*The Bicycle Spy* Aug 21 2022 Marcel loves riding his bicycle, whether he's racing through the streets of his small town in France or making bread deliveries for his parents' bakery. He dreams of someday competing in the Tour de France, the greatest bicycle race. But ever since Germany's occupation of France began two years ago, in 1940, the race has been canceled. Now there are soldiers everywhere, interrupting Marcel's rides with checkpoints and questioning. Then Marcel learns two big secrets, and he realizes there are worse things about the war than a canceled race. When he later discovers that his friend's entire family is in imminent danger, Marcel knows he can help -- but it will involve taking a risky bicycle ride to pass along covert information. And when nothing ends up going according to plan, it's up to him to keep pedaling and think quickly... because his friend, her family, and his own future hang in the balance.

*6th Grade Virginia SOL Test Prep* May 06 2021 This test prep is good for kids who are on the fence and having trouble passing, or need to increase their margin. These kids will often say "I DON'T KNOW WHERE TO START" when explaining their confusion. This book address that problem with three approaches. 1) In contrast with the other study guides that use random questions in their practice exams; this book collated the questions into chapters based on the logic to solve them. The 6th grade book is divided into eight chapters. They are Logic, Arithmetic, Geometry, Fractions, Reading Graphs and tables, Measurements including a ruler, basic statistics, and order of operations. This book teaches basics then goes into practice exams with word problems. Once the student is proficient with the questions organized into chapters then they are ready for random questions. 2) This study guide has thousands of practice problems. I have placed over 3100 videos on YouTube showing you how to work the problems 3) I reviewed several years of past exams and placed enfaces on the easiest and most common questions. Mastering these questions should yield a 75% to 80%. If a student is already achieving this percentage; the other guides or web site with random questions and covering all material might be best. A book might be better for your student than the web sites for two reasons. 1) The more common and easiest questions are using a ruler to measure. The web designers don't know the size of your computer screen and can't determine if the student has measured correctly. We can get a high percentage of these

problems easily.2) When studying on a computer there are too many websites with the answers. With a book; parents can have greater assurance the work is being done. This book is developed by a trained professional out of concern. It is not the product of a large publishing house. It is the results of one person who wants to help. Best Regards Mark Shannon
