicon Valley entrepreneur Jerry Kaplan warns, the transition may be protracted and brutal unless we address the two great scourges of the modern developed world: volatile labor markets and income inequality. In *Humans Need Not Apply*, he proposes innovative, free-market adjustments to our economic system and social policies to avoid an extended period of social turmoil. His timely and accessible analysis of the promises and perils of AI is a must-read for business leaders and policy makers on both sides of the aisle. “A reminder that AI systems don’t need red laser eyes to be dangerous.” —*Times Higher Education Supplement* “Kaplan...sidesteps the usual arguments of techno-optimism and dystopia, preferring to go for pragmatic solutions to a shrinking pool of jobs.” —*Financial Times*

In *The People Are Not An Image*, Snowden explores this radical shift in revolutionary self-representation, showing that the political consequences of these videos cannot be located without reference to their aesthetic form. Looking at videos from Tunisia, Bahrain, Syria, Libya, and Egypt, Snowden attends closely to the circumstances of both their production and circulation, drawing on a wide range of historical and theoretical material, to discover what they can tell us about the potential for revolution in our time and the possibilities of video as a genuinely decentralized and vernacular medium.
