Hormonal Steroids presents the proceedings of the Sixth International Congress on Hormonal Steroids, held in Jerusalem, Israel in September 1982. The book covers a wide range of topics on the field of hormonal steroids research. The topics discussed include the history of steroid-protein interaction; enzyme induction by

estrogen; steroids and the immune system; correlative morphological and biochemical investigations on the stromal tissue of the human prostate; analysis of intact steroid conjugates by secondary ion mass spectrometry (including fabms) and by gas chromatography; and the role of lipoproteins in steroidogenesis by human luteinized granulosa cells in culture. Biochemists, pathologists, pharmacologists, and medical and pharmaceutical researchers will find the book a good source of insight. Rodd's Chemistry of Carbon Compounds, Second Edition, Volume I, Part D: Dihydric Alcohols: Their Oxidation Products and Derivatives describes acyclic compounds containing two functional groups on different carbon atoms. This volume is composed of six chapters, and begins with a description of dihydric alcohols and their derivatives. The next chapters are devoted to the classification and nomenclature of other dihydric alcohol derivatives, including hydroxyaldehydes, hydroxyketones, dicarbonyl compounds monohydroxy-monocarboxylic acids, and related compounds. The remaining chapters deal with nitrogen analogues, nitro and amino-monocarboxylic acids, aldehydic and ketonic monocarboxylic acids, and acyclic dicarboxylic acids. This book is of value to organic chemists and researchers.

The Battle of Algiers was an urban guerrilla campaign fought by the FLN (Front for the National Liberation of Algeria) against French colonial authorities in Algeria from late 1956 to late 1957, including police, regular soldiers, and veterans of the Indochina War. Failures of the rural insurgency forced the malcontents to find new avenues of action designed to create maximum publicity, provoking targeted regimes into excessive repression, and thus inciting the general population to join a broader revolutionary struggle. Trying to simulate the possibility of a strategic military victory for Algeria would be unrealistic, considering the military situation at the time. Let us imagine, then, other possibilities for the inexorable Algerian defeat in the years 1956 and 1957, anticipating the use of 1960s techniques and tactics. The

Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects – properties, synthesis, reactions, physiological and industrial significance – of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. Many ring systems (such as pyridines and oxazoles) are treated in distinct books, each consisting of separate volumes or parts dealing with different individual topics. With all authors are recognized authorities, the **Chemistry of Heterocyclic Chemistry** is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists. Set includes revised editions of some issues. The 15th report covers the years 1885-86. This book includes over 2,500 entries of organic compounds, some of which cover recently synthesized molecules of research interest, while others refer to known compounds which have come into prominence. It is an invaluable resource for Organic and Pharmaceutical chemists.
