The story of humanity's earliest days on earth has come down to us chiefly in the tools and weapons early hominids shaped from flint. With these tools, they gained ascendancy over less dexterous beasts and began the slow conquest of their environment. Other records, including their very bones, have largely rotted away, but their tools of flint endure. H. Mewhinney presents *A Manual for Neanderthals* as "a common-sense, down-to-earth study of how flint tools and weapons were made—or for that matter, can still be made by any descendant of Stone Age man." The author first sets the scene with a delightful and informative disquisition on flintflaking and flint-flakers, and then explains clearly and concisely how he and earlier Neanderthals have made flint artifacts, illustrating each step with drawings and photographs. Archeologists and anthropologists will discover in this book a modest but genuine contribution to their fields, while collectors of Indian relics and people who like to tinker with tools and master unusual skills will find it a surprisingly practical guide to an interesting and ancient art. With patience, and with *A Manual for Neanderthals* at your side, you too can learn to flake flint. Designed for family abusers or people on the path of becoming abusers, this innovative treatment uses compassion for self and loved ones as an incompatible response to the motivation to control and abuse. One of the most effective treatments in the world, its theoretical and empirical foundations, and research evaluation are presented in the director's book, *Treating Attachment Abuse: A Compassionate Approach*, published by Springer. Hoy en día existe mucho desconocimiento con respecto a las Core Tools, la mayoría de las personas piensa que son herramientas de uso exclusivo para la industria manufacturera automotriz, sin embargo, estas pueden ser implementadas en cualquier tipo de empresa. Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of Give and Take). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep-spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In Deep Work, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, Deep Work takes the reader on a journey through memorable stories-from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air-and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. Deep Work is an indispensable guide to anyone seeking focused success in a distracted world. Every primary school has the daunting task of embedding ICT and e-learning into their curriculum. This practical manual is the first part of a two volume set that together makes up a detailed two year training programme for primary ICT and e-learning co-ordinators. The books combine key strategies and information with a weblog discussion from a group of 'virtual' co-ordinators who share their problems, fears and successes over the two-year programme, based on the author's wide experience of working with new co-ordinators and experienced staff on training programmes and in general support. Book 1 is designed specifically for co-ordinators new to the role who need starting points and broad support. It presents a structured training programme split over three terms, guiding co-ordinators through the key stages of developing and implementing ICT policy and practice, including:

- o auditing existing school systems
- o reviewing and revising the school policy for ICT
- o reviewing the ways in which ICT is used as a teaching and learning tool across the curriculum
- o examining methods for the management of technical support services
- o establishing a clear overview of standards in ICT, including a review of assessment procedures, moderating work, monitoring teaching and learning and creating E Portfolios.

The books have a companion website, which will offer downloadable versions of the photocopyable sheets from the book, as well as links to other sources of help and advice.

REVIEWS OF THE FIRST EDITION “The book provides frameworks and resources that would be highly relevant for new and aspiring department chairs. In fact, this text is ideally designed to serve as a selection for a book discussion group.”—The Department Chair “Succeeds in providing accessible and useful resources to individuals across different leadership roles... As a midpoint between textbook and reference work, it is successful at both and provides a clear and unbiased background to issues facing current leaders.”—Reflective Teaching During a time of unprecedented challenges facing higher education, the need for effective leadership – for informal and formal leaders across the organization – has never been more imperative. Since publication of the first edition, the environment for higher education has become more

critical and complex. Whether facing falling enrollments, questions of economic sustainability, the changing composition of the faculty and student bodies, differential retention and graduation rates, declining public confidence in the enterprise, or the rise in the use of virtual technologies – not to mention how COVID-19 and an intensified focus on long standing issues of racial and gender representation and equity have impacted institutions and challenged many long-standing assumptions – it is clear that learning on the job no longer suffices. Leadership development in higher education has become essential for advancing institutional effectiveness, which is the focus of this book. Taking into account the imperative issues of diversity, inclusion, and belonging, and the context of institutional mission and culture, this book centers on developing capacities for designing and implementing plans, strategies, and structures; connecting and engaging with colleagues and students; and communicating and collaborating with external constituencies in order to shape decisions and policies. It highlights the need to think broadly about the purposes of higher education and the dynamics of organizational excellence, and to apply these insights effectively in goal setting, planning and change leadership, outcomes assessment, addressing crises, and continuous improvement at both the level of the individual and organization. The concepts and tools in this book are equally valuable for faculty and staff leaders, whether in formal leadership roles, such as deans, chairs, or directors of institutes, committees, or task forces, or those who perform informal leadership functions within their departments, disciplines, or institutions. It can be used as a professional guide, a textbook in graduate courses, or as a resource in leadership training and development programs. Each chapter concludes with a series of case studies and guiding questions. The WHO Policy Guidance on Integrated Antimicrobial Stewardship Activities was developed after global consultations and is anchored in public health guiding principles in the human health sector. Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
