Executive Intelligence May 18 2023 The final word on what traits make for highly successful managers—and a detailed explanation of how to identify potential standout performers. Executive Intelligence is about the substance behind great leadership. Inspired by the work of Peter Drucker and Jim Collins, Justin Menkes set out to isolate the qualities that make for the 'right' people. Drawing on his background in psychology and bolstered by interviews with accomplished CEOs, Menkes paints the portrait of the ideal executive. In a sense, Menkes's work reveals an executive IQ—the cognitive skills necessary in order to excel in senior management positions. Star leaders readily differentiate primary priorities from secondary concerns; they identify flawed assumptions; they anticipate the different needs of various stakeholders and how they might conflict with one another; and they recognise the underlying agendas of individuals in complex exchanges. Weaving together research, interviews and the results of his own proprietary testing, Menkes exposes one of the great fallacies of corporate life, that hiring and promotion are conducted on a systematic or scientific basis that allows the most accomplished to rise to their levels of optimal responsibility. Finally, Menkes is a passionate advocate for finding and employing the most talented people, especially those who may have been held back by external assumptions.

Executive Selection Mar 04 2022 Strong leadership is essential for survival in today's competitive business environment. Yet it has been estimated that from 25 to 75 percent of top executives hired today fail. Such failures can cripple the organization and adversely affect its stakeholders. So how can senior-level positions be filled with leaders who fit the bill? The Center for Creative Leadership has studied executive selection for years. Its researchers have interviewed hundreds of executives, analyzed the decision-making styles of the people who make selections, and studied the latest management and psychological literature on the subject. *Executive Selection* draws on this research, and on the extensive experience of the authors in working with top-level management, to offer a series of steps that decision makers can follow to make better hiring decisions. After detailing who should be on the selection team, the book shows how this group of people can develop a systematic way to look at the organization, its environment, the open position, and the candidate requirements. The team thereby develops an image of the ideal candidate that can be used throughout the selection process. Next, advice is given on the best way to develop a good candidate pool and how to gather and use the right information to determine who should be hired. Finally, *Executive Selection* makes recommendations that will help ensure the new executive's successful transition into the organization and his or her continued development. In all, these steps represent a comprehensive, easy-to-follow system that takes the mystery out of selecting for success. The book's strategies for pinpointing the right person for the job apply to the selection of CEOs, officers, and others in the executive suite. Executives, boards of directors, and HR professionals can use these strategies to improve their selection processes. Investors can use them to assess the executive selections being conducted within companies of interest. And researchers can use them to garner ideas for additional work in the field.

What Makes an Effective Executive (Harvard Business Review Classics) Jun 14 2020 In his sixty-five-year consulting career, Peter F. Drucker, widely regarded as the father of modern management, identified eight practices that can make any executive effective. Leadership is not about charisma or extroversion. It's about these practices: Effective executives ask, "What needs to be done?" They also ask, "What is right for the enterprise?" They develop action plans. They take responsibility for decisions. They take

responsibility for communicating. They focus on opportunities rather than problems. They run productive meetings. And they think and say “we” rather than “I.” Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.
