'Death of the Father' is a comparative examination of the crises in symbolic identification and national traumas that have resulted from the defeat and/or implosion of regimes in Fascist Italy, Nazi Germany, Imperial Japan and Communist Eastern Europe. This book explores the different ways in which psychoanalysis has been connected to various fields of Italian culture, such as literary criticism, philosophy and art history, as well as discussing scholars who have used psychoanalytical methods in their work. The areas discussed include: the city of Trieste, in chapters devoted to the author Italo Svevo and the artist Arturo Nathan; psychoanalytic interpretations of women terrorists during the anni di piombo; the relationships between the Freudian concept of the subconscious and language in philosophical research in Italy; and a personal reflection by a practising analyst who passes from literary texts to her own clinical experience. The volume closes with a chapter by Giorgio Pressburger, a writer who uses Freud as his Virgil in a narrative of his descent into a modern hell. The volume contains contributions in both English and Italian. Il labirinto è un archetipo antichissimo, diffuso in ogni parte del mondo, che ha sempre avuto il significato di viaggio iniziatico, di prova. La prima parte di questo libro, scritto a sei mani e ricco di illustrazioni, ripercorre in modo sintetico la storia e il significato del labirinto attraverso i secoli. La seconda descrive poi come si disegna un labirinto (il primo passo per crearne uno proprio, da percorrere sia a mano che a piedi), come si utilizza – sia su pavimento che su parete o su qualsiasi supporto si ritenga opportuno – e infine come si può giocare al gioco dell'oca percorrendolo come se fosse un labirinto. La terza parte approfondisce il suo uso come strumento di auto-iniziazione e auto-guarigione, mentre la quarta associa a ogni Arcano dei Tarocchi un diverso percorso labirintico. I Tarocchi del Labirinto venutisi in tal modo a creare offrono quindi ai lettori una doppia opportunità: da un lato conservano i significati legati al classico ruolo di Ars Divinandi e dall'altro diventano delle guide maestre durante il cammino, nel momento in cui ognuno di loro, preso nell'essenza dei significati che trasmette, ispirerà l'intero iter del percorso. L'uomo fu sin dalla preistoria un creatore di simboli, i quali costituiscono un ponte rispetto alle proprie origini, al cosmo e al destino. Le voci di questo Dizionario, selezionate dall'ampilissimo repertorio in 17 volumi dell'Enciclopedia delle Religioni diretta da Mircea Eliade in collaborazione con Ioan P. Couliano e curate da massimi esperti internazionali, sottolineano l'emergere e il persistere di tale creatività, non solo in solenni circostanze, ma soprattutto nelle osservazioni, nei gesti e negli oggetti quotidiani. Per secoli i simboli sono stati vissuti come portatori di un significato capace di sfondare gli orizzonti del limite umano per proiettarsi in una presenza che si poneva come «altra». Si scopre così che anche gli oggetti più usuali - una chiave, un tessuto, uno specchio, un gioiello - o i gesti più comuni come mangiare, dormire, offrire un dono, giocare, non sono aspetti scontati della nostra vita: nella storia dell'umanità, infatti, sono stati caricati di un senso che noi possiamo aver scordato, ma che attesta come la ricerca di un significato sia impressa nelle profondità del desiderio umano. Le grandi articolazioni di questa ricerca sono tratteggiate nel saggio dello storico delle religioni Jacques Vidal che introduce la nuova edizione. Nel 1990 si tenne a Roma il

XVI Congresso del I.A.H.R. che ebbe come tema la nozione di "religione". Venne particolarmente analizzato l'uso di tale termine da parte degli studiosi di lingua europea nei rapporti con le culture non europee e viceversa. Biological and Neuroscientific Foundations of Philosophy is an authoritative text addressing both academicians and students, and it proposes an integrated and holistic view of scientific study and presents a new paradigm by which to study philosophy. It highlights, in a systematic and sufficiently simple manner, the fundamental role of neuroscience, neuropsychology and biology within philosophical reflection. Written by an expert in neuroscience, the book draws together different strands of study to explore how scientific and neuropsychological discoveries are integral to the study of philosophy and our understanding of mind. It argues to move away from a philosophical paradigm that is based solely within physics and mathematics and to embrace more complex frames of data and knowledge of psychology and biology to advance the discipline. The book also reflects on the symbolic dimensions and the concept of "information" that characterize DNA (biology), and the psyche and language (cognitive and social neuroscience). It offers an ambitious thesis that ties together the philosophical foundations of science, the evolutionary history of human beings, social organization, communication and consciousness. This interdisciplinary work will be highly beneficial for researchers and postgraduate students of neuroscience, philosophy and biological sciences, as well as those interested in the intersection between philosophy and neuroscience.

Filosofo cosmopolita e viaggiatore, Paul Ricoeur (1913-2005) è stato uno dei più importanti pensatori del Novecento. Testimone e talvolta protagonista delle vicende del suo tempo – la seconda guerra mondiale, la caduta dei totalitarismi, le rivoluzioni socioculturali degli anni '60-'70, i dibattiti etico-filosofici-scientifici – Ricoeur è un osservatore lucido e impegnato delle tendenze più significative della cultura contemporanea, dall'etica alla politica, dalla psicoanalisi alla religione. La sua riflessione ha attraversato tutto il secolo, affrontando paesaggi estremamente vari e riflettendo influenze differenti, dalla fenomenologia alla filosofia riflessiva francese, all'ermeneutica. Il nucleo centrale della sua riflessione è rappresentato dal soggetto, l'individuo concreto, sospeso tra la corporeità e il valore, che Ricoeur segue nella difficile riconquista del proprio senso: l'essere umano infatti è capace di parlare, agire, raccontare e raccontarsi, assumersi la responsabilità delle proprie azioni, ma anche ricordare o dimenticare, giudicare e essere giudicato. Di quest'uomo capace il pensatore ha evidenziato negli ultimi anni alcuni problemi concreti relativi all'agire pratico, costeggiando anche zone limitrofe come l'ambito giuridico, evidenziando lo scontro o incontro con le neuroscienze e analizzando le questioni bioetiche. The German comparative philologist Friedrich Max Müller (1823-1900) was one of the most influential scholars in Victorian Britain. Müller travelled to Britain in 1846 in order to prepare a translation of the Rig Veda. This research visit would turn into a lifelong stay after Müller was appointed as Taylor Professor of Modern Languages at Oxford in 1854. Müller's activities in this position would exert a profound influence on British intellectual life during the second half of the nineteenth-century: his book-length essay on Comparative Mythology (1856) inspired evolutionist thinkers such as Herbert Spencer and Edward Burnett Tylor and made philology into one of the master sciences at mid-century; his debates with Charles Darwin and his followers on the origin of language constituted a significant component of religiously informed reactions to Darwin's ideas about human descent; his arguments concerning the interdependence of language and thought influenced fields such as psychology, neurology, paediatrics and education until the end of the nineteenth century; his theories concerning an 'Aryan' language that purportedly predated Sanskrit and ancient Greek led to controversial debates on the relations between language, religion and race in the Indian subcontinent and beyond; and his monumental 50-volume edition of the Sacred Books of the East helped to lay the foundations for the study of comparative religion. Müller's interlocutors and readers included people as various as Alexander von Humboldt, Darwin, George Eliot, Matthew Arnold, Friedrich Nietzsche, Ferdinand de Saussure, Ernst Cassirer, Mohandas K. Gandhi and Jawaharlal Nehru. This volume offers the most comprehensive and interdisciplinary assessment of Müller's career to date. Arising from a conference held at the German Historical Institute in London in 2015, it brings together papers by an international group of experts in German studies, German and British history, linguistics, philosophy, English literary studies, and religious studies in order to examine the many facets of Müller's scholarship. This book was originally published as a special issue of the Publications of the English Goethe Society. From antiquity to the Enlightenment, astrology, magic, and alchemy were considered important tools to unravel the mysteries of nature and human destiny. As a result of the West's exposure during the Middle Ages to the astrological beliefs of Arab philosophers and the mystical writings of late antiquity, these occult traditions became rich sources of inspiration for Western artists. In this latest volume in the popular Guide to Imagery series, the author presents a careful analysis of occult iconography in many of the great masterpieces of Western art, calling out key features in the illustrations for discussion and interpretation. Astrological symbols decorated medieval churches and illuminated manuscripts as well as fifteenth-century Italian town halls and palaces. The transformational zymology of magic and alchemy that enlivened the work of a wide range of Renaissance artists, including Bosch, Brueghel, Dürer, and Caravaggio, found renewed expression in the visionary works of nineteenth-century artists, such

as Fuseli and Blake, as well as in the creative output of the twentieth century's Surrealists. The 70th volume of the Eranos Yearbooks presents the work of the last three years of activities at the Eranos Foundation (2009–2011). It includes the papers given on the theme of the 2011 conference, About Fragility in the Contemporary World, together with talks given on the occasion of the seminar cycle entitled, Eranos Jung Lectures, which took place during the years 2010–2011 to commemorate the 50th anniversary of Carl Gustav Jung's passing. Eminent international scholars gathered to share their work, presented here primarily in English, along with some chapters in Italian. This publication carries additional special meaning in further consolidating the collaboration with the Fetzer Institute by presenting the manuscripts of the Dialogues on the Power of Love, held at Eranos between 2008 and 2011. This project follows the path of the original model of Eranos, especially the aspect of dialogue, searching for understanding and deepening crucial themes in the contemporary world. Contents: 2011 Eranos Conference: About Fragility in the Contemporary World 2008–2011 Fetzer Institute Dialogues at Eranos – The Power of Love: - Love in the Esoteric Traditions - Love in the History of Eranos - Love and Beauty in the Visual Arts - Love and the Social Bond - Love and the Musical Arts 2010–2011 Eranos-Jung Lectures The Greek word 'Eranos' means a 'banquet', to which every guest contributes. From 1933 onwards, the Eranos Conferences took shape in Ascona-Moscia (Switzerland), springing from the idea of Olga Fröbe-Kapteyn to create a 'Meeting Place of East and West'. Under the influence of the psychologist Carl Gustav Jung and other prominent leaders of that era, the Eranos Conferences found their way towards symbolical, archetypal, and mythological motifs. The Eranos gathering is symbolized by its famous Round Table, the image and meaning of which inspired many of the leading thinkers of the 20th century. For more than 70 years, depth psychologists, philosophers, theologians, orientalists, historians of religions as well as natural scientists find at Eranos a unique place where they could meet and exchange views. The rich collection of Eranos Yearbooks bears testimony to an immense and original work accomplished in various fields of learning. I simboli nella psicologia del profondo sono importantissimi per la cura e la guarigione. Carl Gustav Jung investe tempo ed energie proprio nello studio di tutte le espressioni simboliche, in particolare si dedica alle mitologie, alle religioni ed ai contenuti alchemici. Se il simbolo va al di là di un segno semeiotico esprime contenuti già noti a chi osserva una data immagine, ed è il depositario di concetti altrimenti inesplicabili, ecco che i miti possono rappresentare qualcosa di prezioso per cogliere i messaggi della nostra natura profonda. Questo dizionario raccoglie varie espressioni mitologiche da Acce Larenzia ed Achille, passando per Bacco, Cupido, le Sirene... si arriva a Venere e Vulcano. Il mito diventa un'occasione psicologica per comprendere gli sviluppi del mondo, degli esseri viventi, degli dei e degli eroi, rendendo il passato un evento presente ed aiutandoci a comprendere il senso dell'ansia, della tristezza, della depressione e di tante altre forme di nevrosi e di psicopatologia che oggi sperimentiamo. Conoscere i miti significa avere una chiave di lettura diversa per la realtà che affrontiamo attualmente.
