This informative book, first published in 1987, presents the theories of community ecology within the context of a natural example. The text describes and examines issues in community ecology and shows how research on salamanders has helped to solve some of the problems surrounding the theories. Salamanders exist in stable populations of the kind assumed in community theory and are more appropriate than most other animals for research on the applications of that theory. The interesting and meaningful results, collected from observation on these excellent subjects posed challenges to beliefs within community ecology. Life histories of salamanders, fieldwork in distinctly differing habitats, competition, predation and evolution are discussed in an easily readable text. Professional ecologists and students of community ecology and herpetology will be interested in the information synthesised in this book. Many of these plays were grouped in greater cycles among which the cycle of

York, commonly known as the "York Mystery Plays", is the best preserved, and presumably one of the oldest, largest and most elaborate ones as well. Its forty-seven constituent plays are concerned with Christian belief and sacred history, a circumstance reflected in the collection's authentic title - the Corpus Christi play. It is interesting that the term 'mystery plays', an invention of the 18th century, does not only point to the content of the cycle, as the alternative expression 'miracle plays' does. The term simultaneously addresses those associations of people that were responsible for the cycle's staging: the trade and craft guilds of a town. Based on the archaic meaning of the word, denoting a 'handicraft or trade', it was occasionally referred to these guilds as 'mysteries' as well. In the case of the dramatic cycle of York, each individual play was assigned to one (or in some cases two) of these 'mysteries' or guilds. This paper aims at investigating the role these guilds played in the organisation, the funding and the staging of the cycle. It can be argued that aside from their more obvious economic and social functions, the medieval trade and craft guilds also had a cultural function in the narrow meaning of the term. Further can be argued that the Corpus Christi cycle was not only a cultural and a ritual event, but that it had an important social (and perhaps even an economic) function for the city of York and the communal life of its inhabitants. In fact, it may be this interplay of various domains of life and thought that can explain how the cycle could survive in the form of an annual performance for a period as long as two hundred years, and why it came into being as well as disappeared not randomly but at certain moments in history. Looking upon the play as a civic rather than an ecclesiastical affair, this work thus investigates the cycle's link with the economic history of York and the organisational development of the trade and craft guilds. It will be

shown in particular that as a sort of 'producers' the guilds had a range of clearly defined responsibilities and that among these the aspect of funding was the most central. Challenges existing views of crafts and service workers in Egypt in the nineteenth and early twentieth centuries. The Kenya Gazette is an official publication of the government of the Republic of Kenya. This book of essays reflects the wide-ranging interests of Robert Freke Gould, one of the earliest Masonic writers to approach the history of the order in a systematic and thorough manner. The varied and esoteric nature of the topics reflects the intense interest in spirituality and history of writers in the early twentieth century. Relying on a broad range of printed and secondary sources, *Wage Labor and Guilds* charts the history of guilds from their antecedents in the Roman Empire to their 'crisis' in the fourteenth century. . . . As a much-needed synthesis, [the book] will serve students well.--*Speculum* "A thoughtful and wide-ranging contribution to the social and economic history of the High Medieval urban milieu.--*Journal of Interdisciplinary History* "Interesting and comprehensive. . . . A major accomplishment.--*Journal of Economic History* "Epstein takes a fresh look at the organization of labor in medieval towns and emphasizes the predominance of a wage system within them. He offers illuminating comment on a wide range of subjects--on guilds and guild organization, on women and Jews in the work force, on the value given labor, and on the sources of disaffection. His book presents a feast of themes in medieval social history.--David Herlihy, *Brown*

University "This book charts the vicissitudes of a rural community of papermakers in Sichuan. The process of transforming bamboo into paper involves production-related and social skills, as well as the everyday skills that allowed these papermakers to survive in an era of tumultuous change. The Chinese revolution—understood as a series of interconnected political, social, and technological transformations—was, Jacob Eyferth argues, as much about the redistribution of skill, knowledge, and technical control as it was about the redistribution of land and political power. The larger context for this study is the "rural-urban divide": the institutional, social, and economic cleavages that separate rural people from urbanites. This book traces the changes in the distribution of knowledge that led to a massive transfer of technical control from villages to cities, from primary producers to managerial elites, and from women to men. It asks how a vision of rural people as unskilled has affected their place in the body politic and contributed to their disenfranchisement. By viewing skill as a contested resource, subject to distribution struggles, it addresses the issue of how revolution, state-making, and marketization have changed rural China."
