The 6 Types of Working Genius is the fastest way to help people identify the type of work that brings them joy and

energy, and avoid work that leads to frustration and burnout. Beyond the personal discovery and instant relief that Working Genius provides, the model also gives teams a remarkably simple and practical framework for tapping into one another's natural gifts, which increases productivity and reduces unnecessary judgment. What sets this book—and the model behind it—apart from other tools and assessments is the speed at which it can be understood and applied, and the relevance it has to every kind of work in life, from running a company to launching a product to managing a family. In addition to this book, Lencioni and the Table Group have created a 10-minute assessment that helps individuals quickly identify their gifts and apply this model to themselves and their teams. A better understanding of youth work's historical links with social work can help us to shape its relationship with social work in the future. This sixth publication in the History of Youth Work in Europe project based on the workshop held in Malta – Connections, Disconnections and Reconnections: The Social Dimension of Youth Work, in History and Today – looks at the relationship between youth work and social work and the role youth work can play in the social inclusion of young people. Contributors have reflected on concepts, tools and support measures for more vulnerable and often socially excluded young people and have sought to promote a common understanding of youth work as a social practice. The workshop that led to this book sought to understand where youth work has positioned itself from its origins, through its development, to its contemporary identity. Is youth work as much a social practice as a non-formal educational one? Where does the balance between these two dimensions lie? What are the mutually enriching dimensions of these two fields in terms of their impact on young people's lives? While most agree that youth work needs to be further defined as a practice or profession in itself and that the process of shaping its identity continues in different ways in different countries, it is clear that when it comes to a cross-sectoral perspective and youth work's interaction with social work, the picture becomes significantly more complex, arguably much richer and certainly more dynamic than might have hitherto been foreseen. Based on focused personal interviews with 60 foundation staff members at the chief executive officer, program officer, and administrative assistant job levels, this study offers an in-depth look at the roles and responsibilities of foundation staff members and how such factors as gender, age, ethnicity, education, employment history, volunteer activities, and family responsibilities have affected their career opportunities. In addition to career information, the study offers a detailed picture of management styles, grantmaking processes, and board-staff relations in foundations.
