**Individualizing Gender and Sexuality** Jun 08 2021 Nancy Chodorow, in her groundbreaking book *The Reproduction of Mothering*, quite simply changed the conversation in at least three areas of study: psychoanalysis, women's studies, and sociology. In her latest book, *Individualizing Gender and Sexuality*, she examines the complexity and uniqueness of each person's personal creation of sexuality and gender and the ways that these interrelate with other aspects of psychic and cultural life. She brings her well-known theoretical agility, wide-ranging interdisciplinarity, and clinical experience to every chapter, advocating for the clinician's openness, curiosity, and theoretical pluralism. The book begins with reflections on Freud's *Three Essays on the Theory of Sexuality*, followed by considerations of Melanie Klein and Stephen Mitchell, as well as on her own work and on the postmodern turn in psychoanalytic gender theory. Subsequent chapters address contemporary clinical-cultural issues such as women and work, women and motherhood, and men and violence. Concluding chapters elaborate on the multiple ingredients and the personal affective, conflictual, and defensive constellations and processes that create sexuality and gender in each individual. Ending with a chapter on homosexualities as compromise formations, Chodorow deepens her account of clinical individuality and sex-gender transference-countertransference while bringing her readers back to Freud and to the many strands that followed, as she consolidates a consistent line of interest in sexuality and gender, theory and practice, sustained over a

lifetime.

**Trauma and Forgiveness** Oct 01 2020 Using case studies and theory, Alford argues that the traumatized are generally capable of representing their experience.

*Who Will Pay Reparations on My Soul?* May 20 2022 Ranging from Ta-Nehisi Coates's case for reparations to Toni Morrison's revolutionary humanism to D'Angelo's simmering blend of R&B and racial justice, Jesse McCarthy's bracing essays investigate with virtuosic intensity the art, music, literature, and political stances that have defined the twenty-first century. Even as our world has suffered through successive upheavals, McCarthy contends, "something was happening in the world of culture: a surging and unprecedented visibility at every level of black art making." *Who Will Pay Reparations on My Soul?* reckons with this resurgence, arguing for the central role of art and intellectual culture in an age of widening inequality and moral crisis. McCarthy reinvigorates the essay form as a space not only for argument but for experimental writing that mixes and chops the old ways into new ones. In "Notes on Trap," he borrows a conceit from Susan Sontag to reveal the social and political significance of trap music, the drug-soaked strain of Southern hip-hop that, as he puts it, is "the funeral music that the Reagan Revolution deserves." In "Back in the Day," McCarthy, a black American raised in France, evokes his childhood in Paris through an elegiac account of French rap in the 1990s. In "The Master's Tools," the relationship between Spanish painter Diego Velázquez and his acolyte-slave, Juan de Pareja, becomes the lens through which Kehinde Wiley's paintings are viewed, while "To Make a Poet Black" explores the hidden blackness of Sappho and the erotic power of Phillis Wheatley. Essays on John Edgar Wideman, Claudia Rankine, and Colson Whitehead survey the state of black letters. In his title essay, McCarthy takes on the question

of reparations, arguing that true progress will not come until Americans remake their institutions in the service of true equality. As he asks, "What can reparations mean when the damage cannot be accounted for in the only system of accounting that a society recognizes?" For readers of Teju Cole's *Known and Strange Things* and Mark Greif's *Against Everything*, McCarthy's essays portray a brilliant young critic at work, making sense of our disjointed times while seeking to transform our understanding of race and art, identity and representation.

*Reparations* Nov 13 2021 "Kwon and Thompson's eloquent reasoning will help Christians broaden their understanding of the contemporary conversation over reparations."--Publishers Weekly "A thoughtful approach to a vital topic."--Library Journal Christians are awakening to the legacy of racism in America like never before. While public conversations regarding the realities of racial division and inequalities have surged in recent years, so has the public outcry to work toward the long-awaited healing of these wounds. But American Christianity, with its tendency to view the ministry of reconciliation as its sole response to racial injustice, and its isolation from those who labor most diligently to address these things, is underequipped to offer solutions. Because of this, the church needs a new perspective on its responsibility for the deep racial brokenness at the heart of American culture and on what it can do to repair that brokenness. This book makes a compelling historical and theological case for the church's obligation to provide reparations for the oppression of African Americans. Duke Kwon and Gregory Thompson articulate the church's responsibility for its promotion and preservation of white supremacy throughout history, investigate the Bible's call to repair our racial brokenness, and offer a vision for the work of reparation at the local level. They lead readers toward a moral imagination that views reparations as a long-overdue and necessary step in our collective journey toward healing and wholeness.

**The Abusive Personality, Second Edition** Dec 15 2021 This influential book provides an innovative framework for understanding and

treating intimate partner violence. Integrating a variety of theoretical and empirical perspectives, Donald G. Dutton demonstrates that male abusiveness is more than just a learned pattern of behavior--it is the outgrowth of a particular personality configuration. He illuminates the development of the abusive personality from early childhood to adulthood and presents an evidence-based treatment approach designed to meet this population's unique needs. The second edition features two new chapters on the neurobiological roots of abusive behavior and the development of abusiveness in females.

**Beyond the Masks** May 27 2020 Psychology has had a number of things to say about black and coloured people, none of them favourable, and most of which have reinforced stereotyped and derogatory images. *Beyond the Masks* is a readable account of black psychology, exploring key theoretical issues in race and gender. In it, Amina Mama examines the history of racist psychology, and of the implicit racism throughout the discipline. *Beyond the Masks* also offers an important theoretical perspective, and will appeal to all those involved with ethnic minorities, gender politics and questions of identity.

**Cannibal Democracy** Jan 22 2020 Zita Nunes argues that the prevailing narratives of identity formation throughout the Americas share a dependence on metaphors of incorporation and, often, of cannibalism. From the position of the incorporating body, the construction of a national and racial identity through a process of assimilation presupposes a remainder, a residue. Nunes addresses works by writers and artists who explore what is left behind in the formation of national identities and speak to the limits of the contemporary discourse of democracy. *Cannibal Democracy* tracks its central metaphor's circulation through the work of writers such as Mrio de Andrade, W. E. B. Du Bois, and Toni Morrison and journalists of the black press, as well as work by visual artists including Magdalena Campos-Pons and Keith Piper, and reveals how exclusion-understood in terms of what is left out-can be fruitfully understood in terms of what is left over from a process of unification or incorporation. Nunes shows that while this remainder can be deferred into the future-lurking as a threat to the desired

stability of the present—the residue haunts discourses of national unity, undermining the ideologies of democracy that claim to resolve issues of race. Zita Nunes is associate professor of English at the University of Maryland, College Park.

### **Time, Doubt and Wonder in the Humanities**

Apr 26 2020 Time, Doubt and Wonder in the Humanities addresses a serious lacuna in humanities studies. It affirms our commitment to wonder and adventure in living by confronting the subtext that lies within the manifold worldly, social and political vicissitudes and tribulations. The essays in this volume speak to our times and make sense of the idea of temporality in general by using wonder as an inclusive metaphor, which engulfs fortitude, anguish, joy, providence, submission, precariousness and revulsion. Wonder could lead to curiosity to inspiration to doubt to questioning to indignation to seeking of justice. The book offers a benchmark in thinking about why we must take literature and art seriously in times of great political turmoil. It affirms that the shape and contour of literary studies shall depend on how the coming generation maintains a delicate balance among inspiration, doubt and faith.

Romanticism and the Emotions Feb 02 2021 The first essay collection to examine emotion across the span of Romantic literature and thought, in light of new scholarship.

*The Duke's Ballad* Aug 23 2022 The Duke's Ballad is the tale of Aisling, a young witch from a family gifted with a magical power that she must protect from her brother, Kirion, who wields magic unlike the rest of the family's. He gains power only by a terrible means: by killing others who wield magic. Years ago, Aisling fled her native Kars when Kirion, working for the Duke of Kars, tried to kill her. Since Aisling's departure, Kirion has tightened his insidious hold on Duke Shastro. The malevolent sorcerer's dark influence works through Shastro to cast a deadly pall over all of Kars. A fatal chain of events is triggered when Kirion pitches the people of Kars into a war with a neighboring clan. Aisling recruits her younger brother Keelan and returns in disguise, determined to undermine Kirion's power and unseat his evil pawn from the throne. Accompanied also by a catlike telepathic beast, Aisling becomes part of Shastro's court. But

even as she begins to learn the ways of court power, a brutally cold winter besieges the land, testing the endurance of the people of Kars, who have little cheer in that darkest season. As Kars and its people contend with Kirion's depredations, the warring clan's raids, and the devastating winter, Aisling and Keelan must somehow, through guile, persistence and ingenuity, find a way to avoid the attention of their dangerous older brother, and save the people from his murderous sorcery. Only if they can survive Kirion's terrible power can they deliver the dukedom into the peace and prosperity it once knew.

### Covered with Night: A Story of Murder and

### Indigenous Justice in Early America Aug 11 2021

WINNER • 2022 PULITZER PRIZE IN HISTORY

Finalist • National Book Award for Nonfiction

Best Books of the Year • TIME, Smithsonian,

Boston Globe, Kirkus Reviews The Pulitzer Prize-

winning history that transforms a single event in

1722 into an unparalleled portrait of early

America. In the winter of 1722, on the eve of a

major conference between the Five Nations of

the Haudenosaunee (also known as the Iroquois)

and Anglo-American colonists, a pair of colonial

fur traders brutally assaulted a Seneca hunter

near Conestoga, Pennsylvania. Though virtually

forgotten today, the crime ignited a contest

between Native American forms of

justice—rooted in community, forgiveness, and

reparations—and the colonial ideology of harsh

reprisal that called for the accused killers to be

executed if found guilty. In Covered with Night,

historian Nicole Eustace reconstructs the attack

and its aftermath, introducing a group of

unforgettable individuals—from the slain man's

resilient widow to an Indigenous diplomat known

as "Captain Civility" to the scheming governor of

Pennsylvania—as she narrates a remarkable

series of criminal investigations and cross-

cultural negotiations. Taking its title from a

Haudenosaunee metaphor for mourning,

Covered with Night ultimately urges us to

consider Indigenous approaches to grief and

condolence, rupture and repair, as we seek new

avenues of justice in our own era.

### **Wrestling with Destiny** Apr 06 2021 Can

psychoanalysis help people control their

destinies? Using empirical evidence from

neuroscience, Lucy Holmes makes a powerful

argument that it can. This book considers the various ways in which destiny is linked to the repetition compulsion, and how free association in psychoanalysis can literally change the mind in ways that can help people reshape and take control of the future. Freud's psychoanalysis is revealed here to be startlingly modern in its consonance with the latest findings in the study of the brain. The compulsion to repeat can propel human beings toward destinies they would never have consciously chosen. The tenacity of this human tendency can inhibit our ability to meet life's challenges. These challenges include our gender; an inability to master the complexities of loving and the strains of marriage; fears regarding the impertinence of being successful; the unconscious, reptilian pleasure we derive from going to war and raping the planet; and the inexorable decline and decay of our mortal flesh. This book argues that the evolved talking that occurs in the psychoanalytic process can change the chemistry and structure of the brain in a way that helps the talker face these challenges and take charge of his or her own destiny. The author presents a cogent hypothesis spanning brain and mind to clarify how the basic rule of psychoanalysis - "just say everything" - can actually cure. This will appeal to mental health professionals such as psychoanalysts and psychotherapists, and students at the post-graduate level, as well as the general interested reader.

### **Psychoanalytic Versions of the Human**

**Condition** May 08 2021 What is psychoanalysis? Whereas there was once a time when proponents of "mainstream psychoanalysis" could point to the preeminence of Freud's drive theory and the version of the human condition associated with it—man as seeking pleasure in an erotically tinged universe—contemporary psychoanalysis is a fractured and contentious discipline in which competing theories share little more than the basic concepts of unconscious mental processes, repression, and transference. Taking the complexities, ambiguities, and contradictions engendered by psychoanalysis over the past several decades as an encouraging point of departure rather than as evidence of the dissolution of the "psychoanalytic tradition," *Psychoanalytic Versions of the Human Condition* makes explicit

how, within each major theory, a particular story about the nature of the world and what it means to be human decisively shapes how the clinician conceptualizes individual psychopathology and approaches treatment. A chorus of voices that both challenges and reaffirms the theory and practice of psychoanalysis, *Psychoanalytic Versions of the Human Condition* asks urgent questions—about the politics of psychoanalytic knowledge, and about how the profession is situated and operates in our contemporary culture. Whether Freudian, Jungian, Kleinian, Kohutian, Lacanian, or hybrid, the clinician will find this book a useful guide to understanding how each theory's "philosophy of life" infuses clinical work.

*Moving Beyond Individualism in Pastoral Care*

*and Counseling* Jul 30 2020 Despite astute critiques and available resources for alternative modes of thinking and practicing, individualism

continues to be a dominating and constraining ideology in the field of pastoral psychotherapy and counseling. Philip Rieff was one of the first to highlight the negative implications of individualism in psychotherapeutic theories and practices. As heirs and often enthusiasts of the Freudian tradition of which Rieff and others are critical, pastoral theologians have felt the sting of his charge, and yet the empirical research that McClure presents shows that pastoral-counseling practitioners resist change. Their attempts to overcome an individualistic perspective have been limited and ineffective because individualism is embedded in the field's dominant theological and theoretical resources, practices, and organizational arrangements. Only a radical reappraisal of these will make possible pastoral counseling practices in a post-individualistic mode. McClure proposes several critical transformations: broadening and deepening the operative theologies used to guide the healing practice, expanding the role of the pastoral counselor, reimagining the operative anthropology, reclaiming sin and judgment, nuancing the particular against the individual, rethinking the ideal outcome of the practices, and reimagining the organizational structures that support the practices. Only this level of revisioning will enable this ministry of the church to move beyond its individualistic limitations and offer healing in more complex, effective, and socially adequate ways.

Caroline Norton's Defense Mar 18 2022 This account of the author's experience at the hands of an "imperfect state of law" in early 19th-century England makes a passionate plea for equal justice for women. Largely as a result of this book the passage of the Married Women's Property Act and reform of the English Marriage and Divorce Laws occurred some years later.

**Race, Rights, and Reparations** Mar 25 2020 Race, Rights and National Security: Law and the Japanese American Incarceration is both a comprehensive resource and course book that uses the lens of the WWII imprisonment of Japanese Americans to explore the danger posed when the country sacrifices the rule of law in the name of national security. Following an historical overview of the Asian American legal experience as unwanted minorities, the book examines the infamous Supreme Court cases

that upheld the orders leading to the mass incarceration and their later reopening in coram nobis proceedings that proved the government lied to the Court. With that foundation, the book explores the continued frightening relevance of those cases, including how racial and religious minorities continue to be harmed in the name of national security and the threat to democracy when courts fail to act as a check on their co-equal branches of government. New to the Third Edition: An entirely new section, which views the recent targeting of religious minorities through the lens of the Japanese American incarceration, including the Muslim travel ban case of *Trump v. Hawaii*, which purported to overrule *Korematsu v. United States*. A continuous inquiry throughout the book regarding the role of courts in reviewing government actions taken in the name of national security, the tensions inherent in identifying that role, the potential cost of excessive court deference, and a proposed method for judicial review of national security-based government actions. Updated text, including revisions that tailor the book's content to its revised focus on national security, enhanced discussions of early anti-Asian exclusionary laws and *Ex Parte Endo*; recent events raising parallels to the Japanese American incarceration, such as the incarceration of immigrants and family separation at the southern border and the continued negative stereotyping of Asian Americans. Augmented discussion of ethical rules in relation to misconduct by government lawyers during World War II. Professors and students will benefit from: A succinct overview of Asian American legal history An overarching narrative that takes the reader from early anti-Asian discriminatory laws to the wartime Japanese American incarceration to today, interweaving carefully contextualized case law with questions, original government and litigation documents, oral histories, commentary, and photographs to stimulate class discussion. A focus on both the legal and non-legal issues surrounding the Japanese American incarceration, so that readers consider how the legal system, the law, and players within the legal system act within a broader milieu of politics, economics, and culture. The ability to understand law and the legal system in a way

that is both interdisciplinary and that crosses different areas of law. The book treats subjects such as race relations and critical race theory; constitutional, criminal, and national security law; criminal and civil procedure; professional ethics; evidence; legal history; and lawyering practice. A professor in the area of constitutional law, for example, might excerpt relevant portions of the book to supplement the standard, typically decontextualized case law treatment of the Korematsu and Hirabayashi cases. At the same time, this book explores these and other cases in their historical and political context and addresses the law's real human impact. Finally, the story of the Japanese American incarceration provides a powerful starting place for students to discuss a range of present-day issues regarding stereotypes and profiling, government restraint on liberties, national protectionism, and civic responsibility. If teaching at its best is about engaging students' hearts and minds, and provoking stimulating debate, these materials are designed to facilitate just that.

**Affect Regulation and the Repair of the Self (Norton Series on Interpersonal Neurobiology)** Dec 27 2022 This volume (one of two) is the first presentation of Schore's comprehensive theory in book form, as it has developed since 1994. In 1994 Allan Schore published his groundbreaking book, *Affect Regulation and the Origin of the Self*, in which he integrated a large number of experimental and clinical studies from both the psychological and biological disciplines in order to construct an overarching model of social and emotional development. Since then he has expanded his regulation theory in more than two dozen articles and essays covering multiple disciplines, including neuroscience, psychiatry, psychoanalysis, developmental psychology, attachment, and trauma. *Affect Regulation and the Repair of the Self* contains chapters on neuropsychology and developmentally oriented psychotherapy. It is absolutely essential reading for all clinicians, researchers, and general readers interested in normal and abnormal human development.

*Love, Hate and Reparation* Apr 30 2023 Two eminent psychoanalysts discuss the instinctual sources of emotion in normal adults.

*The Handbook of Reparations* Jun 20 2022 This Handbook provides a broad range of essential information about past experiences with massive reparations programs as well as normative guidance for future practice. It examines in detail reparations programs in different parts of the world; includes thematic papers on topics that frequently come about in the design and implementation of reparations programs; and, finally, reproduces key documents on reparations, including national legislation. In addition to providing a wealth of factual information about a wide range of reparations programs (some of them previously unexamined), the thematic papers break new ground, tackling issues that have not been sufficiently addressed (if at all) in the literature, including the very notion of justice in reparations for the massive cases, the relationship between material compensation and other symbolic measures of reparations, and the complicated set of questions around how to provide reparations to victims of sexual violence. Finally, the book makes available fundamental documents on reparations, including national legislation. These documents - which are either difficult to find or have never been translated into English before - are both directly relevant to the case studies and the thematic papers, and illuminating to those thinking prospectively about the design and implementation of reparations programs.

**The Psychology of War and Peace** Nov 25 2022 Can a Baby Be an Enemy? Our world is in a deep, prolonged crisis. The threat of global nuclear war, the chronic condition of local wars, the imperilled environment, and mass starvation are among the major forms this crisis takes. The dangers of massive overkill, overexploitation of the environment, and overpopulation are well

known, but surprisingly little has been said about their potential interactions, their bearing upon each other. If there were to be a nuclear confrontation between today's superpowers, it might not take place in today's world, but in a far less friendly habitat, such as the world may be some decades hence. And it need hardly be added that the era of this particular super power configuration may be waning rapidly, its place to be taken by other international arrangements not necessarily less threatening. To understand and cope with our situation we need correspondingly serious reflection. This volume forms a welcome part of that process. Unavoidably, a large part of our thinking about the issues of human survival must be oriented to physical and biological aspects of the total danger. But it has not escaped the authors of this book that, coupled with these aspects, there are profound psychological dangers, such as loss of the sense of futurity, moral deterioration, and a fatalistic decline in the will to struggle to protect our home, the Earth.

Representations of Motherhood Mar 06 2021

*Object Relations, Work and the Self* Feb 23 2020

In this book, David P. Levine applies psychoanalytic object relations theory to understanding work motivation and the meaning of work. Drawing on the writings of authors such as Donald Winnicott, Otto Kernberg and Melanie Klein, he explores three factors central to our effort to understand work: guilt, greed and the self. Special attention is paid to the factors that determine the individual's emotional capacity to do work that engages the self and its creative potential and to the related matter of impairment in that capacity. Chapters include:

the problem of work greed, envy and the search for the self skill, power and authority work and reality. *Object Relations, Work and the Self* will be of interest to psychoanalysts and organizational consultants as well as anyone concerned with what determines the quality of life in the workplace.

*Organizations in Depth* Dec 23 2019 `The book is a good read. Gabriel has an engaging writing style, liberally interspersed with vignettes, cases, and quotes.... While the reader may not agree with some of what Gabriel is espousing, the author presents his material in a non-judgemental manner.... And who knows ? Maybe Gabriel is foreshadowing some new directions in organizational theory and even new research methodology' - *Journal of Occupational and Organizational Psychology* This book is a comprehensive and systematic examination of the insights psychoanalysis can offer to the study of organizations and organizational behaviour. Richly illustrated with examples, Yiannis Gabriel's exhaustive study provides fresh understandings of the role of creativity, control mechanisms, leadership, culture, and emotions in organizations. Core theories are explained at length and there is a chapter on research strategies. Extensive reference is made to practical cases, and there is a review of the key debates.

Can science, psychology, and biology explain miracles? This three-volume set attempts to answer that question, presenting the latest, as well as classic, thinking and research regarding miracles from fields that include psychology, psychiatry, theology, biology, and history. From news of a crippled woman who left her wheelchair and walked after an evangelist prayed over her, to stories of people who died on the operating table only to be revived to tell of bright lights and the pathway to the afterlife, we've all heard of what seem miraculous events. They have surfaced across history. They range from stigmata and bleeding icons to deadly tumors that disappear, and healers who succeed just by laying hands on the afflicted; from people who can predict unexpected events to so-called mediums and those who can allegedly see and speak with the dead. Some miracles are intricately tied to religious beliefs, but there are millions of people who ascribe to no particular religion, yet still believe that things happen that defy all laws of nature, and thus defy scientific explanation. In these books, eminent scholar J. Harold Ellens and his team of expert contributors examine miracles of body, mind, and spirit, presenting the most recent research and writing on these uncommon events as they aim to bring hard science to some of the most persistent—and peculiar—phenomena associated with the human race.
